Planning and Design Perspectives for Land Take Containment Benedetta Giudice, 2022-01-03 This book aims to provide a framework for the concept of land take, the practice by which natural lands are lost to artificial land development practices, and present its ecological implications in urban environments. In particular, the book intends to contextualize land take and its ecological implications in the field of planning through the analysis of the evolution of the relationship that exists between ecology and urban and regional planning, with case studies focusing on cities in Europe. Urban and regional planning (specifically in terms of tools, policies and strategies) play a central role in the redevelopment of this relationship, and through this perspective the text explores some operational criteria and guiding strategies for the creation of innovative scenarios of planning and design. The book is indeed mainly based upon an ecological planning-oriented perspective, with the attempt of creating a strong link between the plan and the project that will be useful for students, researchers, policy makers, and urban planners and designers.

Réussir la planification d'un chantier Alexandre Docteur, Narjes Ben Salah Chaabane, 2022-11-23 La conduite d'un chantier de construction nécessite une planification et une gestion rigoureuse à tous les niveaux, pour assurer la qualité de l'ouvrage dans le respect des délais et des coûts. De nombreuses méthodes permettent de coordonner l'ordre des tâches. Cet ouvrage, qui allie la théorie à la pratique, présente les différentes méthodes de planification et de gestion du chantier. Ce guide : - définit les phases du cycle de vie d'un chantier de bâtiment ou de travaux publics ainsi que le rôle de chacun des intervenants ; - détaille les éléments fondamentaux de planification, de gestion et d'organisation de chantiers ; - décrit la méthodologie et les étapes pour construire des graphes (diagramme de GANTT, méthode PERT, réseaux des antécédents et la méthode chemin de fer) ; - présente les calculs détaillés qui permettent de déterminer les dates de réalisation et les marges des tâches, la durée de projet et le chemin critique ; - explique la planification des ressources en main-d'œuvre, en matériel et en matériaux ; - introduit la méthode Lean Construction. Ce guide, illustré de nombreux schémas explicatifs, d'exemples et d'applications, s'adresse à tous les professionnels - maître d'ouvrage, maître d'œuvre et entrepreneurs -, qui y trouveront les outils nécessaires pour optimiser la gestion de chantier. Les ouvrages de la collection « Méthodes » proposent des outils et des solutions concrètes permettant de maîtriser la gestion d'une opération de construction en toute sécurité.

Modèles de documents, fiches opérationnelles, synthèses des méthodologies et recommandations pratiques font de ces manuels des ouvrages de référence utilisables au quotidien par les professionnels de la construction.

Understanding the Social Economy Jack Quarter, Ann Armstrong, Laurie Mook, 2009-01-01 In this resource the authors integrate a wide array of organizations founded upon a social mission - social enterprises, nonprofits, co-operatives, credit unions, and community development associations - under the rubric of the 'social economy.' This framework facilitates a comprehensive study of Canada's social sector, an area often neglected in the business curricula despite the important role that these organizations play in Canada's economy. This resource presents a unique set of case studies as well as chapters on organizational design and governance, social finance and social accounting, and accountability. The examples provide much needed context for students and allow for an original and in-depth examination of the relationships between Canada's social infrastructure and the public and private sectors. With this work, Quarter, Mook, and Armstrong illuminate a neglected facet of business studies to further our understanding of the Canadian economy.

Territorial Resilience: A Geoprospective Approach provides a full review of the geoprospective approach and how it can be used in planning for and implementing environmental and territorial resilience measures. The geoprospective approach is a way to predict and assess for future risks, and is a comprehensive method for identifying and addressing potential change impacts. In addition to the main concepts and methods of this approach, the book presents applications and case studies for different spatio-temporal scales and problems related to the degradation of socio-ecosystems, as well as applying the geoprospective approach to environmental and urban planning. The book offers an interdisciplinary perspective, tying in concepts and techniques from geography, including spatial analysis methods, modelling, and GIS, to address issues of ecological impacts of climate change, urban risk and resilience, land use changes, coastal impacts, and sustainable development and potential of adaptability. This book is a unique and integral resource for policy makers, environmental and territorial managers, scientists, engineers, consultants, and graduate students interested in anticipating future change in socio-ecosystems. - Introduces the geoprospective approach to assess the impact of global changes on socio-ecosystems, and potential risk situations for ecosystems and society - Includes geographical techniques such as spatial analysis methods, modeling, and GIS to address various climate change issues and to detect vulnerabilities vs adaptive capacities of spatial systems - Provides case studies as well as interviews with planners and policy makers regarding their views on territorial planning and expectations of the geoprospective

