Body, Self and Melancholy Siglinde Clementi,2023-09-01 This book addresses early modern concepts of the body and the self - focussing on three self-narratives authored by the nobleman Osvaldo Ercole Trapp (1634-1710), a body description from head to foot, autobiographical writings, and a brief chronicle of the House of Trapp-Caldonazzo. Approaching the complex theme of the question of the early modern self and the historical body, this book intertwines consistent contextualisation and historicisation of self-interpretation and biography. This is done in three steps: first, the content and function of these self-narratives are analysed with reference to current research on early modern self-narratives. In a second step, the life and family history of Osvaldo Ercole Trapp are examined from a microhistorical perspective and placed within the context of the early modern history of Tyrol's nobility. A third step then goes into detail on individual contexts and discourses that refine one's comprehension of these self-narratives: noble masculinity; family, house and line; theories of procreation and education; body experience and body images. It combines textual analysis, historical anthropology with a strong gender-historical perspective, microhistory and the history of the body as a history of experience and discourse. With this approach, the study makes an innovative contribution to early modern studies on self-narratives, social history of early modern nobility and the history of the body as the history of experience and discourse. This volume will be of interest to students and scholars alike interested in intellectual, social and cultural history.

Zone Di Frattura in Epoca Moderna Almut Bues,2005 Until recently, there have not been many researches on border zones in Early Modern Europe. For the time before the emergence of nation-states, however, it is convenient to think in European cases, which indicate instability or cooperation in these zones of contact. Three representative geographic regions have been central to an international conference, which was questioning the specificities of zones of fracture. Poland-Lithuania has been linked with two zones (the Baltic Sea and the Balkans). The Northern Italian States were situated between two tectonic regions (the Balkans and the Rhine valley). The Balkans by themselves were divided into various mini

zones, and confronted with the Ottoman Empire. The panels did not only try to look for comparisons, but intended to find out the complexity and the different experiences within zones of frontiers in an European context. The overlapping of various lines, especially in the fields of law, taxes and the Church has been brought into sharper focus.

La signoria rurale nell'Italia del tardo medioevo. 6 Le signorie trentine Marco Bettotti, Gian Maria Varanini, 2023-06-15 Negli ultimi decenni, l'importanza della signoria rurale nella storia dell'Italia del tardo medioevo è stata riconsiderata e rivalutata. Sulla base di una ricca documentazione d'archivio, questo volume propone una descrizione sistematica e ragionata degli aspetti politici, economici, sociali e culturali della signoria rurale in un territorio posto "ai confini d'Italia", il principato vescovile di Trento dei secoli XIV e XV. Dai loro castelli dispersi nelle valli alpine, ai piedi delle montagne, le famiglie signorili trentine guardano in modo crescente verso Vienna e verso l'impero asburgico; nei rapporti con il mondo contadino, mettono a punto nel Quattrocento equilibri di potere destinati a mantenersi quasi intatti per tutta l'età moderna, sino alla fine della prima guerra mondiale.

Natural Particulars Anthony Grafton, Nancy G. Siraisi, 1999 Recently the history of science in early modern Europe has been both invigorated and obscured by divisions between scholars of different schools. One school tends to claim that rigorous textual analysis provides the key to the development of science, whereas others tend to focus on the social and cultural contexts within which disciplines grew. This volume challenges such divisions, suggesting that multiple historical approaches are both legitimate and mutually complementary.--

Gender, Law and Material Culture Annette Cremer, 2020-10-26 This interdisciplinary volume discusses the division of the early modern material world into the important legal, economic, and personal categories of mobile and immobile property, possession, and the rights to usufruct. The chapters describe and compare different modes of acquisition and intergenerational transfer via law and custom. The varying perspectives, including cultural history, legal history, social and economic history, philosophy, and law, allow for a more nuanced understanding of the links between the movability of an object and the gender of the person who owned, possessed, or used it. Case studies and examples come from a wide geographical range, including Norway, England, Scotland, the Holy Roman Empire, Italy, Tyrol, the Ottoman Empire, Greece, Romania, and the European colonies in Brazil and Jamaica. By covering both urban and rural areas and exploring all social groups, from ruling elites to the lower strata of society, the chapters offer fresh insight into the division of mobile and immobile property that socially and economically posed disadvantages for women. By exploring a broad scope of topics, including landownership, marriage contracts, slaveholding, and the dowry, this book is an essential resource for both researchers and students of women's history, social and economic history, and material culture.

Martin Luther Alberto Melloni, 2017-12-20 The three volumes present the current state of international research on Martin Luther's life and work and the Reformation's manifold influences on history, churches, politics, culture, philosophy,

arts and society up to the 21st century. The work is initiated by the Fondazione per le scienze religiose Giovanni XXIII (Bologna) in cooperation with the European network Refo500. This handbook is also available in German.

Spain in Italy Thomas James Dandeleit, John A. Marino, American Academy in Rome, 2007 This volume integrates the theme of Spain in Italy into a broad synthesis of late Renaissance and early modern Italy by restoring the contingency of events, local and imperial decision-making, and the distinct voices of individual Spaniards and Italians.

