**Palo Alto** Malcolm Harris, 2023-02-14 Named One of the Year's Best Books by VULTURE • THE NEW REPUBLIC • DAZED • WIRED • BLOOMBERG • ESQUIRE • SALON • THE NEXT BIG IDEA CLUB The history of Silicon Valley, from railroads to microchips, is an “extraordinary” story of disruption and destruction, told for the first time in this comprehensive, jaw-dropping narrative (Greg Grandin, Pulitzer Prize-winning author of *The End of the Myth*). Palo Alto’s weather is temperate, its people are educated and enterprising, its corporations are spiritually and materially ambitious and demonstrably world-changing. Palo Alto is also a haunted toxic waste dump built on stolen Indian burial grounds, and an integral part of the capitalist world system. In *PALO ALTO*, the first comprehensive, global history of Silicon Valley, Malcolm Harris examines how and why Northern California evolved in the particular, consequential way it did, tracing the ideologies, technologies, and policies that have been engineered there over the course of 150 years of Anglo settler colonialism, from IQ tests to the tragedy of the commons, racial genetics, and broken windows theory. The Internet and computers, too. It’s a story about how a small American suburb became a powerful engine for economic growth and war, and how it came to lead the world into a surprisingly disastrous 21st century. *PALO ALTO* is an urgent and visionary history of the way we live now, one that ends with a clear-eyed, radical proposition for how we might begin to change course.

**University Keywords** Andy Hines, 2025-09-09 This book analyzes 27 key terms central to American higher education, focusing on their historical, structural, and functional roles while examining shifts in academic priorities influenced by policy, activism, and institutional practices--

**Hellworld: The Human Species and the Planetary Factory** Phil Neel, 2025-07-24 *Hellworld* examines the megastructures of global capitalism, asking how revolutionary subjectivity might emerge within and against capital’s domesticating force. Central to this inquiry is the planetary factory: the global value chains connecting disparate industrial territories, the rise of China, the fragmentation of global trade, and, above all, the simultaneous deagrarianisation and deindustrialisation of labor. These structural shifts are linked to subjective forces, exploring how social divisions shape resistance. Through an analysis of uprisings in Hong Kong, Thailand, Sudan, and beyond, *Hellworld* considers whether this

system—inescapable as it seems—can, perhaps, be destroyed.

**The Problem with Solutions** Julie Guthman, 2024-08-06 A concise and feisty takedown of the all-style, no-substance tech ventures that fail to solve our food crises. Why has Silicon Valley become the model for addressing today's myriad social and ecological crises? With this book, Julie Guthman digs into the impoverished solutions for food and agriculture currently emerging from Silicon Valley, urging us to stop trying to fix our broken food system through finite capitalistic solutions and technological moonshots that do next to nothing to actualize a more just and sustainable system. *The Problem with Solutions* combines an analysis of the rise of tech company solution culture with findings from actual research on the sector's ill-informed attempts to address the problems of food and agriculture. As this seductive approach continues to infiltrate universities and academia, Guthman challenges us to reject apolitical and self-gratifying techno-solutions and develop the capacity and willingness to respond to the root causes of these crises. Solutions, she argues, are a product of our current condition, not an answer to it.

**Owned** Eoin Higgins, 2025-02-04 A cabal of tech-billionaires is colluding with once-idealistic journalists to create an entirely new media landscape. *Owned* is the story of the underreported and growing collusion between new wealth and new journalism. In recent years, right-wing billionaires like Elon Musk, Peter Thiel, Marc Andreessen, and David Sacks have turned to media as their next investment and source of influence. Their cronies are Glenn Greenwald and Matt Taibbi—once known as idealistic and left-leaning voices, now beneficiaries of Silicon Valley largesse. Together, this new alliance aims to exploit the failings of traditional journalism and undermine the very idea of an independent and fact-based fourth estate. *Owned* examines how this shift has allowed spectacularly wealthy reactionaries to pursue their ultimate goal of censoring critics so to further their own business interests—and personal vendettas—entirely unimpeded while also advancing a toxic and antidemocratic ideology. A rich history of the decades-long rise of this new right-wing alternative media takeover, *Owned* follows the money, names names, and offers a chilling portrait of a future social media and news landscape. It is a biting exposé of journalistic greed, tech-billionaire ambition, and a lament for a disappearing free press.

