Language, creoles, varieties Cyrille Granget,Isabel Repiso,Guillaume Fon Sing,2023-12-22 This book offers a selection of papers dealing with second language acquisition, foreign language teaching and creole linguistics inspired by the scientific legacy of Mauritian-born scholar Georges Daniel Véronique (Port-Louis, 1948). An important part of the book is devoted to the description of learner varieties with a focus on sociolinguistic factors, such as the learner situation – from asylum seekers to Erasmus students –, the degree of familiarity with the target language – having or not previous knowledge about a genetically related language –, the degree of literacy, and the type of instruction. Linguistic complexity, case marking, the use of self-positioning pronouns, verbal morphology and aspectual values are among the linguistic phenomena analyzed by the authors having contributed to this part of the volume. Another part of this volume deals with language didactics and addresses the questions of whether manipulating specific constructions from a usage-based perspective and a focus-on-form approach do indeed aid beginner learners to acquire complex forms in L2 German and nominal forms in L2 Polish, respectively. It also explores how some educational policies in Sweden have affected both the offer of French as a Foreign Language and its demand by students. The contributions to creole studies present diachronic analyses targeting the /z/ plural marking in Réunion creole, Fa d'Ambô and spoken French, and a set of NPs found in two speeches pronounced in 1835 on the island of Agaléga by a coconut oil producer whose features are similar to Mauritian creole. Linguistic, social and historical factors are at the center of these contributions.

An Introduction to Bilingualism Jeanette Altarriba,Roberto R. Heredia,2011-02-11 This important text provides a general overview of the methods and theories used in the broad domain of bilingualism. The unique interdisciplinary approach, which is reflected in the various topics covered, gives students a global picture of the field. Topics range from early childhood intellectual development to educational and social-cognitive challenges to the maturing bilingual brain. Important developing areas such as cognitive aging, creativity, the social and cultural context perspective, communication disorders and sentence processing are also covered within the volume. This text is aimed towards undergraduate courses and graduate courses in psycholinguistics, especially those with an emphasis on bilingualism or second language learning.

New Approaches to Multilingualism, Language Learning, and Teaching Sviatlana Karpava, Natalia Pavlou, Kleanthes K. Grohmann, 2024-01-15 This volume examines issues of bilingualism and multilingualism. The research reported addresses second (L2), third (L3) and heritage language acquisition, including multiliteracy and home language development. It also touches on issues relating to language teaching methodology, education, and language policy. Through the lens of critical analysis, the authors seek to investigate new approaches to bi/multilingualism, language learning and teaching, theoretical models, research methodology, and application of language acquisition theories in teaching. The contributions provide frameworks for understanding multilingualism based on diverse topics and analyses. These chapters cover key concepts, discuss previous research, and present studies from different geographical regions and languages. They also provide critical reviews and analyses, report novel projects, and offer personal reflections. This book is ideal for students of applied linguistics, sociolinguistics, psycholinguistics, language acquisition and education. It will also be of use for practitioners, teachers, parents, and researchers wishing to update their knowledge in multilingualism at large, language learning, and language teaching.

A Guide to the World's Major Languages Gauraang Asan, 2025-01-03 A Guide to the World's Major Languages offers an in-depth exploration of the most spoken and influential languages globally. We present comprehensive historical, sociological, and linguistic information, along with extensive descriptions of phonological and graphic systems, morphology, word formation, syntactic patterns, and lexical features. Each chapter includes updated bibliographies and census data, detailing the languages' number of speakers, official status, and cultural and historical significance. We provide detailed overviews of inflectional languages, highlighting main variants and conjugation classes. Our book emphasizes the grammatical and sociolinguistic features of major languages, making it a reliable resource for both students and enthusiasts. It is designed to be accessible to anyone interested in language studies, offering a thorough understanding of the subject.

Language As Commodity Rani Rubdy, Peter Tan, 2008-09-21 Throughout human history, languages have been in competition with each other. As the world becomes more globalized, this trend increases. It affects the decision-making of those in positions of power and determines macro language policies and planning. Often decisions about language (or dialects or language variety) are related to usefulness - defined in terms of their pragmatic and commercial currency or their value as symbols of socio-cultural identity. Languages can be modes of entry into coveted social hierarchies or strongholds of religious, historical, technological and political power bases. Languages are seen now as commodities that carry different values in an era of globalization. This volume engages with language policies and positions in relation to the roles and functions these languages adopt. It examines the 'value' of languages, defined in terms of the power they have in the global marketplace as much as within the complex matrices of the local socio-politics. These valuations strongly underpin the various motivations that influence policy-making decisions, and in turn, these motivations create the tensions that

characterize many language-related issues; tensions that arise when languages become commodified.