Urban Natures Ferne Edwards, Lucia Alexandra Popartan, Ida Nilstad Pettersen, 2023-09-15 Efforts to create greener urban spaces have historically taken many forms, often disorganized and undisciplined. Recently, however, the push towards greener cities has evolved into a more cohesive movement. Drawing from multidisciplinary case studies, *Urban Natures* examines the possibilities of an ethical lively multi-species city with the understanding that humanity's relationship to nature is politically constructed. Covering a wide range of sectors, cities, and urban spaces, as well as topics ranging from edible cities to issues of power, and more-than-human methodologies, this volume pushes our imagination of a green urban future.

Journal of a Dissenter Chris Wright, 2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects, such as Marxism, capitalism, history, many schools of modern philosophy, psychology, economics, and contemporary American politics. It also includes quite a few 'personal' passages, but I've kept those only because they express common experiences and youthful psychological tendencies. Its most useful content for students might be its many summaries of good historical and scientific scholarship, especially in the journal's second half. Ultimately, the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind, from the ages of 15 to 44.

Tunisia's International Relations since the 'Arab Spring' Tasnim Abderrahim, Laura-Theresa Krüger, Salma Besbes, Katharina McLarren, 2017-09-22 When popular protests started in Tunisia in late 2010, few anticipated the

implications these events would have for the entire Arab region. In the following years, this region witnessed deep changes, increased divisions, and even failing states. Meanwhile, Tunisia managed to assert itself as a new democracy. How did this small country manage its democratic transition within such a short period? And what implications has this had for its foreign policy and its role in international politics? This book assesses Tunisia's transition 'inside and out' from four angles: Tunisian polity and politics which provide the framework for its foreign policy since the 'Arab Spring'; bilateral relations before and after the 'Arab Spring'; Tunisia's activism in international organisations as well as their presence in Tunisia; and transnational issues in Tunisia. Drawing on a broad range of primary sources, including authors' own interview material conducted with politicians and representatives of civil society and international NGOs involved in the transition process, the book shows that since 2011 Tunisia has not only developed fundamentally at the domestic level, but also at the level of external relations. New and old alliances, a broadening of relations, and new activism of civil society and of Tunisia in international organisations certify that Tunisia has the potential to play an increasingly important role regionally as well as internationally. Providing an encompassing picture of Tunisia's changed role and successful transition from an autocracy to a democracy, the book allows students and scholars in the field to understand the 'last country standing' better, a country that both the scientific community and the political scene should not underestimate for the promises it holds.

Urban Wastelands Francesca Di Pietro, Amélie Robert, 2021-10-18 Faced with the growing demand for nature in cities, informal greenspaces are gaining the interest of various stakeholders - residents, associations, public authorities - as well as scientists. This book provides a cross-sectorial overview of the advantages and disadvantages of urban wastelands in meeting this social demand of urban nature, spanning from the social sciences and urban planning to ecology and soil sciences. It shows the potential of urban wastelands with respect to city dwellers' well-being, environmental education, urban biodiversity and urban green networks as well as concerns regarding urban wastelands' in relation to conflicts, and urban marketing. The authors provide a global insight through case studies in nine countries, mainly located in Europe, Asia and America, thus offering a broad perspective.

