Lexique. Lexicologie. Lexicographie. Pierre Swiggers, Alfons Wouters, 2003 A joke, one might think, knowing that ancient grammar famously lacked a syntactic component. Not so, say the scholars: the very absence of the category syntax calls for theoretical and historical analysis, and a scratch at the surface reveals that ancient grammarians did indeed recognize and deal with various aspects of syntax. The 16 papers, five of them in English and the others in German or French, look at syntactic description and reflection in antiquity, Alexandrian grammarians and syntax, virtues and vices of speech, and the Latin and Byzantine heritage. Dialogue Analysis: Units, relations and strategies beyond the sentence Edda Weigand, Eckhard Hauenherm, 2011-07-13 The topic of this volume was discussed at a Round Table of the International Association for Dialogue Analysis (IADA) at the University of Bologna in March 1995. The Round Table was intended to make a scientific contribution in honour of the president's 65th birthday. The topic refers on the one hand to the central problem of 'Dialogue Analysis'

which is to discover a new, communicatively functioning unit after having left behind the unit of the sentence which can be considered the unit par excellence of structural linguistics. On the other hand, it includes the manifold units, relations, and strategies, i.e. the specific problems of dialogue analysis.

Microparametric Syntax and Dialect Variation James R. Black, Virginia Motapanyane, 1996 Richard Kayne's introduction to this volume stresses that comparative work on the syntax of very closely related languages and dialects is a research tool promising to provide both a broad understanding of parameters at their finest-grained and an approach to the question of the minimal units of syntactic variation. The 11 articles in this collection demonstrate the use of this tool in analyzing microparametric variation, principally with reference to Chomsky's Minimalist program, in a variety of languages. Topics include *se/si* constructions, hypothetical infinitives and adverbial quantifiers in French and other Romance languages; that-trace variation, Scandinavian possessive constructions, reflexives and subject-verb agreement in Icelandic & Faroese, and verb clusters in continental West Germanic dialects; anaphoric agreement in Labrador Inuttut; negative particle questions in Chinese; imperative inversion in Belfast English; and the second person singular interrogative in the traditional vernacular of Bolton.

Les aphasies Sophie Chomel-Guillaume, Gilles Leloup, Isabelle BERNARD, 2021-06-29 La prise en charge du patient aphasique a connu ses dernières années de considérables avancées. La « philosophie » même de la rééducation a évolué, en se détachant d'une remédiation du langage et de la parole issue des conceptions classiques d'un support cérébral organisé en centres, au profit d'une conception en réseaux des activités de langage, et en développant des approches écologiques et pragmatiques traitant au sens large la communication. La rigueur de l'approche en neuropsychologie cognitive et de l'approche fonctionnelle se sont ainsi associées pour mettre en place des programmes thérapeutiques personnalisés et adaptés au patient. Cet ouvrage se propose de faire le tour des connaissances actuelles liées aux aphasies, depuis leur compréhension et leur diagnostic jusqu'à leur rééducation. Après un rappel de l'histoire des aphasies et du fonctionnement normal du langage, les auteurs traitent de la démarche diagnostique, évaluation pluridisciplinaire qui s'appuie sur les examens neurologiques, aphasiologiques et neuropsychologiques. Les conduites de rééducations de l'aphasie chez l'adulte sont ensuite développées, non comme une somme de techniques, mais plus comme un cadre de réflexion sur la remédiation en aphasiologie. En fin d'ouvrage, des études de cas permettent d'illustrer et d'appliquer à des situations concrètes l'ensemble des connaissances et des notions abordées. Cette seconde édition propose une mise à jour de l'ensemble des données : les différentes parties ont été revues et étoffées notamment une partie entièrement consacrée à l'intervention orthophonique qui réunit et enrichit les démarches diagnostiques et la rééducation qui étaient séparées dans la précédente édition. Les illustrations sont également maintenant disponibles en couleur et les études de cas cliniques ont été entièrement

renouvelés. Ce livre s'adresse à tous ceux qui s'intéressent à l'aphasie et à sa prise en charge, orthophonistes, neuropsychologues, neurologues, médecins rééducateurs et étudiants.