**Humans** Ted Farmer, 2024-08-28 Written by a Stanford- and Harvard-trained historian, *Humans: The Story of Our Past, The Challenge to Our Future* reveals that historical change has been accelerating from one period of human existence to the next, suggesting that we must move beyond organizing at the nation-state level to adopt a global, species-wide perspective. Ted Farmer, who taught history at the University of Minnesota, organized the Center for Early Modern History and a Center for Global Studies, and initiated a comparative world history course sequence and an interdisciplinary global studies major, has spent decades studying how what we were has had a direct impact on who we are. Rejecting a Western or Eurocentric lens on history, in *Humans*, he identifies six distinct periods of human connection, from vast geographic, cultural, and racial separation to great social, economic, and cultural convergence. Uniquely, *Humans* shows how, at each stage in history,

humans created new modes of understanding, such as mythology, theology, and science, that now coexist in our present and complicate our effort to make sense of reality. Accessible to the curious casual reader yet meaty enough for college-level history instructors, *Humans* will help readers make sense of our situation: that we are faced with a looming global disaster unless we act in concert.

*Golden States* Eileen Luhr, 2024-09-03 Whether they were utopian communarians, sun-seeking gurus, or Protestant health reformers, Southern California's spiritual seekers drew on the United States' deepening global encounters and consumer cultures to pair religious and personal reinvention with cultural and spiritual revitalization. Through a rereading of the region's cultural landscape, *Golden States* provides an alternative history of California religion and spirituality, showing that seekers developed a number of paths to fulfillment that enhanced the region's lifestyle brand. Drawing on case studies as varied as surfing and yoga practices, Dr. Bronner's Magic Soaps, and the only designated Blue Zone in the United States, this work explores the long-term impact of alternative beliefs on the region. In doing so, it highlights the ongoing tensions between privileging personal choice and pursuing social good as communities navigated whether the commitment to the emotional and therapeutic needs and desires of individual believers should be pursued at the expense of broader efforts to achieve collective well-being.

*The Ordinal Society* Marion Fourcade, Kieran Healy, 2024-04-16 Organizations now measure and rank nearly every aspect of our lives, using data to make predictions about our purchasing power, tastes, and character. *The Ordinal Society* shows how these predictions structure life chances, producing a hollow morality that launders familiar forms of social advantage into an illusion of merit.

*Research and Innovation Forum 2024* Anna Visvizi, Orlando Troisi, Vincenzo Corvello, Mara Grimaldi, 2025-07-26 This book

features research presented and discussed during the Research & Innovation Forum (Rii Forum) 2024. As such, this book offers a unique insight into emerging topics, issues and developments pertinent to the fields of technology, innovation and education and their social impact. Papers included in this book apply inter- and multi-disciplinary approaches to query such issues as technology-enhanced teaching and learning, smart cities, information systems, cognitive computing and social networking. What brings these threads of the discussion together is the question of how advances in computer science—which are otherwise largely incomprehensible to researchers from other fields—can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders, including academics, the think tank sector and decision-makers, can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science.

**Cybernetic Circulation Complex** Nick Dyer-Witheford, Alessandra Mularoni, 2025-02-11 An anti-capitalist guide to breaking the power of Big Tech Big Tech firms dominate the global economy. But what value do they actually produce? In this brilliant survey of global tech economy, Nick Dyer-Witheford and Alessandra Mularoni argue that the role of firms like Amazon and Google, Palantir and Uber, is in the automation of circulation. By applying digital technologies to processes of market exchange—everything from advertising and shopping, to logistics and financial services—Big Tech aims to subject these activities to the level of control and predictability that capital has secured in industrial production. But there is a way out of the multiple crises that Big Tech has helped precipitate. If we are to break their grip on the global economy then it'll take more than just antitrust legislation or reducing individual time online. By understanding the central role Big Tech plays in contemporary capitalism, Dyer-Witheford and Mularoni argue that what is required instead is a new, ambitious and comprehensive program of democratic collective planning that can move us beyond capitalism. *Cybernetic Circulation Complex* offers not only a compelling analysis of the power of Big Tech and their role in our current global crises, but a roadmap for a new form of life: biocommunism, a digital degrowth that can help us steer between the double boundaries of ecological sustainability and equitable social development.

