Collaborative Medicine Case Studies Rodger Kessler, Dale Stafford, 2008-03-11 This timely and important work looks at the collaborative health care model for the delivery of mental health care in a primary care setting. This has become the ideal model for the treatment of comorbid medical and psychiatric or psychological disorders. There is also an increased awareness that pharmacological intervention, the most frequently delivered intervention for psychological disorders, is often of limited effectiveness without concurrent specific psychological intervention. The book includes more than two dozen case studies, co-written by clinical psychologists and primary care physicians. It is essential reading for any psychology practitioner in a clinical setting, as well as for health care administrators.

Palliative Medicine: A Case-Based Manual Susan MacDonald, Leonie Herx, Anne Boyle, 2021-12-08 Palliative medicine is the medical care provided for people who have a life limiting illness or condition. It encompasses both the physical symptoms a person may experience but also the psychosocial, emotional, and ethical issues that may arise. Now in its fourth

edition, *Palliative Medicine: A Case-Based Manual* walks clinicians through the management of the most common situations found in palliative medicine, from diagnosis and managing symptoms through to grief and bereavement. Using real patient case scenarios and an easy-to-read question and answer format, it gives students and medical professionals an accessible, evidence-based entryway to gain the skills and knowledge needed to provide high quality palliative and end of life care to patients and their families. This new edition has been fully updated to cover the latest guidance, including new chapters dedicated to medical cannabis, opioids, grief and bereavement, and wider issues including palliative care in the community, structurally vulnerable populations, and public health. Written by over 50 experienced palliative care clinicians and educators, this book will be a welcome guide for palliative care workers, medical and nursing students, and medical professionals of any specialty where palliative needs might arise.

The Integrated Case Management Manual Roger G. Kathol, Janice Cohen, 2010-06-03 Designated a Doody's Core Title! An ideal reference guide for case managers who work with complex, multimorbid patients, *The Integrated Case Management Manual* helps readers enhance their ability to work with these patients, learn how to apply new evidence-based assessments, and advocate for improved quality and safe care for all patients. This text encourages case managers to assess patients with both medical and mental health barriers to improvement in order to coordinate appropriate integrated health interventions and treatment planning. Built upon the goals and values of the Case Management Society of America (CMSA), this manual guides case managers through the process of developing new and important cross-disciplinary skills. These skills will allow them to alter the health trajectory of some of the neediest patients in the health care system. Key Features: Tools and resources for deploying an Integrated Health Model (physical and mental health treatment) to the medically complex patient Complexity assessment grids: a color-coded tool for tracking patient progress and outcomes throughout the trajectory of the illness Methods for building collaborative partnerships in emerging models of care delivery within multidisciplinary health care teams Strategies for using an integrated case management approach to improve efficiency, effectiveness, accountability, and positive outcomes in clinical settings Guidance on connecting multi-disciplinary teams to assist with

health issues in the biological, psychological, and social domains to overcome treatment resistance, reduce complications, and reduce cost of care

Graduate Medical Education in Family Medicine Rick Kellerman, Gretchen Irwin, 2025-03-29 This book outlines the basic structure and processes of family medicine residency education programs. Family medicine residency programs are complex adaptive learning organizations that involve people, processes, procedures, buildings, budgets, high stakes, mistakes, mission statements, strategies, schedules, curricula, faculty, and residents. Residency program faculty are faced with many challenges, and this book gives them and others who are interested or involved in residency programs a clear and comprehensive breakdown of family medicine graduate medical education. The volume opens with detailed overviews of several family medicine organizations that support residency programs and faculty. Subsequent chapters cover a range of topics, including best practices in resident assessment and evaluation and best practices pertinent to the development of teaching and administrative skills for faculty. Furthermore, chapters explain necessary residency education accreditation requirements, which includes the understanding of the accreditation requirements, board certification requirements, Medicare graduate medical education funding policies, and Centers for Medicare and Medicaid Services (CMMS) billing regulations. All authors have been family medicine residency program directors or faculty or have been intimately involved in residency program education. Graduate Medical Education in Family Medicine offers residency program directors, faculty, and residency administrators a wide-ranging and comprehensive overview of family medicine residency education as well as specific administrative and educational best practices for residency education. This book will also be useful to those physicians with experience in their clinical field, but not in educational pedagogy and andragogy.