Current Practices in Academic Librarianship V. Uma,V.J. Suseela,2014-09-09 The book covers a wide variety of themes, with good number of practical papers such as Library Automation, Digitization. Data Mining & Data Warchousing, Cloud Computing, Management of e-Journals & e-Resources, Strategic Management and Stress Management. It is hoped that the present work, Current Practices in Academic Librarianship, will have practical application and find wider audience not only among the academic librarians but also by a large number of enthusiastic and upcoming LIS professionals associated with all types of libraries. It is a guiding manual with regard to current practices in LIS field.

Hindi as a Second and Foreign Language Shiv-Kumar Singh,Gaurav Kumar,2021-11-01 This book will be helpful to teachers and learners of Hindi who want to understand better ways of teaching and learning Hindi as a foreign language. With the ever-increasing number of Hindi learners across the globe, particularly in Europe, it has become necessary to customise the teaching methods to the particular needs of learners, highlighting the relevant areas that need more attention. For researchers of second language acquisition, the book provides ample information on various previous studies and demarcates areas of further research as well. Overall, it is a must-read for learners, researchers and teachers of Hindi as a foreign language.

Examining Education around the World Fred M. Shelley,2022-09-27 This thematic encyclopedia provides an overview of education in 70 countries worldwide and links educational organization, philosophy, and practice with important global social, economic, and environmental issues facing the contemporary world. All around the world, young people attend school, be it in the steppes of Mongolia, the tiny island nations of the Pacific, or the urban centers of Mexico. How do countries meet the educational needs of their citizens? This volume is organized into 10 chapters that look at key issues in global education, including literacy, gender, religion, science and technology (STEM), arts and humanities, school violence, multicultural education and diversity, environment and sustainability, education and difference/special needs, and views on education and a country's future. Each chapter contains eight country profiles, one for the United States and one each for seven other countries. Each entry includes a brief overview of the country and its history and geography, a description of its education system, and more detailed information about that country. This book allows readers to compare and contrast education throughout the world. It also analyzes, from both contemporary and historical perspectives, relationships between education and the ways in which different countries address various issues, including development, diversity, gender, and environmental sustainability.

Human Thought and Social Organization Murray J. Leaf,Dwight Read,2012-06-07 Human beings have two outstanding characteristics compared to all other species: the apparently enormous elaboration of our thought through language and symbolism and the elaboration of our forms of social organization. The view taken in Human Thought and

Social Organization: Anthropology on a New Plane is that these are intimately interconnected. To understand this connection, the book compares the structure of the systems of thought that organizations are built upon with the organizational basis of human thinking as such. An experimental method is used, leading to a new science of the structure of human social organizations in two senses. First, it gives rise to a new kind of ethnology that has the combination of empirical solidity and formal analytical rigor associated with the “paradigmatic” sciences. Second, it makes evident that social organizations have distinctive properties and require distinctive explanations of a sort that cannot be reduced to the explanations drawn from, or grounded in, these other sciences. Human social organizations are created by people using systems of ideas with very specific logical properties. This book describes what these idea-systems are with an unbroken chain of analysis that begins with field elicitation, and continues by working out their most fundamental, logico-mathematical generative elements. This enables us to see precisely how these idea systems are used to generate organizations that give pattern to ongoing behavior. The book shows how organizations are objectified by community members through symbolic representations that provide them with shared conceptions of organizations, roles, or relations that they see each other as participating in. The case for this constructive process being pan-Homo sapiens is described, spanning all human communities from the Upper Paleolithic to today, and from the most seemingly primitive Australian tribes to modern-day America and India. While focusing primarily on kinship, Human Thought and Social Organization shows how the analysis applies with equal precision to other social areas ranging from farming to political factionalism.

Artificial Intelligence and Speech Technology Amita Dev, S. S. Agrawal, Arun Sharma, 2022-01-28 This volume constitutes selected papers presented at the Third International Conference on Artificial Intelligence and Speech Technology, AIST 2021, held in Delhi, India, in November 2021. The 36 full papers and 18 short papers presented were thoroughly reviewed and selected from the 178 submissions. They provide a discussion on application of Artificial Intelligence tools in speech analysis, representation and models, spoken language recognition and understanding, affective speech recognition, interpretation and synthesis, speech interface design and human factors engineering, speech emotion recognition technologies, audio-visual speech processing and several others.

At the Hands of Fate: the Political Economy of Islamic Insurance Muhammad Sigit Andhi Rahman, 2020-04-02 Why have Islamic insurance systems developed well in some countries, but not in others? Malaysia is considered as Islamic insurance elite due to its relatively large number of operators it houses as well as the sustained growth of Islamic insurance sales within the country, while Indonesia and Pakistan are still in early stages of development. Analyzing the political and social history of Islamization of insurance systems in these three Muslim majority countries in Asia since 1980s, this book demonstrates the development gap between these countries on Islamic insurance results from; firstly, complex bargains

made between various groups within each country polity, and those bargains are structured by the country's fundamental political institutions. Secondly, the gap is also an outcome of different societal transformations during the Islamization that 'produce Islam(s)' in these countries. The revival of Islamic principles in these countries does not only create Sharia-compliant financial products but produces Islamic norms, identities, ethics, and practices enacted in the way the communities manage their risk.