Lexique, Syntaxe et Lexique-Grammaire / Syntax, Lexis & Lexicon-Grammar Christian Leclère, Éric Laporte, Mireille Piot, Max Silberstein, 2004-07-29 Maurice Gross, who died in December 2001, was a pioneer and leading thinker in the field of modern linguistics. Long before computers could facilitate large-scale, lexically-based language study, he and his team began building an exhaustive, empirically-based inventory of the lexicon-grammar of French which, thirty years later, still remains the most complete syntax-based lexicon available. Researchers all over the world have adopted the Gross model of description, which serves as a computational model for any language. As can be seen in the contributions in this volume, it has been applied to languages as different as Arabic, Chinese, English, Greek or Korean (as well as the major Romance languages, of course). In this volume the reader will also find a number of articles by eminent linguists who were close friends of Maurice Gross, and frequently in dialogue with him on linguistic issues. No matter whether they shared his theoretical views, or his particular empirical methods of description, they each had great respect for his work, especially for the close-grained linguistic analysis which has set a benchmark for future generations.

Arabic Dialectology Enam al- Wer, Rudolf Erik de Jong, 2009 Much of the insight in the field of Arabic linguistics has for a long time remained unknown to linguists outside the field. Regrettably, Arabic data rarely feature in the formulation of theories and analytical tools in modern linguistics. This situation is unfavourable to both sides. The Arabist, once an outrider, has almost become a non-member of the mainstream linguistics community. Consequently, linguistics itself has been deprived of a wealth of data from one of the world's major languages. However, it is reassuring to witness advances being made to integrate into mainstream linguistics the visions and debates of specialists in Arabic. Building on this fruitful

endeavour, this book presents thought-provoking, new articles, especially written for this collection by leading scholars from both sides. The authors discuss topics in historical, social and spatial dialectology focusing on Arabic data investigated within modern analytical frameworks.

La phrase de Racine Robert Garrette, 1995

Classification Syntaxique des Constructions Adjectivales en Coréen Nam Jee-Sun, 1996-10-18 The purpose of this study is the systematic description of a set of data called Adjectives in Korean, which reduces to a minimum theoretical preoccupations and abstract formalisations with no practical applications. The framework of our research is the Lexicon-grammar, whose fundamental idea is that the minimal meaningful unit is the simple sentence and not an isolated word. This work is constituted as follows: given that the corpus extracted from current dictionaries is insufficient for our purpose, we will reconstitute a complete corpus: first, with a formal definition, and then according to some other principles discussed in the first section. With this more complete corpus (5300 items), we will examine in the second section general syntactic properties of adjectival constructions. The third section is devoted to the description of 15 classes of adjectival structures. These syntactic classes will be represented in the form of tables in the annex. The results obtained in this work are indispensable at least for the following activities: first, the elaboration or verification of a linguistic theory demands a priori examination and systematic description of empirical data; furthermore, a syntactic description of lexical data, which is as exhaustive as possible, has a particular interest in the perspective of the elaboration of a lexicon suitable for computer processing of natural language. L'objectif de cette étude est la description systématique d'un ensemble de données dit Adjectifs en coréen, en réduisant au minimum les préoccupations théoriques et les formalisations abstraites et éloignées des faits. Notre démarche s'inscrit dans le cadre du Lexique-grammaire, dont l'idée fondamentale est que l'unité minimale de sens est la phrase simple et non le mot isolé. Ce travail est constitué de la manière suivante: étant donné que le corpus extrait des dictionnaires actuels est insuffisant pour notre objectif, on reconstituera un corpus complet: d'abord avec une définition formelle, et ensuite selon certains autres principes dont nous parlerons dans la première partie; une fois ce corpus constitué (5300 items), on examinera dans la deuxième partie, les propriétés syntaxiques générales des constructions adjectivales; la troisième partie est consacrée à décrire 15 classes de structures adjectivales. Ces classes syntaxiques se présentent sous la forme des tables dans l'annexe. Les résultats que nous avons obtenus dans ce travail sont indispensables au moins pour les deux activités suivantes: d'abord, une élaboration ou une vérification d'une théorie linguistique exige préalablement l'examen et la description systématique de données empiriques; par ailleurs, une description syntaxique des données lexicales, aussi exhaustive que possible, a un intérêt particulier dans la perspective de l'élaboration d'un lexique adéquat au traitement informatique du langage naturel.
