The Art of Movies Nicolae Sfetcu,2014-05-06 Movie is considered to be an important art form; films entertain, educate, enlighten and inspire audiences. Film is a term that encompasses motion pictures as individual projects, as well as — in metonymy — the field in general. The origin of the name comes from the fact that photographic film (also called filmstock) has historically been the primary medium for recording and displaying motion pictures. Many other terms exist — motion pictures (or just pictures or picture), the silver screen, photoplays, the cinema, picture shows, flicks — and commonly movies.

Through a combination of economic, cultural, historical, textual, and technological approaches, this book provides a discriminating analysis of Disney authorship, and the authorial claims of others working within the studio; conceptual and theoretical engagement with the constructions of 'Classic' Disney, the Disney Renaissance, and Neo-Disney; Disney's relationship with other studios; how certain Disney animations problematise a homogeneous reading of the studio's output; and how the studio's animation has changed as a consequence of new digital technologies.
