The Chinese Question: The Gold Rushes, Chinese Migration, and Global Politics Mae Ngai, 2021-08-24 Winner of the 2022 Bancroft Prize Shortlisted for the 2022 Cundill History Prize Finalist for the 2022 Los Angeles Times Book Prize How Chinese migration to the world's goldfields upended global power and economics and forged modern conceptions of race. In roughly five decades, between 1848 and 1899, more gold was removed from the earth than had been mined in the 3,000 preceding years, bringing untold wealth to individuals and nations. But friction between Chinese and white settlers on the goldfields of California, Australia, and South Africa catalyzed a global battle over "the Chinese Question": would the United States and the British Empire outlaw Chinese immigration? This distinguished history of the Chinese diaspora and global capitalism chronicles how a feverish alchemy of race and money brought Chinese people to the West and reshaped the nineteenth-century world. Drawing on ten years of research across five continents, prize-winning historian Mae Ngai narrates the story of the thousands of Chinese who left their homeland in pursuit of gold, and how they formed communities and organizations to help navigate their perilous new world. Out of their encounters with whites, and the emigrants' assertion of autonomy and humanity, arose the pernicious western myth of the "coolie" laborer, a racist stereotype used to drive anti-Chinese sentiment. By the turn of the twentieth century, the United States and the British Empire had answered "the Chinese Question" with laws that excluded Chinese people from immigration and citizenship. Ngai explains how this happened and argues that Chinese exclusion was not extraneous to the emergent global economy but an integral part of it. The Chinese Question masterfully links important themes in world history and economics, from Europe's subjugation of China to the rise of the international gold standard and the invention of racist, anti-Chinese stereotypes that persist to this day.

Chinese Market Gardening in Australia and New Zealand Joanna Boileau, 2017-07-27 This book offers a fresh perspective on the Chinese diaspora. It is about the mobilisation of knowledge across time and space, exploring the history of Chinese market gardening in Australia and New Zealand. It enlarges our understanding of processes of technological change and human mobility, highlighting the mobility of migrants as an essential element in the mobility and adaptation of technologies. Truly multidisciplinary, Chinese Market Gardening in Australia and New Zealand incorporates elements of economic, agricultural, social, cultural and environmental history, along with archaeology, to document how Chinese market gardeners from subtropical southern China adapted their horticultural techniques and technologies to novel environments

and the demands of European consumers. It shows that they made a significant contribution to the economies of Australia and New Zealand, developing flexible strategies to cope with the vagaries of climate and changing business and social environments which were often hostile towards Asian immigrants. Chinese Market Gardening in Australia and New Zealand will appeal to students and scholars in the fields of the Chinese diaspora, in particular the history of the Chinese in Australasia; the history of technology; horticultural and garden history; and environmental history, as well as Asian studies more generally.

Archaeology of the Chinese Fishing Industry in Colonial Victoria Alister M. The Australian People James Jupp, 2001-10 Australia is one of the most ethnically diverse societies in the world today. From its ancient indigenous origins to British colonisation followed by waves of European then international migration in the twentieth century, the island continent is home to people from all over the globe. Each new wave of settlers has had a profound impact on Australian society and culture. *The Australian People* documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people. It is one of the largest reference works of its kind, with approximately 250 expert contributors and almost one million words. Illustrated in colour and black and white, the book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation.

Mining the Landscape Geraldine Mate, 2022-09-12 Mining was one of the primary elements of colonial enterprise in Australia and a factor in movement on colonial frontiers. In the second half of the 19th and early 20th century, mining—particularly of gold—saw transformations of the land itself, as well as in the way that people working in mining engaged with the landscape around them. Landscape archaeology provides a theoretical perspective that allows an articulation of how people created and understood the place in which they lived and worked. The impact of and narrative surrounding gold mining has meant that it has long been a focus of study, both historical and archaeological. The archaeology of mining has traditionally fallen under the umbrella of industrial archaeology, with analyses based on historical, economic and technological evidence. However this is changing. From an industrial focus, examining the remnants of mines and associated processing equipment, archaeology has progressed towards understandings of the social aspects of mining, recognising that people, not just equipment, occupied these landscapes. Nevertheless, there remains a separation between industrial/technology-based studies and purely social/ household-based archaeological studies—a division that overlooks the integration of home and livelihood. This work addresses these very challenges, using a landscape-based approach that articulates a nuanced, meaning-laden and experienced mining landscape. Integrating the social and the industrial, the case

study of Mount Shamrock, a gold-mining town in Queensland, Australia, demonstrates how this methodology can enhance our understanding of the past. The work presents an integration of social and industrial perspectives in a mining settlement, and provides an exemplar in the application of landscape theory to Australian historical archaeology. These concepts and approaches, developed in an Australian context, are of universal interest.

