Urban Animals Tora Holmberg, 2015-03-27 The city includes opportunities as well as constraints for humans and other animals alike. Urban animals are often subjected to complaints; they transgress geographical, legal as and cultural ordering systems, while roaming the city in what is often perceived as uncontrolled ways. But they are also objects of care, conservation practices and bio-political interventions. What then, are the more-than-human experiences of living in a city? What does it mean to consider spatial formations and urban politics from the perspective of human/animal relations? This book draws on a number of case studies to explore urban controversies around human/animal relations, in particular companion animals: free ranging dogs, homeless and feral cats, urban animal hoarding and crazy cat ladies. The book explores 'zoocities', the theoretical framework in which animal studies meet urban studies, resulting in a reframing of urban relations and space. Through the expansion of urban theories beyond the human, and the resuscitation of sociological theories through animal studies literature, the book seeks to uncover the phenomenon of 'humanimal crowding', both as threats to be policed, and as potentially subversive. In this book, a number of urban controversies and crowding technologies are analysed, finally pointing at alternative modes of trans-species urban politics through the promises of humanimal crowding - of proximity and collective agency. The exclusion of animals may be an urban ideology, aiming at social order, but close attention to the level of practice reveals a much more diverse, disordered, and perhaps disturbing experience.

The History of Animals: A Philosophy Oxana Timofeeva, 2018-05-03 Oxana Timofeeva's *The History of Animals: A Philosophy* is an original and ambitious treatment of the animal question. While philosophers have always made distinctions between human beings and animals, Timofeeva imagines a world free of such walls and borders. Timofeeva shows the way towards the full acceptance of our animality; an acceptance which does not mean the return to our animal roots, or anything similar. The freedom generated by this acceptance operates through negativity; is an effect of the rejection of the very core of metaphysical philosophy and Christian culture, traditionally opposed to our 'animal' nature and seemingly detached from it. With a foreword by Slavoj Žižek, this book is accessible, jargon-free and ideal for students and all those interested in re-imagining how we engage with animals and the environment.

Animal Studies Paul Waldau, 2013-02-11 Animal studies is a growing interdisciplinary field that incorporates scholarship from public policy, sociology, religion, philosophy, and many other areas. In essence, it seeks to understand how humans study and conceive of other-than-human animals, and how these conceptions have changed over time, across cultures, and across different ways of thinking. This interdisciplinary introduction to the field boldly and creatively foregrounds the realities of nonhuman animals, as well as the imaginative and ethical faculties that humans must engage to consider our intersection with living beings outside of our species. It also compellingly demonstrates that the breadth and depth of thinking and humility needed to grasp the human-nonhuman intersection has the potential to expand the dualism that currently divides the sciences and humanities. As the first holistic survey of the field, *Animal Studies* is essential reading for any student of human-animal relationships and for all people who care about the role nonhuman animals play in our society.

A Heaven for Animals Christopher Steck, 2025-09-02 A transformative perspective on animal afterlife bridging theological reflection and moral action What happens to our beloved companion animals after death? Do they and other animals have a place in the divine plan? *A Heaven for Animals* offers a groundbreaking theological rationale for the inclusion of animals in heaven, challenging conventional thinking about the role animals have in God's plan. Based on Biblical evidence and the doctrine of the Catholic Church, Christopher Steck reveals a radical vision of divine grace that extends far beyond human-centric perspectives, demonstrating how animals are intrinsically part of Christ's redemptive work. Accessible to both theological scholars and thoughtful readers seeking deeper spiritual insights, this book provides a rigorous and compassionate framework for understanding the sacredness of all creation and the creatures within it. *A Heaven for Animals* invites readers to reimagine their ethical responsibilities, suggesting that our treatment of animals should strive to reflect an anticipatory vision of God's inclusive kingdom—a transformative perspective that bridges theological reflection and moral action.

The Animal and the Human in Ancient and Modern Thought Stephen Newmyer, 2016-12-01 Ancient Greeks endeavored to define the human being vis-à-vis other animal species by isolating capacities and endowments which they considered to be unique to humans. This approach toward defining the human being still appears with surprising frequency, in modern philosophical treatises, in modern animal behavioral studies, and in animal rights literature, to argue both for and against the position that human beings are special and unique because of one or another attribute or skill that they are believed to possess. Some of the claims of man's unique endowments have in recent years become the subject of intensive investigation

by cognitive ethologists carried out in non-laboratory contexts. The debate is as lively now as in classical times, and, what is of particular note, the examples and methods of argumentation used to prove one or another position on any issue relating to the unique status of human beings that one encounters in contemporary philosophical or ethological literature frequently recall ancient precedents. This is the first book-length study of the 'man alone of animals' topos in classical literature, not restricting its analysis to Greco-Roman claims of man's intellectual uniqueness, but including classical assertions of man's physiological and emotional uniqueness. It supplements this analysis of ancient manifestations with an examination of how the commonplace survives and has been restated, transformed, and extended in contemporary ethological literature and in the literature of the animal rights and animal welfare movements. Author Stephen T. Newmyer demonstrates that the anthropocentrism detected in Greek applications of the 'man alone of animals' topos is not only alive and well in many facets of the current debate on human-animal relations, but that combating its negative effects is a stated aim of some modern philosophers and activists.

Interactions between Animals and Humans in Graeco-Roman Antiquity Thorsten Fögen, Edmund V. Thomas, 2017-08-21

The seventeen contributions to this volume, written by leading experts, show that animals and humans in Graeco-Roman antiquity are interconnected on a variety of different levels and that their encounters and interactions often result from their belonging to the same structures, 'networks' and communities or at least from finding themselves together in a certain setting, context or environment – wittingly or unwittingly. Papers explore the concrete categories of interaction between animals and humans that can be identified, in what contexts they occur, and what types of evidence can be productively used to examine the concept of interactions. Articles in this volume take into account literary, visual, and other types of evidence. A comprehensive research bibliography is also provided.

Feminist Animal Studies Erika Cudworth, Ruth E. McKie, Di Turgoose, 2022-12-30 This book explores human-animal relations and species- based domination at the intersection of feminism with critique of our domination and exploitation of nonhuman animals, in conversation with power dynamics around coloniality and race, class, sexuality and embodiment. The collection demonstrates the continued vital importance of feminism – conceptually and theoretically, methodologically and politically – to the development of animal studies. Feminism has made an incisive critique of the ways in which gender and other intersecting differences and inequalities are constitutive of our destructive, exploitative and often violent relationships with nonhuman worlds. An international group of scholars and activists showcase new work, revisiting and extending

established debates while negotiating new paths. Amongst the issues addressed in this collection will be questions of animal being and animal rights, caring relations, the relationships between activism and theory, interspecies sexual violence, tension in the animal defence movement around body politics, gender politics and professionalisation, different spaces of gender and animal relations from social media to sexology, safe spaces and sanctuaries, spaces of home – both in times of ‘business-as-usual’ and in times of lockdown. This multidisciplinary volume will be essential reading to students and academics working in the fields of cultural studies, criminology, geography, history, law, philosophy, politics and sociology, with interest in gender, environmentalism and animal studies. The editors work in the School of Applied Social Sciences at De Montfort University, Leicester, UK, and share interests in gender and species violence, environmental harms, social justice matters and intersected inequalities.
