*Regulation and Deregulation in European Financial Services* David Knights, Glenn Morgan, 1997-02-07 During the 1980s, deregulation became adopted as a slogan and set of practices which by setting market forces free could increase the efficiency of market systems. This was particularly the case in the financial services where national systems which had been closed through government and industry collaboration were now opened up to more internal and international competition. This book examines the consequences of deregulation in retail financial services. It shows that organisation and actors sought to adapt to this process, often with unexpected results.

The Brave New World of European Labor Andrew Martin, George Ross, 1999 Using a common framework developed by a collaborative Harvard University and Brandeis University affiliated research team, this volume surveys and analyzes the strategic responses of national unions in Britain, France, Germany, Italy, and Spain to the last two decades of economic change. Also evaluated is the response of Sweden, long seen as the most successful variation of the European model, as well as EU level transnational unionism. The volume concludes with a reflection on new union positions and their implications, particularly on the question of what will happen to the European model of society as a consequence. *Internationalisierung kleiner und mittlerer Beratungsunternehmen in Netzwerken* Jana Okech, 2019-03-01 Die Internationalisierung kleiner und mittlerer Beratungsunternehmen in Netzwerken ist in der Internationalisierungsforschung zwar vielfach belegt, die konkrete Ausgestaltung des Netzwerkmanagements blieb jedoch bisher weitgehend unerforscht. Zudem gilt die Internationalisierung mittels Vernetzung vielfach nur als vorübergehende Strategie. Anhand von Fallstudien zeigt Jana Okech auf, dass internationale Netzwerke für kleine und mittlere Beratungsunternehmen nicht nur eine geeignete, sondern auch eine dauerhafte Form der Internationalisierung darstellen. Wesentlich für die Stabilität einer solchen Internationalisierungsstrategie ist dabei das Management dieser Netzwerke, speziell der Umgang der Akteure mit den Ressourcen und Risiken. Die Fallstudien belegen aber auch, dass kleine und mittlere Beratungsunternehmen neben der

Vernetzungsstrategie noch weitere Internationalisierungsstrategien wählen – und zwar gleichzeitig und größenunabhängig. Die Erklärung dafür ist in dem Rückgriff kompetenter Akteure auf das verfügbare (marktspezifische) Human- und Sozialkapital zu suchen. Das Buch wendet sich sowohl an Forschende, Lehrende und Studierende, die sich für Fragen des Internationalen Managements interessieren als auch an Geschäftsführende von kleinen und mittleren Beratungsunternehmen, die vor den Herausforderungen der Internationalisierung stehen und diese mittels Vernetzung angehen möchten.

**Large Firms and Institutional Change** Bob Hancké, 2002 Between 1980 and 1985, the French economy and industry faced a dramatic crisis; in the ten years that followed, it witnessed a remarkable revival. How did the French economy make this transition? While the state is still an important economic agent in France, and the market certainly has become more central in the organization of the French economy, both state- and market-centered perspectives fail to understand critical elements of this adjustment. Building on the new Varieties of Capitalism approach in political economy which puts firms at the center of the analysis, this book argues that the post-war, state-led system changed into a system organized by and around the large firms. Large firms have always been central in the French post-war economic development model. In the past, however, they adapted to patterns set by the central state. By exploiting the possibilities in government policies in different areas such as finance, labour relations, and regional policies, the large firms were able to induce their main interlocutors - the state, banks, labour unions, workers, and small firms - to adjust in a way which was congruent with their own interests. From subservient economic agents, they became the drivers of economic adjustment. Through this case study of readjustment in France, this book offers a subtle critique of neo-institutionalist perspectives on firms. Institutional frameworks do not simply offer scenarios for adjustment, but are themselves constructions of economic and political actors and therefore subject to change and reorganization. By analysing how large firms in France, arguably one of the least likely places to harbour such endogenous capacities, changed their institutional environment to fit their own needs, this book offers an important new perspective on the political economy of industrial and economic change.

**Gender, Education and Employment** Hans-Peter Blossfeld, Jan Skopek, Moris Triventi, Sandra Buchholz, 2015-10-30 For much of the twentieth century, women lagged considerably behind men in their educational attainment. However, in recent decades, young women have become an important source of human capital for labor markets in modern societies, as well as potential competitors to the male workforce. This book asks whether or not women have been able to convert their educational success into gains on the labor market. The expert contributors address the topic on a comparative level with discussions centred on gendered school-to-work transitions and gendered labor market outcomes. Thereafter they analyze the country-specific implications of the gender redress from a wide range of countries including the USA, Russia and Australia. This enlightening book will appeal to graduates and postgraduates studying social policy, education, the labor

market, inequality and gender. It will also be of interest to experts in the fields of sociology, education, political science and economics and those interested in educational research.

**Families, Ageing and Social Policy** Chiara Saraceno, 2008-01-01 Offers insights into the way in which social policies and welfare state arrangements interact with family and gender models. This title presents the research in the field, based on a variety of national and comparative sources and using different theoretical and methodological approaches.

*Social Partnership at Work* Carola M. Frege, 2017-06-14 This book, originally published in 1999, provided the first comparative, in-depth analysis of workplace relations in east and west Germany. The collapse of communism and the ensuing process of reform means that East Germany provides a particularly interesting case, having experienced rapid and radical political and economic transformation, and representing an historically outstanding experiment of the shifting of an entire social system onto a different society. This book examines the success of the institutional transfer of west German labour organisations into east Germany workplaces and addresses central questions such as : Can capitalist labour institutions be imposed on a former communist workforce? What conditions determine the success or failure of these institutions? Can 'social partnership/ between capital and labour be learned?

