**The Oxford Handbook of African Languages** Rainer Vossen, Gerrit Jan Dimmendaal, 2020 This book provides a comprehensive overview of current research in African languages, drawing on insights from anthropological linguistics, typology, historical and comparative linguistics, and sociolinguistics. It covers a wide range of topics, from grammatical sketches of individual languages to sociocultural and extralinguistic issues.

**Gelebte Frankophonie in der Côte d'Ivoire** Sabine Kube, 2005 La présente étude sociolinguistique de la réalité plurilinguistique abidjanaise part d'une variété du français ivoirien, le nouchi, phénomène linguistique se différenciant considérablement de la variété standard. L'approche choisit par l'étude - l'analyse des pratiques et attitudes linguistiques d'élèves - permet l'analyse d'une réalité linguistique complexe pour laquelle les données empiriques sont rares. L'analyse des propos d'élèves sur leur environnement linguistique montre leurs besoins linguistiques. Les importantes fonctions communicatives et identitaires remplies par le nouchi ne peuvent, selon eux, être satisfaites ni par le français ni par les langues ivoiriennes. L'ancrage de l'étude dans le milieu scolaire permet par ailleurs d'élucider les enjeux linguistiques d'une réforme de l'enseignement en Afrique francophone. La vision des jeunes sur l'évolution de la situation linguistique ivoirienne offre des perspectives intéressantes sur l'avenir de la francophonie africaine.

*The Languages of West Africa* Diedrich Westermann, M. A. Bryan, 2017-09-22 This volume, originally published in 1970, presents a survey of the languages spoken in an area extending from the Atlantic coast at the Sengal River eastward to the Lake Chad region. The area covered by this volume is mainly a geographical one, so it follows that not all the languages included are related to one another, though a certain degree of homogeneity appears.

The Languages of West Africa ... Frederick William Hugh Migeod, 1911

**African Languages** Bernd Heine, Derek Nurse, 2000-08-03 This book is an introduction to African languages and linguistics, covering typology, structure and sociolinguistics. The twelve chapters are written by a team of fifteen eminent Africanists, and their topics include the four major language groupings (Niger-Congo, Nilo-Saharan, Afroasiatic and Khoisan), the core areas of modern theoretical linguistics (phonology, morphology, syntax), typology, sociolinguistics, comparative linguistics, and language, history and society. Basic concepts and terminology are explained for undergraduates and non-specialist readers, but each chapter also provides an overview of the state of the art in its field, and as such will be referred

to also by more advanced students and general linguists. The book brings this range of material together in accessible form for anyone wishing to learn more about this challenging and fascinating field.

**In Hot Pursuit of Language in Prehistory** John D. Bengtson, 2008 Compiled in honor and celebration of veteran anthropologist Harold C. Fleming, this book contains 23 articles by anthropologists (in the general sense) from the four main disciplines of prehistory: archaeology, biogenetics, paleoanthropology, and genetic (historical) linguistics. Because of Professor Fleming's major focus on language – he founded the Association for the Study of Language in Prehistory and the journal *Mother Tongue* – the content of the book is heavily tilted toward the study of human language, its origins, historical development, and taxonomy. Because of Fleming's extensive field experience in Africa some of the articles deal with African topics. This volume is intended to exemplify the principle, in the words of Fleming himself, that each of the four disciplines is enriched when it combines with any one of the other four. The authors are representative of the cutting edge of their respective fields, and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them.

Manual of Romance Sociolinguistics Wendy Ayres-Bennett, Janice Carruthers, 2018-06-11 The Romance languages offer a particularly fertile ground for the exploration of the relationship between language and society in different social contexts and communities. Focusing on a wide range of Romance languages – from national languages to minoritised varieties – this volume explores questions concerning linguistic diversity and multilingualism, language contact, medium and genre, variation and change. It will interest researchers and policy-makers alike.

**The Encyclopaedia Britannica** James Louis Garvin, Franklin Henry Hooper, Warren E. Cox, 1929

**The Languages and Linguistics of Africa** Tom Güldemann, 2018-09-10 This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa, the continent with the largest number of languages in the world. It covers the major domains of linguistics, offering both a representative picture of Africa's linguistic landscape as well as new and at times unconventional perspectives. The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other. This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics.

**Language-related Conflicts in Multinational and Multiethnic Settings** Barbora Moormann-Kimáková, 2015-11-18 In this book, Barbora Moormann-Kimáková analyses the possibility of finding an optimal language regime in multinational and multiethnic countries – either by defining the contents of an optimal language regime, or with the help of a criterion enabling to evaluate whether a language regime is optimal or not. The process of the selection or change of a language regime often becomes a matter of a language-related conflict. These conflicts are mostly accompanied by other political or

social conflicts, as for example in Ukraine or former Yugoslavia, which render solutions – and their evaluation – difficult. The author claims that language regimes can be evaluated based on the increase or lack of their legitimacy in the eyes of the relevant actors. This is demonstrated in four language regime studies on the European Union, Soviet Union, Bosnia and Herzegovina, and South Africa.