**Homeland** Richard Beck, 2025-03-11 For twenty years after September 11, the war on terror was simultaneously everywhere and nowhere. With all of the military violence occurring overseas, Americans found themselves living in two worlds at the same time. In one of them, soldiers fought abroad so that nothing at home would have to change at all. In the other, life in the United States took on all kinds of unfamiliar shapes, altering people's sense of themselves, their neighbours, and the strangers they sat next to on aeroplanes. In a fascinating and exhaustive account of the meaning of twenty-first-century America, Richard Beck delivers a gripping exploration of the transformation of American life wrought by the war. He describes sports stadiums fortified to look like military bases. The surging sales of guns, SUVs, and pickup trucks. The racism and xeno-phobia, the erosion of free speech, and the normalisation of mass surveillance. Beck searchingly asks why those

Americans who excused the worst abuses of the war on terror also had the easiest time understanding themselves as patriots. The war fuelled an impunity culture, he argues, that came to a head with Trump's rise to power. To see America through the lens of Homeland is to understand the country like never before.

**Tripping on Utopia** Benjamin Breen, 2024-01-16 A Los Angeles Times Bestseller One of The New Yorker's best books of 2024 A bold and brilliant revisionist take on the history of psychedelics in the twentieth century, illuminating how a culture of experimental drugs shaped the Cold War and the birth of Silicon Valley. It was not the Baby Boomers who ushered in the first era of widespread drug experimentation. It was their parents. Far from the repressed traditionalists they are often painted as, the generation that survived the second World War emerged with a profoundly ambitious sense of social experimentation. In the '40s and '50s, transformative drugs rapidly entered mainstream culture, where they were not only legal, but openly celebrated. American physician John C. Lilly infamously dosed dolphins (and himself) with LSD in a NASA-funded effort to teach dolphins to talk. A tripping Cary Grant mumbled into a Dictaphone about Hegel as astronaut John Glenn returned to Earth. At the center of this revolution were the pioneering anthropologists—and star-crossed lovers—Margaret Mead and Gregory Bateson. Convinced the world was headed toward certain disaster, Mead and Bateson made it their life's mission to reshape humanity through a new science of consciousness expansion, but soon found themselves at odds with the government bodies who funded their work, whose intentions were less than pure. Mead and Bateson's partnership unlocks an untold chapter in the history of the twentieth century, linking drug researchers with CIA agents, outsider sexologists, and the founders of the Information Age. As we follow Mead and Bateson's fractured love affair from the malarial jungles of New Guinea to the temples of Bali, from the espionage of WWII to the scientific revolutions of the Cold War, a new origin story for psychedelic science emerges.

The Handbook of Digital Labor Jack Linchuan Qiu, Shinjoung Yeo, Richard Maxwell, 2025-04-29 Provides a global perspective on labor and technology, exploring resistance, solidarity, and alternatives in digital capitalism The Handbook of Digital Labor critically examines how digital technologies are reshaping work and employment around the globe. Bridging historical and contemporary perspectives, this timely volume explores the dynamics of labor within digital capitalism using a critical framework that illuminates the systemic challenges faced by workers across diverse sectors. Dozens of contributing authors address key challenges including surveillance, inequality, and environmental exploitation, while highlighting innovative forms of resistance and organizing. Organized into four sections???Working-Class Resistance, Digital Capitalism and Alternatives, Laboring under Digital Capitalism, and Theorizing Digital Labor???the Handbook offers a nuanced understanding of how workers navigate the intersection of technological advancement and capitalist development. In-depth chapters cover topics ranging from platform work to AI-driven labor processes???shedding light on the realities of digital labor. Equipping readers with the tools to critically engage with labor struggles across diverse industries and geographies,

the Handbook of Digital Labor: Offers interdisciplinary insights from leading scholars in media, communication, labor studies, political economy, as well as unionists, activists, and other on-the-ground practitioners Presents both historical and contemporary analyses of labor conditions under digital capitalism Advocates for actionable strategies to empower labor movements and build equitable and sustainable alternatives Features real-world case studies of worker resistance and solidarity across platforms and industries Emphasizing both theory and praxis, the Handbook of Digital Labor is ideal for advanced undergraduate and graduate students, junior faculty, and researchers in media studies, labor sociology, and public policy. It is a vital resource for courses on digital labor, political economy, and social change within communications and technology programs. Labor organizers, policymakers, and industry professionals will find it an indispensable guide to navigating the complexities of work in the digital age.