**Urban Transformations** Sigrun Kabisch, Florian Koch, Erik Gawel, Annegret Haase, Sonja Knapp, Kerstin Krellenberg, Jaime Nivala, Andreas Zehnsdorf, 2018-01-08 The book addresses urban transformations towards sustainability in light of challenges of global urbanization processes and the consequences of global environmental change. The aim is to show that urban transformations only succeed if both innovative scientific solutions and practice-oriented governance approaches are developed. This assumption is addressed by providing theoretical insights and empirical evidence pointing particularly at 3 concepts or qualities which are determined here as being central for achieving urban sustainability: resource efficiency, quality of life and resilience. Urban case studies from several international research projects illustrate our conceptual approach of urban transformations towards sustainable development. Thus, the book reaches far beyond a mere additive description of single case studies. It incorporates the results of condensed synthesis, resulting from comparisons and evaluations. It provides, based on cross-cutting reflection of single cases and different scales and methods of analysis, general and transferable findings. They do not only consider the scientific sphere but deliberately go beyond it discussing transferability of knowledge into practice, governance options and the feasibility of policy strategies in order to pave the way for sustainable urban transformations to happen today and in the future.

*Beyond Varieties of Capitalism* Bob Hancké, Martin Rhodes, Mark Thatcher, 2007-05-17 Since the early 1990s, Europe's economies have been facing several new challenges: the single market programme, the collapse of the Berlin wall and eastward enlargement, and monetary unification. Building on the influential Varieties of Capitalism (VoC) perspective, first elaborated in detail in the book Varieties of Capitalism (OUP, 2001), this book critically analyzes these developments in the

European political economy and their effects on the continental European economies. Leading political economists from Europe and the US debate how VoC can help understand the political-economic challenges that Europe is facing today and how understanding these new challenges can in turn enrich and enhance the VoC perspective. Thematically, the contributions to this volume are organised in four sections: \* how the macro-economics of EMU have influenced different European models of capitalism, \* how the Single Market programme was received in the different institutional regimes in European capitalism, \* how welfare and labour market reforms are debated and implemented, \* how European capitalism travelled east after 1989. Preceding this is a spirited defence of the VoC approach by Peter Hall, and an introduction from the volume editors, considering the approach, and proposing extensions and amendments. This book demonstrates that the VoC approach remains, as the editors put it in their introduction, a rich seam to mine, capable of accommodating new developments, and theoretically flexible enough to produce new and innovative hypotheses and arguments.

**Jobs for Immigrants (Vol. 2) Labour Market Integration in Belgium, France, the Netherlands and Portugal**

OECD,2008-11-03 This publication reviews the labour market integration of immigrants and their children in four OECD countries -- Belgium, France, The Netherlands and Portugal -- and provides country-specific recommendations.

Monetary Theory and Monetary Policy S. Frowen,1993-11-09 These new essays cover aspects of monetary theory as well as monetary policy, the prime objective being the development of intellectual tools in order to find new ways of thinking to existing and new monetary problems in an increasingly unstable world economy marked by rapid and often unexpected changes, partly caused by the disappearance of boundaries for financial transactions. By challenging the orthodox paradigms in monetary economics and generating controversy, the volume will be an essential reference point for economists, central and commercial bankers, businessmen and politicians.

**Partisan Dealignment and the Blue-Collar Electorate in France** Sally Marthaler,2020-01-02 This book explores partisan dealignment in France between 1978 and 2012, with a particular focus on the blue-collar electorate and its relationship with the political parties of the established left (the Socialist Party, or Parti socialiste, and the Communist Party, or Parti communiste français). It highlights the distinctiveness of blue-collar partisanship in a context of significant political, social and economic change and compares it with patterns of partisanship in the wider electorate. The voter-party relationship is self-evidently a bilateral one which can be modified both on the demand side, because voters change, and on the supply side, because parties change. Four factors are identified as playing a key role in partisan dealignment: value change, policy convergence, political sophistication and political trust. There is compelling evidence that while each of these makes a contribution, it is changes in the behaviour of the parties that are driving partisan dealignment among blue-collar workers in France.

**Modernisation of Science Policy and Management Approaches in Central and South East Europe** Edvard Kobal, Slavo Radošević, 2005

Continuity and Change in Contemporary Capitalism Herbert Kitschelt, 1999-01-13 In the early 1980s, many observers, argued that powerful organized economic interests and social democratic parties created successful mixed economies promoting economic growth, full employment, and a modicum of social equality. The present book assembles scholars with formidable expertise in the study of advanced capitalist politics and political economy to reexamine this account from the vantage point of the second half of the 1990s. The authors find that the conventional wisdom no longer adequately reflects the political and economic realities. Advanced democracies have responded in path-dependent fashion to such novel challenges as technological change, intensifying international competition, new social conflict, and the erosion of established patterns of political mobilization. The book rejects, however, the currently widespread expectation that 'internationalization' makes all democracies converge on similar political and economic institutions and power relations. Diversity among capitalist democracies persists, though in a different fashion than in the 'Golden Age' of rapid economic growth after World War II.

State and Local Government Reforms in France and Germany Vincent Hoffmann-Martinot, Hellmut Wollmann, 2007-12-22 The edited book aims at comparatively analysing the development and current situation of state and local government reforms in France and Germany. The articles address State and administrative traditions, intergovernmental relations, decentralisation, administrative modernisation, public finances, public sector personnel, local democracy, local (mayoral) leadership and decentral/local social policy.
