The Trojan War: Chronological, Historical and Archaeological Evidence Gerard Gertoux, 2015 The Trojan War is the foundation of Greek history. If Greek historians had little doubt of its existence they remained extremely sceptical regarding its mythological origin. Archaeology has confirmed one essential point: there was indeed a general conflagration in the Greek world around 1200 BCE, the assumed period of that war, which caused the disappearance of two powerful empires: Mycenaean on one hand and Hittite with its vassals on the other hand. The inscriptions of Ramses III's year 8 describe actually a general invasion of the Mediterranean by the Sea Peoples. A precise chronological reconstruction shows that there was a confrontation between a Greek heterogeneous confederation, consisting of pirates, and a set of vassal kingdoms of the Hittite empire, such as Troy and Ugarit, which ended with their complete mutual destruction in 1185 BCE, the climax of the Trojan War. This conclusion was already that of Eratosthenes.

Calendrical Calculations Edward M. Reingold, Nachum Dershowitz, 2018-04-05 An invaluable resource for working programmers, as well as a fount of useful algorithmic tools for computer scientists, astronomers, and other calendar enthusiasts, The Ultimate Edition updates and expands the previous edition to achieve more accurate results and present new calendar variants. The book now includes coverage of Unix dates, Italian time, the Akan, Icelandic, Saudi Arabian Umm al-Qura, and Babylonian calendars. There are also expanded treatments of the observational Islamic and Hebrew calendars and brief discussions of the Samaritan and Nepalese calendars. Several of the astronomical functions have been rewritten to produce more accurate results and to include calculations of moonrise and moonset. The authors frame the calendars of the world in a completely algorithmic form, allowing easy conversion among these calendars and the determination of secular and religious holidays. LISP code for all the algorithms is available in machine-readable form.

Encyclopedia of Easter Celebrations Worldwide William D. Crump, 2021-03-08 At Eastertime, the most important holiday in the Christian world, religious processions in many Latin American countries pass over ornate street carpets fashioned from colored sawdust, flowers and fruit. Children in Finland and Sweden dress as Easter witches. In the Caribbean, those who swim on Good Friday risk bad luck. In the Philippines, some penitents volunteer to be crucified. In some European countries, Easter Monday is the day for dousing women with water. With 240 entries, this book explores these and scores of other unusual and sometimes bizarre international Holy Week customs, both sacred and secular, from pilgrimages to Jerusalem to classic seasonal films and television specials.

Japanese Chronological Tables, Showing the Date, According to the Julian Or Gregorian Calendar, of the First Day of Each Japanese Month William Bramsen, 2016-09-19 Excerpt from Japanese Chronological Tables, Showing the Date, According to the Julian or Gregorian Calendar, of the First Day of Each Japanese Month: From Tai-Kwa 1st Year to Mei-Ji 6th Year (645 A. D. To 1873 A. D.) By this system the different years of each reign were designated by numbers, the series, commencing with 1, being continued until a new emperor ascended the throne. It was a rule, that when a change of emperor took place, the reign of the new monarch was counted as commencing with the new-year's day following his succession, while the whole of the year in which an emperor died or abdicated was considered as belonging to his reign. In the earliest Japanese historical works, the years are counted in accordance with this system, and if we calculate backwards by the reigns assigned to the monarchs Of Japan, we find, that the first emperor, Jimmie Tenno, should have founded the empire in the year 660 bc. It will, however, later on be Shown, that these records cannot be relied upon. About the Publisher Forgotten