**Screening Big Data** Gerald Sim, 2024-07-30 This book examines the influence of key films on public understanding of big data and the algorithmic systems that structure our digitally mediated lives. From star-powered blockbusters to civic-minded documentaries positioned to facilitate weighty debates about artificial intelligence, these texts frame our discourse and mediate our relationship to technology. Above all, they impact society's abilities to regulate AI and navigate big tech's political and economic maneuvers to achieve market dominance and regulatory capture. Foregrounding data politics with close readings of key films like *Moneyball*, *Minority Report*, *The Social Dilemma*, and *Coded Bias*, Gerald Sim reveals compelling ways in which films and tech industry-adjacent media define apprehension of AI. With the mid-2010s techlash in danger of fizzling out, *Screening Big Data* explores the relationship between this resistance and cultural infrastructure while highlighting the urgent need to refocus attention onto how technocentric media occupy the public imagination. This book will interest students and scholars of film and media studies, digital culture, critical data studies, and technopolitics.

Intergenerational Democracy, Environmental Justice and the Case of Nuclear Waste Lee Towers, Matthew Cotton, 2024-10-07 This book explores the interplay between intergenerational justice and intragenerational justice using nuclear waste management as a consistent case to explore these themes. Lee Towers and Matthew Cotton examine the issue of intergenerational justice from a social scientific perspective, drawing on central case studies of nuclear waste management in Canada, Finland, and the United Kingdom. They connect indigenous philosophies and notions of justice with the concept of intergenerational democracy, advocating for better inclusion of youth and elders in decision-making that affects their well-being. As such, the book's primary objectives are fourfold: To assess whether trade-offs between intergenerational and intragenerational justice are necessary, and if so, what these trade-offs are and how they might be resolved. To critically assess dominant western liberal philosophical approaches that shape contemporary intergenerational justice thinking in policy and practice, and consider alternatives drawn from anthropology and indigenous philosophies. To assess how far our current capitalist system can achieve substantive forms of justice. To critically examine three nuclear

waste management case studies and assess how far these achieve environmental and energy justice and how they exemplify tensions between inter- and intragenerational justice. This short, accessible volume will be of great interest to students and scholars of energy, environmental justice, and ethics.

**Silicon Valley Imperialism** Erin McElroy, 2024-02-02 Erin McElroy maps processes of gentrification, racial dispossession, and economic predation in the San Francisco Bay Area and postsocialist Romania to expose the mechanisms through which global techno-capitalism devours space and societies in order to expand its reach.

*The Cost of Being Undocumented* Alix Dick, Antero Garcia, 2025-06-17 An undocumented activist and a social scientist come together to tally of the structural costs of undocumented life An inhumane math pervades this country: even as our government extracts labor and often taxes from undocumented workers, it excludes these same workers from its social safety net. As a result, these essential workers struggle to get their own basic needs met, from healthcare to education, from freedom of association to the ability to drive to work without looking for ICE in the rearview mirror. When Alix Dick's family found themselves in the crosshairs of cartel violence in Sinaloa, Mexico, she and her siblings were forced to flee to the U.S. Many of the scenes that she shares are difficult and unforgettable: escaping from a relationship in which her partner threatened to report her to immigration; getting root canals done in an underground dental clinic. But there are moments of triumph, too: founding her own nonprofit; working on films that tell important stories; and working with her co-author Dr. Garcia to tell her story in a framework that lays bare the realities of structural oppression. As Alix and Antero tally the costs of undocumented life, they present a final bill of what is owed to the immigrant community. In this way, their book flips the traditional narrative about the economics of immigration on its head.

Bridging Social Inequality Gaps - Concepts, Theories, Methods, and Tools, 2024-09-18 Bridging Social Inequality Gaps - Concepts, Theories, Methods, and Tools focuses on contemporary discussions around multifaceted causes, explanations, and responses to social disparities. The contributors provide studies related to social and cultural dimensions of inequality, economic and technological dimensions of inequality, environmental dimensions of inequality, and political, ethical, and legal dimensions of inequality, as well as a variety of other perspectives on disparities. The volume also covers crucial issues and challenges for the global, national, regional, and local implementation of public policies to reduce inequalities, including innovative actions, projects, and programs focused on achieving the United Nations Sustainable Development Goals (SDGs). The collection includes chapters encompassing research and practical recommendations from various disciplines such as sociology, economics, management, political science, administrative science, development studies, public health, peace and conflict studies, cultural studies, educational studies, communication studies, and social work. This book is an asset to academic and expert communities interested in theories of social inequality as well as effective measurement tools, public services, and strategies. Moreover, the volume helps students, practitioners, and people working in government, business,

and nonprofit organizations to build more equitable social relationships.
