Cardiología Erick Alexánderson Rosas, 2022-07-19 Las enfermedades cardiovasculares son de gran prevalencia y constituyen una problemática importante en la salud pública en México. Por eso, es de suma importancia brindar recursos de gran calidad a los médicos en formación, tanto a los estudiantes, así como a los médicos residentes, y actualizar constantemente a aquellos ya formados. La intención de esta obra titulada Cardiología consta en ser un recurso didáctico que transmita a los lectores todo lo que su autor principal, el Dr. Erick Alexánderson Rosas ha aprendido en más de 40 años de formación y práctica profesional, de una manera innovadora (apoyándose con material complementario multimedia), pero a su vez, manteniéndose el enfoque tradicional y ameno para poder aprovechar la información lo más posible. Esta obra incluye los temas más importantes que engloban la Cardiología y resultan ser fundamentales para el acervo cultural de un médico general. Sin duda, este logro fue posible gracias la participación y colaboración de más de 40 autores de gran prestigio, tanto a nivel nacional como internacional, así como el apoyo entusiasta de múltiples residentes y estudiantes en formación. Espero esta obra les sea de provecho y la disfruten.

Resincronización cardíaca Josep Lluís Mont Girbau, Antonio Hernández Madrid,2024-02-14 La introducción de la terapia de resincronización cardíaca ha significado un salto cualitativo y cuantitativo importante en el tratamiento de los pacientes con insuficiencia cardíaca. Esta terapia es una nueva manera de tratar a dichos pacientes, potenciando la reserva contráctil miocárdica mediante coordinación de distintos segmentos que en situación basal se contraían de manera asincrónica. Esta obra, coordinada por el doctor Lluís Mont, Presidente del Grupo de Trabajo de Resincronización Cardíaca de la Sociedad Española de Cardiología (SEC), con la colaboración de otros miembros del citado grupo de trabajo, tiene como objetivo promover el conocimiento de esta terapia, cuya expansión a todos los posibles candidatos se produce de manera muy lenta, al menos en España. En las páginas de este libro, médicos implantadores, cardiólogos clínicos y ecocardiografistas, así como otros expertos en especialidades afines, hallarán las experiencias más recientes que permitirán una actualización de sus conocimientos y, por tanto, herramientas que benefician la calidad de la asistencia a los pacientes.

Enfermedad vascular periférica Guering Eid Lidt,2023-05-19 La medicina vascular es parte integral de la medicina interna y cardiovascular. Su incorporación dentro del arsenal cognitivo del cardiólogo clínico le permite combinar la cardiología clásica con la medicina vascular integrada al diagnóstico por imagen. Siempre debemos recordar que la presencia de enfermedad arterial periférica incrementa el riesgo de muerte cardiovascular y reduce significativamente la sobrevivencia a largo plazo. El conocimiento, el diagnóstico y el tratamiento de las diferentes entidades patológicas del sistema arterial no coronario permiten al cardiólogo clínico ejercer una terapéutica integral. El diagnóstico preciso del síndrome aórtico agudo, el estudio detallado del paciente con claudicación intermitente o el moderno tratamiento del paciente con tromboembolia pulmonar masiva son parte esencial del ejercicio clínico del cardiólogo con formación universal

y moderna. El libro Enfermedad vascular periférica está formado por cinco secciones que proporcionan de manera secuencial la información necesaria desde la relevancia epidemiológica hasta el diagnóstico y el tratamiento, de acuerdo con los segmentos vasculares afectados. Cada capítulo del libro analiza el tópico correspondiente desde la etiología, la fisiopatología y el diagnóstico clínico complementado con métodos de imagen y las alternativas de tratamiento. Como parte fundamental del libro se describen las diferentes técnicas de reparación endovascular, con un análisis equilibrado de los beneficios y riesgos, indicaciones y contraindicaciones. El último capítulo del libro emite un condensado de las recomendaciones realizadas por las diferentes asociaciones médicas en relación con los requisitos, habilidades técnicas y cognitivas necesarias para el entrenamiento en cardiología intervencionista y endovascular periférica. El editor y los colaboradores esperamos que este libro con enfoque multidisciplinario permita al médico internista, así como al cardiólogo clínico e intervencionista, ampliar su conocimiento de la enfermedad arterial periférica y su tratamiento.
