Constructing Gardens, Cultivating the City Amanda Shoaf Vincent,2023-05-16 Constructing Gardens, Cultivating the City is the first cultural history of major new parks developed in Paris in the late twentieth century, as part of the city's program of adaptive reuse of industrial spaces. Thanks to laws that gave the city more political autonomy, Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium. The parks in this book represent this campaign and illustrate different facets of their cultural and historical context. Archival research, interviews, and analyses of the parks reveal how postmodern debates about urban planning, the historic city, public space, and nature's presence in an urban setting influenced their designs. In sum, the city adopted the garden as a model for public parks, investing in complex, richly symbolic and representational spaces. These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city. The parks' development process often included points of conflict, pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined. These parks demonstrate the ongoing cultivation of the city over time, in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning. They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing. Just as the Luxembourg Gardens, the Tuileries, and the Buttes-Chaumont parks exemplify their eras' cultural dynamics, such parks as the Jardin Atlantique, Parc André-Citroën, and the Jardin des Halles express contemporary French culture within the archetypal space of their era, the city. Finally, they point the way to current trends in landscape architecture, such as citizen gardening and ecological initiatives.

Paris under the Commune; or the seventy-three days of the Second Siege. With ... illustrations ... Third edition, etc John Leighton, 1871

Signac, 1863-1935 Paul Signac, Marina Bocquillon-Ferretti, Metropolitan Museum of Art (New York, N.Y.), 2001 This book, the catalogue of the first retrospective of the work of the French Neoimpressionist artist Paul Signac to be held in nearly forty years, accompanies the 2001 exhibition organised by the Reunion des Musees Nationaux/Musee d'Orsay, Paris, the Van Gogh Museum, Amsterdam, and The Metropolitan Museum of Art, New York. This long overdue tribute to Signac's power of expression and artistic influence features some two hundred paintings, drawings, watercolours, and prints from public and private collections worldwide. Fully illustrated in colour and discussed in individual entries, these works offer an unprecedented overview of Signac's fifty-year career. Signac's artistic development began with the luminous plein air paintings he made in the early 1880s which reveal the lessons he absorbed from Monet, Guillaumin, and other leading Impressionists. From 1884 until 1891 Signac's close association with Georges Seurat encouraged his explorations of colour harmony, contrasts, and Neoimpressionist technique. In the scintillating works of his maturity the rigours of Pointillism gave way to richly patterned, decorative colour surfaces. In a series of essays the exhibition's curators disc

Building Paris Bruce Marshall, 2009 Paris is the most visited city in the world. This romantic metropolis has for centuries captured the hearts and imaginations of countless writers, poets, musicians, artists, and travellers. Paris is renowned for the splendid architecture of its individual buildings and, even more so, for the harmony of the city's overall composition. In Paris there is a uniformity and majesty to the limestone façades of its residences and palaces. It is a city in which urban planning has long played an important part. Visitors admire the order of the Place des Vosges, developed in the 17th century, the vistas created by Baron Haussmann's boulevards in the 1860s, and the continuing efforts to create innovative, attractive low cost housing begun at the start of the 20th century. It is architecture and planning meant to please and to impress, from Les Invalides, the Ecole Militaire, and the Arc de Triomphe to the Grand Projects pursued by President Mitterrand inspired public buildings by I.M. Pei, Paul Andreu, and Jean Nouvel. Building Paris is Bruce Marshall's account of how Paris came to be the most admired city in the world. Mixing anecdote and history, Marshall illuminates rare and sometimes unpublished images taken from the vast archives of Getty Images, Roger Viollet, and other sources. Examples include photographs recording the restoration of Notre-Dame in 1844, the destruction of the Hôtel de Ville and the Tuileries palace during the Commune uprising in 1871, and Théophile Féau's spectacular sequence of the Eiffel Tower being built for the 1889 World's Fair. Thematic essays bring the history to life and detailed picture captions explain the ingenuity and inventiveness of architects and engineers, masons and glaziers, sculptors and landscapers.

Paris Daniel Noin,Paul E. White,Paul White,1997-09-09 Explores the distinctiveness of Paris and compares it to contemporary urban experiences elsewhere. The authors begin by looking at the features that have made Paris a world city. There's a detailed examination of how Paris functions today, including its economic base, recent urban changes, housing and the built-up environment, Parisians and the structure of the city's neighborhoods. Of particular interest is a chapter in which the voices of Parisians themselves speak as they go about living their daily lives.

Inventing the Garden Matteo Vercelloni,Virgilio Vercelloni,Paola Gallo,2010 The authors trace the evolution of the Western garden from the first plots cultivated for pleasure in the Middle East to today's diverse green spaces that challenge traditional ideas about what constitutes a garden. They examine the changing attitude toward nature--as something to be dominated or embraced, ordered or allowed to range freely, exploited or conserved. Examples of the highly prescribed hortus conclusus or enclosed spaces of the Middle Ages are found in the Italian Renaissance gardens and the symmetries of Versailles and Les Tuileries. After the rise of Romanticism in the late eighteenth century, English gardeners such as William Kent and Capability Brown embraced the concept that nature should prevail over man's manipulation of it and created gardens that broke through traditional enclosures. A century later, while the American West witnessed both the conquering spirit of the homesteaders and the first stirrings of the conservation movement, urban parks and gardens were created as oases to which all people had access. The book concludes with a look at contemporary gardens, where efforts to reclaim

landscapes and repurpose crumbling infrastructure are taking place within an atmosphere of ecological sensitivity--appreciating the idea that the whole planet is a garden and all who live in it are gardeners.