A Thesaurus of African Languages Michael Mann, David Dalby, 2017-09-18 Originally published in 1987, this thesaurus is concerned with the spoken languages of Africa. Languages are grouped into a relatively large number of sets and subsets within which the relationship of languages to one another is locally apparent and uncontroversial. The volume presents the languages in classified order with notes on each language, their variant names and immediate classification, and reference to the sources consulted. One section offers an exhaustive list of the languages spoken as home languages by local communities in each state, together with details of languages widely used for inter-group communication, given official recognition, or used in education or the media. There are brief phonological analyses of a broad sample of some 20 African languages and a comprehensive bibliography and language index to the whole work

International Encyclopedia of Linguistics William J. Frawley, 2003-05-01 The International Encyclopedia of Linguistics, 2nd Edition encompasses the full range of the contemporary field of linguistics, including historical, comparative, formal, mathematical, functional, and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines. Areas of intersection with the social and behavioral sciences--ethnolinguistics, sociolinguistics, psycholinguistics, and behavioral linguistics--receive major coverage, along with interdisciplinary work in language and literature, mathematical linguistics, computational linguistics, and applied linguistics. Longer entries in the International Encyclopedia of Linguistics, ranging up to four thousand words, survey the major fields of study--for example, anthropological linguistics, history of linguistics, semantics, and phonetics. Shorter entries treat specific topics within these fields, such as code switching, sound symbolism, and syntactic features. Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics, such as Leonard Bloomfield, Roman Jakobson, and Edward Sapir. A major portion of the work is its extensive coverage of languages and language families. From those as familiar as English, Japanese, and the Romance languages to Hittite, Yoruba, and Nahuatl, all corners of the world receive treatment. Languages that are the subject of independent entries are analyzed in terms of their phonology, grammatical features, syntax, and writing systems. Lists attached to each article on a language group or family enumerate all languages, extinct or still spoken, within that group and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group. In this way, virtually every known language receives coverage. For ease of reference and to aid research, the articles are alphabetically arranged, each signed by the contributor, supported by up-to-date bibliographies,

line drawings, maps, tables, and diagrams, and readily accessible via a system of cross-references and a detailed index and synoptic outline. Authoritative, comprehensive, and innovative, the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal, public, academic, and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study.

*Ugandan Children's Literature and Its Implications for Cultural and Global Learning in TEFL* Stephanie Schaidt, 2018-01-15 The present study adds to TEFL discourse in several ways. First of all, it contributes to the widening of the canon as it focuses on Ugandan children's fiction. Secondly, the research connects to the few empirical studies that exist in the field. It provides further implications for cultural and global learning and literary didactics in TEFL derived from insights into the mental processes of a group of Year 9 students in Germany engaging with Ugandan children's fiction within the scope of an extensive reading project.

*Youth Language Practices in Africa and Beyond* Nico Nassenstein, Andrea Hollington, 2015-09-14 Youth languages have increasingly attracted the attention of scholars and students of various disciplines. African youth languages are a vibrant phenomenon with manifold characteristics involving a range of different languages. This book is a first comprehensive study of African youth languages and presents fresh insights into various youth languages, providing linguistic as well as sociolinguistic data and analyses.

Negation Patterns in West African Languages and Beyond Norbert Cyffer, Erwin Ebermann, Georg Ziegelmeyer, 2009-08-27 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east. The first aim is to provide data on various aspects of negation in African languages. Although the topics addressed here reflect a great diversity of negation patterns, the following typological features have been identified to be prominent in our region: conflict or even incompatibility between negation and focus, use of other indirect means of negating non-indicative mood (covered under the term 'Prohibitive'), different negation patterns in different Tense-Aspect-Moods (e.g. Imperfective vs. Perfective), lack of negative indefinites, and disjunctive negative marking (often referred to as 'double negation'). The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond. On the other hand genetic factors seem to be less prominent.

*Zeitschrift für Eingeborenen-Sprachen* Carl Meinhof, 1926

**French Applied Linguistics** Dalila Ayoun, 2007-01-11 This state-of-the-art volume on French Applied Linguistics includes two introductory chapters, the first summarizes the past, present and future of French in applied linguistics, and the second reviews the history of French from a sociolinguistic perspective. The six chapters of the first part cover the core aspects of the second language acquisition of French: phonology, semantics/syntax, syntax/morphology, pragmatics,

sociolinguistics, and grammatical gender. The seven chapters of the second part explore the contribution of French in various subfields of applied linguistics such as language ideology and foreign language pedagogy, corpus linguistics, and French Sign Language. A chapter studies the role of affective variables on language learning, while another investigates natural language and lexical creativity. The chapters on creole studies and applied linguistics in West Africa address issues in first and second language acquisition in complex sociolinguistic and political contexts. The last chapter serves as an epilogue focusing on Louisiana, a region rich in linguistic history.

*Language Diversity Endangered* Matthias Brenzinger, 2015-07-31 This book presents a comprehensive overview of endangered languages with a global coverage. It features such well-known specialists as Michael Krauss, Willem F. H. Adelaar, Denny Moore, Colette Grinevald, Akira Yamamoto, Roger Blench, Bruce Connell, Tapani Salminen, Olga Kazakevich, Aleksandr Kibrik, Jonathan Owens, David Bradley, George van Driem, Nicholas Evans, Stephen A. Wurm, Darrell Tryon and Matthias Brenzinger. The contributions are unique in analysing the present extent and the various kinds of language endangerment by applying shared general indicators for the assessment of language endangerment. Apart from presenting the specific situations of language endangerment at the sub-continental level, the volume discusses major issues that bear universally on language endangerment. The actual study of endangered languages is carefully examined, for example, against the ethics and pragmatics of fieldwork. Practical aspects of community involvement in language documentation are discussed, such as the setting up of local archives and the training of local linguists. Numerous case studies illustrate different language shift environments with specific replacing factors, such as colonial and religious conquests, migrations and governmental language education. The book is of interest to students and scholars of linguistics with particular focus on endangered languages (and their documentation), typology, and sociolinguistics as well as to anthropologists and language activists.