Hungry Ghosts Sally Heinrich, 2012-08-01 Sarah hadn't wanted to come to Australia. She's been perfectly happy with things how they were in Singapore where school was for learning, and 'being cool' was a non-issue. Now Dad was trying his best to make her into a 'fair dinkum' Aussie while Mum was determined to hang on to all the old Asian traditions. During the Festival of the Hungry Ghosts Sarah meets the ghost of Pei, a Chinese girl who was not much older than Sarah when she died. As the story unfolds, it becomes apparent that the girls share a common ancestry. Initially reluctant, Sarah helps Pei to discover the truth about events surrounding her death and the lover she believed had betrayed her. Set in contemporary Singapore and Australia, and nineteenth-century China and Australia, this sprawling tale by Sally Heinrich touches on issues of Chinese immigration to Australia from the 1800s to the present.

Chinese Australians Sophie Couchman, Kate Bagnall, 2015-01-27 In *Chinese Australians: Politics, Engagement and Resistance* key scholars explore how Chinese Australians in the nineteenth and twentieth centuries influenced the communities in which they lived on a civic or individual level. With a focus on the motivations and aspirations of their subjects, the authors draw on biography, world history, case law, newspapers and immigration case files to investigate the political worlds of Chinese Australians. The book also introduces current literature and thinking about the history of the Chinese in Australia and includes a postscript that reflects on the importance of historical analysis to current day political science.

The Oxford Handbook of Australian Politics Jenny M. Lewis, Anne Tiernan, 2021-10-20 The Oxford Handbook of Australian Politics is a comprehensive collection that considers Australia's distinctive politics-- both ancient and modern-- at all levels and across many themes. It examines the factors that make Australian politics unique and interesting, while firmly placing these in the context of the nation's Indigenous and imported heritage and global engagement. The book presents an account of Australian politics that recognizes and celebrates its inherent diversity by taking a thematic approach in six parts. The first theme addresses Australia's unique inheritances, examining the development of its political culture in relation to the arrival of British colonists and their conflicts with First Nations peoples, as well as the resulting geopolitics. The second theme, improvisation, focuses on Australia's political institutions and how they have evolved. Place-making is then considered to assess how geography, distance, Indigenous presence, and migration shape Australian politics. Recurrent dilemmas centres on a range of complex, political problems and their influence on contemporary political practice. Politics, policy, and public administration covers how Australia has been a world leader in some respects, and a laggard in others, when dealing with important policy challenges. The final theme, studying Australian politics, introduces some key areas in the study of Australian politics and identifies the strengths and shortcomings of the discipline. The Oxford Handbook of Australian Politics is an opportunity for others to consider the nation's unique politics from the perspective of leading and emerging scholars, and to gain a strong sense of its imperfections, its enduring challenges, and its strengths.

Australians in Shanghai Sophie Loy-Wilson, 2017-02-24 In the first half of the twentieth century, a diverse community of Australians settled in Shanghai. There they forged a 'China trade', circulating goods, people and ideas across the South China Sea, from Shanghai and Hong Kong to Sydney and Melbourne. This trade has been largely forgotten in contemporary Australia, where future economic ties trump historical memory when it comes to popular perceptions of China. After the First World War, Australians turned to Chinese treaty ports, fleeing poverty and unemployment, while others sought to 'save' China through missionary work and socialist ideas. Chinese Australians, disillusioned by Australian racism under the White Australia Policy, arrived to participate in Chinese nation building and ended up forging business empires which survive to this day. This book follows the life trajectories of these Australians, providing a means by which we can address one of the pervading tensions of race, empire and nation in the twentieth century: the relationship between working-class aspirations for social mobility and the exclusionary and discriminatory practices of white settler societies.

Gold Dig History Amelia Khatri, 2024-11-17 Gold Dig History presents a fascinating exploration of how gold has fundamentally shaped human civilization, from ancient times to the modern era. The book masterfully weaves together three interconnected narratives: the geological science behind gold formation, the sociological impact of major gold rushes, and the metal's enduring influence on global economic systems. Through careful examination of significant events like the California Gold Rush of 1848 and the Klondike Gold Rush of 1896, readers discover how these pivotal moments catalyzed massive social changes and infrastructure development that extended far beyond the initial quest for wealth. The narrative uniquely combines scientific rigor with compelling storytelling, making complex concepts accessible through practical examples and real-world applications. Drawing from an impressive array of primary sources, including prospectors' journals and government records, the book reveals how gold rushes transformed landscapes and communities across six continents. Particularly noteworthy is its treatment of placer mining and hydraulic mining techniques, demonstrating how technological advancement in gold extraction paralleled societal development. What sets this work apart is its interdisciplinary approach, bridging the gaps between geology, economics, and anthropology. The book progresses chronologically through major gold rushes while maintaining thematic connections to modern challenges in resource management and financial systems. This comprehensive examination serves both academic and general audiences, offering valuable insights into how this precious metal continues to influence contemporary society, from investment practices to industrial applications.

