Dictionaries. An International Encyclopedia of Lexicography Rufus Gouws,Ulrich Heid,Wolfgang Schweickard,Herbert

Ernst Wiegand,2013-12-18 The basis for this additional volume are the three volumes of the handbooks Dictionaries. An International Encyclopedia of Lexicography (HSK 5.1-5.3), published between 1989 and 1991. An updating has been perceived as an important desideratum for a considerable time. In the present Supplementary Volume the premises and subjects of HSK 5.1-5.3 are complemented by new articles that take account of the practice-internal and theoretical developments of the last 15 years. Special attention has been given to the following topics: the status and function of lexicographic reference works, the history of lexicography, the theory of lexicography, lexicographic processes, lexicographic training and lexicographic institutions, new metalexicographic methods, electronic and, especially, computer-assisted lexicography.

The Semiotic Sphere Thomas A. Sebeok,Jean Umiker-Sebeok,2012-12-06 Although semiotics has, in one guise or another, flourished uninterruptedly since pre Socratic times in the West, and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions, semiotics as an organized undertaking began to bloom only in the 1960s. Workshops materialized, with a perhaps surprising spontaneity, over much of Europe-Eastern and Western

and in North America. Thereafter, others quickly surfaced almost everywhere over the literate globe. Different places strategically allied themselves with different legacies, but all had a common thrust: to aim at a general theory of signs, by way of a description of different sign systems, their comparative analysis, and their classification. More or less permanent confederations were forged with the most diverse academic disciplines, and amazingly varied frameworks were devised-suited to the needs of the times and the sites-to carry the work of consolidation forward. Bit by bit, mutually supportive international networks were put together. Today, it can truly be asserted that semiotics has become a global enterprise. This, of course, is far from saying that the map is uniform or even that world-wide homogeneity is in the least desirable. While our conjoint ultimate goal remains steadily in focus, the multiplicity of avenues available for its realization is inherent in the advent ure of the search itself.