Handbook of Literacy in Akshara Orthography R. Malatesha Joshi, Catherine McBride, 2019-06-11 This volume examines the unique characteristics of akshara orthography and how they may affect literacy development and problems along with the implications for assessment and instruction. Even though akshara orthography is used by more than a billion people, there is an urgent need for a systematic attempt to bring the features, research findings, and future directions of akshara together in a coherent volume. We hope that this volume will bridge that gap. Akshara is used in several Indic languages, each calling it by a slightly different name, for example 'aksharamu', in Telugu, 'akshara' in Kannada, and 'akshar' in Hindi. It is the Bhrami-derived orthography used across much of the Indian subcontinent. There is a growing body of research on the psycholinguistic underpinnings of learning to read akshara, and the emerging perspective is that akshara, even though classified as alphasyllabaries, abugida, and semi-syllabic writing systems, is neither alphabetic nor syllabic. Rather, akshara orthography is unique and deserves to be a separate classification and needs further investigation relating to literacy acquisition in akshara. The chapters in this volume, written by leading authors in the field, will inform the reader of the current research on akshara in a coherent and systematic way.

English Words Francis Katamba, 2002-09-11 *English Words* aims to arouse curiosity about English words and about the nature of language in general, especially among introductory students who do not intend to specialize in linguistics.

Explorations and Extrapolations Alexander Brock, Uwe Kuchler, 2011 This volume continues the tradition in the series *Anglistik und Amerikanistik* of representing the full thematic diversity of research in English and American studies. The articles - mainly written by young researchers in their postgraduate or postdoctoral phases - span the areas of English and American literature, culture studies and linguistics as well as the teaching of English as a foreign language (Fachdidaktik). At the same time they represent various theoretical approaches adopted by young German researchers and the interplay of theoretical and applied issues.

Newton genealogy L.E. Newton, *Newton genealogy*, genealogical, biographical, historical being a record of the descendants of Richard Newton of Sudbury and Marlborough, Massachusetts 1638, with genealogies of families descended from the immigrants, Rev. Roger Newton of Milford, Connecticut; Thomas Newton of Fairfield, Connecticut; Matthew Newton of Stonington, Connecticut; Newtons of Virginia; Newtons near Boston.

The Queen's Hinglish B. K. Mahal, 2006 Takes a light-hearted look at 'Hinglish', a variety of English combined with elements of Southern Asian languages. This book features the best-loved and familiar terms, such as pukka and chuddies. It includes intriguing facts and stories and is illustrated throughout.

Proceedings of the International Conference on Computing and Communication Systems Arnab Kumar Maji, Goutam Saha, Sufal Das, Subhadip Basu, João Manuel R. S. Tavares, 2021-04-11 This book contains the latest research work presented at the International Conference on Computing and Communication Systems (I3CS 2020) held at North-Eastern Hill University (NEHU), Shillong, India. The study of social varieties of English with special emphasis on the Am. E. CB slang Paweł Migut, 2011-01-04 Master's Thesis from the year 2010 in the subject English Language and Literature Studies - Linguistics, grade: A, University of Rzeszów (Institute of Linguistics), course: Linguistics, language: English, abstract: People are surrounded with change and development in almost all spheres of life, however, out of all aspects of human existence, language is the only one which evolution is almost impossible to scrutinize in its full spectrum and beauty. Language requires no regulations, it simply flows, living its own life of unrestrained freedom, like a tiny, independent organism it develops, alters and adjusts to the surrounding reality. As an American lexicographer once perfectly put it, language [...] is an uncompromising mirror [...] an untouched record of thoughts, feelings, successes, failures, and intent of the people. While many linguists tried to analyze, document, as well as describe the intricate ways of language functioning, most of them were unsuccessful in their ventures. The vast majority of ordinary people use language every day, but few feel compelled enough to stop and wonder about the phenomenon of speech and why the human race is the only species on planet Earth that is privileged to be endowed with such aptitude. The main thesis of this work is to touch upon the phenomenon of language, specifically, provide its definition, discuss the subject of language categorization, as well as enumerate and analyze the focal terms that make up the very foundations of most natural lingoes. It will also present a detailed insight in the world of colloquial speech, and related phenomena, focusing predominantly on the linguistic aspects and the analysis of CB slang. What must be mentioned is that this work's thesis is not merely to define the most common terms in language studies, but to express and illustrate the beauty, the complexity, and the unfathomability of language phenomenon. It is to prove the versatility, as well as the speed rate in which languages evolve, alter and shape accordingly in the ever-changing reality, making language studies an inexhaustible research field for generations to come.