Scaling Up Sean Markey, Mark Roseland, 2016-02-15 When citizens take collaborative action to meet the needs of their community, they are participating in the social economy. Co-operatives, community-based social services, local non-profit organizations, and charitable foundations are all examples of social economies that emphasize mutual benefit rather than the accumulation of profit. While such groups often participate in market-based activities to achieve their goals, they also pose an alternative to the capitalist market economy. Contributors to *Scaling Up* investigated innovative social economies in British Columbia and Alberta and discovered that achieving a social good through collective, grassroots enterprise resulted in a sustainable way of satisfying human needs that was also, by extension, environmentally responsible. As these case studies illustrate, organizations that are capable of harnessing the power of a social economy generally demonstrate a

commitment to three outcomes: greater social justice, financial self-sufficiency, and environmental sustainability. Within the matrix of these three allied principles lie new strategic directions for the politics of sustainability. Whether they were examining attainable and affordable housing initiatives, co-operative approaches to the provision of social services, local credit unions, farmers' markets, or community-owned power companies, the contributors found social economies providing solutions based on reciprocity and an understanding of how parts function within the whole—an understanding that is essential to sustainability. In these locally defined and controlled, democratically operated organizations we see possibilities for a more human economy that is capable of transforming the very social and technical systems that make our current way of life unsustainable.

Social Innovation and Territorial Development Diana MacCallum, Serena Vicari Haddock, 2016-04-01 The concept of social innovation offers an alternative perspective on development and territorial transformation, one which foregrounds innovation in social relations. This volume presents a broad-ranging and insightful exploration of social innovation and how it can affect life, society and economy, especially within local communities. It addresses key questions about the nature of social innovation as a process and a strategy and explores what opportunities may exist, or may be generated, for social innovation to nourish human development. It puts forward alternative development options which variously highlight solidarity, co-operation, cultural-artistic endeavour and diversity. In doing so, this book offers a provocative response to the predominant neoliberal economic vision of spatial, economic and social change.

Power from the North Caroline Desbiens, 2013-05-03 In the 1970s, Hydro-Québec declared in a publicity campaign "We Are Hydro-Québécois." The slogan symbolized the extent to which hydroelectric development in the North had come to both reflect and fuel French Canada's aspirations. The slogan helped Quebecers relate to the province's northern territory and to accept the exploitation of its resources. In *Power from the North*, Caroline Desbiens explores how this culture of hydroelectricity helped shape the landscape during the first phase of the James Bay hydroelectric project. Policy makers and citizens did not, she argues, view those who built the dams as mere workers - they saw them as pioneers in a previously uninhabited land now inscribed with the codes of culture and spectacle. This insightful work shows that if Quebec hopes to engage in truly sustainable resource development, all actors must bring an awareness of their cultural histories and visions of nature, North, and nation to the negotiating table.

International Rainwater Catchment Systems Experiences: Towards water security José Arturo Gleason Espíndola, César Augusto Casiano Flores, Raul Pacheco-Vega, Margarita Rosa Pacheco Montes, 2020-05-15 From time immemorial, people have been managing rain. The availability of water and water sources determined where people would be able to live. Adequate rainfall decided on the quality of agriculture. Technical advances and finance may have enabled

societies to inhabit big cities and expand agriculture into dry areas, but only because of the resource rain provided through the water cycle. Due to population growth, pollution, and climate change, water scarcity will be one of the most critical problems all around the world in the next 15 years. Today, around 10% of the world's population lacks a proper water supply service. Harvesting rainwater and using it for drinking, domestic, industrial, and agricultural uses will help to supply quality water to urban and rural populations. Divided into four sections, basic concepts, narratives of RWH, programs implemented by diverse sectors of society, and notable cases, the book summarizes experiences from 14 different countries all around the globe, developed and developing countries, urban and rural areas. The subject of this book is related to the promotion of different international rainwater experiences that provides sustainable water services and climate resilience, including technical aspects and socio-cultural and policy affairs. This book was written for all people interested in sustainable rainwater management. Students, people just starting in the subject, and experts will find this book interesting as it creates an overview of rainwater harvesting practice and technology all around the world. We encourage all readers to read these stories and arguments at your leisure. Some many ideas and techniques can be picked up and applicable for serving the last 10% that is waiting for water security and proper water service.