Politics and Religion in Napoleonic Italy Michael Broers, 2004-01-14 The Politics of Religion in Napoleonic Italy explores the intense cultural conflict created by French rule in Italy at the start of the nineteenth century. Napoleon's desire for cultural conformity struck at the heart of Italian religious life. Yet the reforms imposed by French rule created resentment and resistance across Italy, finally leading to Napoleon's famous quarrel with Pope Pius VII. In this fascinating study, Mike Broers traces the events leading up to the ex-communication of Napoleon and the Pope's arrest and exile from Rome. Using previously neglected French and Italian archival sources, this book reveals how the alliance between Church and people grew in the face of alien, imperial rule. It exposes the vital role this union played in preventing Italy from being totally assimilated into the French empire.

Cultures of Conflict Resolution in Early Modern Europe Stephen Cummins, Laura Kounine, 2017-05-15 Disputes, discord and reconciliation were fundamental parts of the fabric of communal living in early modern Europe. This edited volume presents essays on the cultural codes of conflict and its resolution in this period under three broad themes: peacemaking as practice; the nature of mediation and arbitration; and the role of criminal law in conflicts. Through an exploration of conflict and peacemaking, this volume provides innovative accounts of state formation, community and religion in the early modern period.

La costituzione politica della città Maria Teresa Lo Preiato, 2011-06-28T00:00:00+02:00 La storia della città è per eccellenza storia politica, in cui l'agire risponde a determinati modi di pensare il "vivere comune". L'ordinamento giuridico o anche l'organizzazione politica della vita associata si definiscono in base ad un insieme condiviso di regole che disciplinano l'appartenenza alla comunità in vista della realizzazione del bene comune, della sicurezza e della pace. Ordine, disciplina e bene comune sono infatti i fondamenti giuridico-politici della costituzione politica della città. All'interno di questo quadro costituzionale, Trento è il "livello" di realtà che consente all'autrice di analizzare la trasformazione dell'organizzazione della vita cittadina e il contenuto dell'autonomia in un lungo arco di tempo, dal Trecento fino al tardo illuminismo, in un'ottica tematica che ruota attorno al nesso diritto-storia-costituzione. La costituzione di Trento emerge da un ampio spettro di fonti, fino ad oggi poco studiate, e da un'elaborazione e analisi concettuale che mette in luce la specificità della dinamica politico-giuridica della città e del suo lessico costituzionale.

I servizi di prossimità come beni comuni Aa. Vv.,2024-02-12T00:00:00+01:00 Negli ultimi anni, e con maggiore intensità a partire dall'esplosione della pandemia, si sono registrati fenomeni di mobilità dalla città verso la montagna. Sempre più, abitanti delle aree urbane hanno scelto di trasferirsi in località di valle, spesso marginali e spopolate, per sfuggire alle città, percepite come malsane e pericolose, per promuovere nuove attività o per approfittare del telelavoro in una quotidianità più vicina alla natura. La prossimità crea legami sociali che strutturano la vita quotidiana degli individui, ma il ruolo e il rapporto con la dimensione geografica, relazionale e della quotidianità può variare a seconda del quadro storico e quindi degli specifici ambiti economici, sociali, politici e culturali. In quale misura la marginalizzazione socioeconomica e territoriale che tocca molte aree dello spazio alpino è legata al depotenziamento subito negli ultimi decenni dai servizi di prossimità (negozi, bar, posta, scuole, presidi sanitari) presenti in questi territori? E come l'odierno dibattito attorno ai «beni comuni» può essere la premessa per una loro rigenerazione? Il volume cerca di rispondere a queste domande attraverso contributi che, da prospettive diverse, esaminano il ruolo dei servizi di prossimità nelle traiettorie storiche e nelle attuali realtà delle comunità montane. Allo stesso tempo, dà voce a un ventaglio di esperienze al cui centro vi sono le varie e sfaccettate declinazioni, forme e funzioni assunte dai servizi di prossimità.

Production of Locality in the Early Modern and Modern Age Angelo Torre,2019-11-20 This book is a microhistory study of village settlements in early modern Northwest Italy that aims to expand the notion of place to include the process of producing a locality; that is, the production of native local subjects through practices, rituals and other forms of collective action. Undertaking a micro-analytical approach, the book examines the customs and practices associated with typically fragmented and polycentric Italian village settlements to analyze the territorial tensions between various segments of a village and its neighbors. The microspatial analysis reveals how these tensions are the expressions of conflictual relationships between lay, ecclesiastical and charitable bodies culminating in a culture of fragmentation that impacts local economic and political practices. The book also traces how the production of locality survived throughout the nineteenth and twentieth century and is still observed today. In this light, the study of practices and policies of locality over time that this book undertakes is an essential tool to better understand the nature and role of these social bonds in today's society. Archival records and the methods for approaching this source material are included within the text, making it an accessible and invaluable book for students and teachers of social and cultural history.

Singing Jeremiah Robert L. Kendrick,2014-05-05 A defining moment in Catholic life in early modern Europe, Holy Week brought together the faithful to commemorate the passion, crucifixion, and resurrection of Jesus Christ. In this study of ritual

and music, Robert L. Kendrick investigates the impact of the music used during the Paschal Triduum on European cultures during the mid-16th century, when devotional trends surrounding liturgical music were established; through the 17th century, which saw the diffusion of the repertory at the height of the Catholic Reformation; and finally into the early 18th century, when a change in aesthetics led to an eventual decline of its importance. By considering such issues as stylistic traditions, trends in scriptural exegesis, performance space, and customs of meditation and expression, Kendrick enables us to imagine the music in the places where it was performed.
