Representations of the Moon in Literature and Art Gabriela Gândara Terenas, 2024-10-19 This book brings together a collection of essays on the occasion of the fiftieth anniversary of the arrival of the first man on the moon - a time when tourist journeys to the moon, now a real possibility, were no more than a fantasy. Divided into four sections, illustrating different perceptions of the moon, the common aim of the essays in this book is to examine how mankind's interest in the moon has been represented in Literature and the Arts, an objective underpinned by the desire to exploit the relationship between the so-called two cultures—the Humanities and Science—as C.P. Snow perceived them in his pioneering work (1959). The plethora of ways in which our companion satellite has been portrayed has led the authors of the essays to draw upon research from the history of science as well as from literary, cultural and artistic studies. In addition to analysing the impact on literature and music, of our arrival on the moon, whether real or imaginary, these studies also examine how writers along the centuries have appropriated the moon as a metaphor in order to project latent conflict, criticise the society or politics of their day, reflect upon scientific or technological discoveries or fantasise about journeys, encounters or imaginary realities.

The Sacred Neuron John Bowker, 2005-02-25 Why do we think that things happen in the way that they do? Why do we think that some things are beautiful, and other things ugly? Why do we think that some things are good, and other things evil? Why do we think that some things are true, and other things false? These are old and traditional questions. In the past they have been answered by separating our emotional from our rational responses. But recent work in the neurosciences suggests that the questions now deserve very different answers. In his fascinating and original new book, John Bowker shows that reason and emotion work much more closely together in forming human opinions and judgements than has previously been supposed. This discovery has stunning implications for the increasingly dangerous relationship between different religions and cultures, and also for the human sense of God. The Sacred Neuron is a masterful survey of some key topics in science and religion, which will be sure to amaze and delight the author's many admirers. 'Whether goodness will survive modernity is one of the most urgent questions of our age. In this lucid and erudite work, John Bowker discovers the surprising outlines of an answer.' - Bryan Appleyard, author and journalist 'Never was a book more timely for the world. Just when it seems that moral absolutes have either been swept away or have staged a frightening and unyielding comeback, John Bowker steps forward to explain how we can find some sure footing in the world of aesthetic and moral ambiguities. Citing the latest scientific research and drawing on cultural references that range from Stravinsky to Bertrand Russell, and from George Orwell to John Betjeman, he offers us new insights into how we can claim something is beautiful or something is good. Then with meticulous scholarship, he traces the origin of religions in the human community and explains how and why the need for them persists. The Sacred Neuron is a seriously impressive book.' - Joan Bakewell, writer and broadcaster 'Scholarship of this quality is so rare, particularly in the domain of science and religion. Bowker's discussion of 'truth' and its relevance to an understanding of the world's religions and the animosities between them is replete with a poignant wisdom, born of his great understanding of so many religious traditions. The Sacred Neuron is an eloquent testimony to the value of informed interdisciplinary reflection.' - John Hedley Brooke, Andreas Idreos Professor of Science and Religion, University of Oxford 'The Sacred Neuron is a rare mixture of intellectual, religious, aesthetic and ethical history and theology, all enhanced by John Bowker's special compound of meticulous scholarship and deep faith. The book is brave and broad.

Reading it mingles fascination with pleasure.' - Peter Hennessy, Attlee Professor of Contemporary History, Queen Mary, University of London 'The Sacred Neuron is one of the first books to take seriously the impact of modern neuroscience on how our perception of the external world must affect our understanding of emotion, rationality, ethics and religion. With great charm and humour, and with extraordinary breadth of scholarship, Bowker shows how religious experience might be said to have meaning in the twenty-first century. His book will become a classic.' - Mark Williams, Professor of Clinical Psychology, University of Oxford

Scottish Literature Gerard Carruthers, 2009-04-17 This guide combines detailed literary history with discussion of contemporary debates about Scottishness. The book considers the rise of Scottish Studies, the development of a national literature, and issues of cultural nationalism. Beginning in the medieval period during a time of nation building, the book goes on to focus on the 'Scots revival' of the eighteenth and nineteenth centuries before moving on to discuss the literary renaissance of the twentieth century. Debates concerning Celticism and Gaelic take place alongside discussion of key Scottish writers such as William Dunbar, Robert Burns, Walter Scott, Thomas Carlyle, Margaret Oliphant, Hugh MacDiarmid, Alasdair Gray, Janice Galloway and Liz Lochhead. The book also considers emigre writers to Scotland; Scottish literature in relation to England, the United States and Ireland; and postcolonialism and other theories that shed fresh light on the current status and future of Scottish literature.

Narrative Michael J Toolan, 2013-11-05 Narrative explores a range of written, spoken, literary and non-literary narratives. It shows what systematic attention to language can reveal about the narratives themselves, their tellers, and those to whom they are addressed. Topics examined include plot structure, time manipulations, point of view, oral narratives and children's stories. This classic text has been substantially rewritten to incorporate recent developments in theory and new technologies, and to make it more usable as a course book. New materials include sections on film, surprise and

suspense, and online news stories. The section on children's narratives has been updated, and the discussion of newspaper stories incorporates contemporary examples. There are new exercises which relate closely to the chapter content and new sections on further reading.

Edinburgh Companion to Twentieth-Century Scottish Literature Ian Brown, 2009-07-03 This volume considers the major themes, texts and authors of Scottish literature of the twentieth and, so far, twenty-first century. It identifies the contexts and impulses that led Scottish writers to adopt their creative literary strategies. Moving beyond traditional classifications, it draws on the most recent critical approaches to open up new perspectives on Scottish literature since 1900. The volume's innovative thematic structure ensures that the most important texts or authors are seen from different perspectives whether in the context of empire, renaissance, war and post-war, literary genre, generation, and resistance. In order to provide thorough coverage, these thematic chapters are complemented by chronological 'Arcade' chapters, which outline the contexts of the literature of the period by decades, and by 'Overview' chapters which trace developments across the century in theatre, language and Gaelic literature. Taken together, the chapters provide a thorough and thought-provoking account of the century's literature.
