**Two Thumbs Up** Stephanie Ross, 2020-11-10 “An expansive and witty examination of the usefulness of criticism” from the realm of professional tastemakers to the vast landscape of social media (Times Literary Supplement, UK). Far from an elite practice reserved for the highly educated, criticism is all around us. We turn to the Yelp reviewers to help us pick restaurants, to Rotten Tomatoes to guide our movie choices, and to voices on social media for critiques on everything from political candidates to beach resorts. Yet even amid this sea of opinions, professional critics still hold considerable power in guiding how we make aesthetic judgements. In *Two Thumbs Up*, philosopher Stephanie Ross examines how critics influence our decisions, and why that’s a good thing. Starting from David Hume’s conception of ideal critics, Ross refines his position and makes the case that review-based journalistic or consumer reporting criticism proves the best model for helping us find and appreciate quality. Ross demonstrates how aesthetic and philosophical concerns permeate our lives, choices, and culture. Ultimately, whether we’re searching for the right wine or the best concert, Ross encourages us all to find and follow critics whose taste we share.

Audiobooks, Literature, and Sound Studies Matthew Rubery, 2011-05-09 This is the first scholarly work to examine the cultural significance of the talking book since the invention of the phonograph in 1877, the earliest machine to enable the reproduction of the human voice. Recent advances in sound technology make this an opportune moment to reflect on the evolution of our reading practices since this remarkable invention. Some questions addressed by the collection include: How does auditory literature adapt printed texts? What skills in close listening are necessary for its reception? What are the social consequences of new listening technologies? In sum, the essays gathered together by this collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways. Bringing together a set of reflections on the enrichments and impoverishments of the reading experience brought about by developments in sound technology, this collection spans the earliest adaptations of printed texts into sound by Charles Dickens, Thomas Hardy, and other novelists from the late nineteenth century to recordings by contemporary figures such as Toni Morrison and Barack Obama at the turn of the twenty-first century. As the voices gathered here suggest, it is time to give a hearing to one of the most talked about new media of the past century.

*Digital Audiobooks* Iben Have, Birgitte Stougaard Pedersen, 2015-08-11 Audiobooks are rapidly gaining popularity with widely accessible digital downloading and streaming services. This book engages with the digital form of audiobooks, framing audiobook listening as both a remediation of literature and an everyday activity that creates new reading experiences that can be compared to listening to music or the radio. **Routledge Handbook of Tourism Cities** Alastair M. Morrison, J. Andres Coca-Stefaniak, 2020-08-27 The Routledge Handbook of Tourism Cities presents an up-to-date, critical and comprehensive overview of established and emerging themes in urban tourism and tourist cities. Offering socio-cultural perspectives and multidisciplinary insights from leading scholars, the book explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored, including sustainable urban tourism, overtourism and urbanisation, the impact of terrorism, visitor-host interactions, as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers

and exhibition hosting. This section combines academic scholarship with real-life practice and case studies from cities. Part III discusses product and technology developments for tourism cities, examining their supply and impact on different travellers, from open-air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism, including geology and ecology-based tourism, socialist heritage and post-communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today.