Britain, China, and Colonial Australia Benjamin Mountford, 2016 Reaching back to the arrival of the British in the 1780s, Britain, China, and Colonial Australia explores the early history of Australian engagement with China and traces the development of colonial Australia into an important point of contact between the British and Chinese Empires.

Made in Chinatown Peter Charles Gibson, 2022-04-01 Made in Chinatown delves into a little-known aspect of Australia's past: its hundreds of Chinese furniture factories. These businesses thrived in the post-goldrush era, becoming an important economic activity for Chinese immigrants and their descendants and a vital part of Australia's furniture industry. Yet, owing to an exclusionary vision for Australia as a bastion of 'white' industry and labour, these factories were targeted by anti-Chinese political campaigns and legislative restrictions. Guided by Chinese manufacturers' and workers' own reflections and records, this book examines how these factories operated under the exclusionary vision of White Australia. Historian Peter Gibson uses previously untapped archival sources to investigate the local and international factors that boosted the industry,

and the business and labour practices associated with factory operation. He explores the strategies employed in efforts to resist injustice, and the place of Chinese furniture factories within the contexts of Australian enterprise, work and consumerism more broadly. *Made in Chinatown* argues that Chinese Australian furniture manufacturers and their employees were far more adaptable, and the White Australia vision less pervasive, than most histories would suggest.

The A to Z of Australia James C. Docherty, 2010 The last continent to be claimed by Europeans, Australia began to be settled by the British in 1788 in the form of a jail for its convicts. While British culture has had the largest influence on the country and its presence can be seen everywhere, the British were not Australia's original populace. The first inhabitants of Australia, the Aborigines, are believed to have migrated from Southeast Asia into northern Australia as early as 60,000 years ago. This distinctive blend of vastly different cultures contributed to the ease with which Australia has become one of the world's most successful immigrant nations. *The A to Z of Australia* relates the history of this unique and beautiful land, which is home to an amazing range of flora and fauna, a climate that ranges from tropical forests to arid deserts, and the largest single collection of coral reefs and islands in the world. Through a detailed chronology, an introduction, appendixes, a bibliography, and cross-referenced dictionary entries on some of the more significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets, author James Docherty provides a much needed single volume reference on Australia, from its most unpromising of beginnings as a British jail to the liberal, tolerant, democracy it is today.es on some of the more significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets, author James Docherty provides a much needed single volume reference on Australia,

Returning Home with Glory Michael Williams, 2018-01-16 Employing the classic Chinese saying “returning home with glory” (man zai rong gui) as the title, Michael Williams highlights the importance of return and home in the history of the connections established and maintained between villagers in the Pearl River Delta and various Pacific ports from the time of the Californian and Australian gold rushes to the founding of the People’s Republic of China. Conventional scholarship on Chinese migration tends to privilege nation-state factors or concepts which are dependent on national boundaries. Such approaches are more concerned with the migrants’ settlement in the destination country, downplaying the awkward fact that the majority of the overseas Chinese (huaqiao) originally intended to (and eventually did) return to their home villages (qiaoxiang). Williams goes back to the basics by considering the strong influence exerted by the family and the home village on those who first set out in order to give a better appreciation of how and why many modest communities in southern China became more modern and affluent. He also gives a voice to those who never left their villages (women in particular). Designed as a single case study, this work presents detailed research based on the more than eighty villages of the Long Du district (near Zhongshan City in Guangdong Province), as well as the three major destinations—Sydney, San Francisco, and Honolulu—of the huaqiao who came from this region. Out of this analysis of what truly mattered to the villagers, the choices they had and made, and what constituted success and failure in their lives, a sympathetic portrayal of the huaqiao emerges. Returning Home with Glory inaugurates the Hong Kong University Press book series “Crossing Seas”. “From the very local qiaoxiang or home village of migrants to the transnational destinations in America and Australia, this book is a model of how to write ‘diaspora’ into modern Chinese history. The Cantonese Pacific comes alive in this highly readable book that is sure to capture our imagination.” —Evelyn Hu-DeHart, Brown University “A perceptively conceptualized and well-researched case study of an emigrant community in the Pearl River Delta that extended its reach to Sydney, the Hawaiian Islands, and San Francisco. Williams offers a refreshing qiaoxiang perspective through which to understand the experiences of Chinese immigrants in the late nineteenth and early twentieth centuries.” —Yong Chen, University of California, Irvine “This welcome study of Chinese mobility among settler societies of the Pacific places the family and the village at its heart, just as its subjects did over the century under review, to 1949. A path-breaking study based on first-hand research.” —John Fitzgerald, Swinburne University of Technology