101 Primary Care Case Studies Sampath Wijesinghe, 2020-12-15 Real-life primary care case studies* from more than 50 primary care providers, including physician assistants, nurse practitioners, and physicians! 101 Primary Care Case Studies offers real-life patient scenarios and critical thinking exercises to help you work through a patient's chief complaint. Through narrative case studies, you will determine how best to diagnose, treat, and manage your patient based on the history of present illness, review of systems, relevant history, and physical examination findings. This workbook will ask probing questions to help you determine differential and most likely diagnoses, diagnostic tests to order, and appropriate patient

management strategies using relevant and timely references to support your decisions. The organization of each case study simulates the patient care journey from chief complaint to outcome. Serving as a virtual clinical preceptor, this workbook can be used independently or in a classroom setting. It is accompanied by a robust online student supplement that provides answers to all questions, real outcomes of the cases, and valuable personal insights from the authors on how the patient was successfully managed. Not only will this workbook help you work through patient cases clinically, it will also share important, but often overlooked, bedside manner skills needed to successfully communicate with and care for your patients. Covering conditions across all organ systems and across the lifespan, this workbook is organized by chief complaint, providing an authentic perspective on what to expect in the patient care environment. It even includes information on pathophysiology and how to use ICD-10 and CPT (E/M) codes in your documentation. The book uniquely weaves together both the science and art of medicine by including personal insights into quality and compassionate care. Key Features Provides real-life patient cases from an interprofessional author team of physician assistants, nurse practitioners, and physicians Uses a templated case study design and critical thinking exercises to help you methodically work through various patient scenarios Teaches clinical and bedside manner skills imperative for delivering quality patient care Covers patients across the lifespan, including pediatric, adolescent, adult, and geriatric populations Offers additional insight on patient education, medical and legal concerns, and interprofessional collaboration Includes a robust online student supplement with valuable insights from the authors on how they successfully managed the cases Provides instructors with a table of contents that is filterable by chief complaint, diagnosis, patient population, and organ system *Details changed to protect patient information.

CASE STUDIES IN CANADIAN HEALTH POLICY AND MANAGEMENT, SECOND EDITION Raisa Deber, Catherine Mah, 2014-04-09 Covering a wide range of issues, the 22 cases included in Case Studies in Canadian Health Policy and Management constitute an exceptional resource for bringing real-life policy questions into the classroom. Based on actual events, the cases have been developed with input from mid-career professionals with strong field experience and extensively tested in Raisa B. Deber's graduate case study seminar at the University of Toronto. Each case features both a substantive health policy issue and a selection of key concepts and methods appropriate to examining public policy, public health, and health care management issues. In each case, the authors provide a summary of the case and the related policy issues, a description of events, suggested questions for discussion, supporting information, and both works cited and further reading. Suitable for graduate and undergraduate classrooms in programs in a variety of fields, Case Studies in Canadian Health Policy and Management is an exceptional educational resource. This second edition features all new cases, as well as adding an introductory chapter that provides a framework and tools for health policy analysis in Canada.

Indonesia: a primary health care case study in the context of the COVID-19 pandemic Mora CLARAMITA, Oryzati HILMAN, Fitriana Murriya EKAWATI, Nur Afrainin SYAH, Nita ARISANTI, Isti Ilmiati FUJIATI, 2023-08-04 This case study examines country-level primary health care (PHC) systems in Indonesia in the context of the COVID-19 pandemic between March 2020 and July 2021. The case study is part of a collection of case studies providing critical insights into key PHC strengths, challenges and lessons learned using the Astana PHC framework, which considers integrated health services, multisectoral policy and action, and people and communities. Led by in-country research teams, the case studies update and extend the Primary Health Care Systems (PRIMASYS) case studies commissioned by the Alliance in 2015.

Republic of Korea: a primary health care case study in the context of the COVID-19 pandemic Sun-Young KIM, 2024-02-28 This case study examines country-level primary health care (PHC) systems in the Republic of Korea in the context of the COVID-19 pandemic between March 2020 and April 2022. The case study is part of a collection of case studies providing critical insights into key PHC strengths, challenges and lessons learned using the Astana PHC framework, which considers integrated health services, multisectoral policy and action, and people and communities. Case Studies for Complementary Therapists Kelly Galvin, Madelaine Bishop, 2010-12-20 This book provides support at curriculum level for developing the complementary potential which exists between complementary and conventional western medicine. It provides students, teachers and practitioners with a framework within which they can effectively analyse and classify the extensive amount of information gathered in a CAM consultation and help them develop effective and appropriate treatment programmes within the time constraints of a busy clinic. It provides an insight into the initial CAM consultation process, offering possible treatment and collaborative referral options for individual cases rather than dictating diagnostic analysis or treatment protocols for specific conditions. Question suggestions have been provided to help the user collect the necessary information to develop a working diagnosis and treatment protocol for each individual case. Readers can then adapt questions, decision-making tools and therapeutic recommendations to suit the needs of their own clients. Complementary practitioners are often uncertain about the legal and ethical boundaries regarding diagnosis and case management. This book will help CAM students and practitioners recognise situations requiring referral understand their role in collaborative case management and confidently integrate a range of CAM modalities in treatment programmes - Provides a clear case analysis format which can be and adapted to suit the requirements of individual case histories - Specific questioning format - Clearly identifies situations where cross or collaborative referral is necessary - Decision tables help readers prioritise treatment, refer appropriately and help guide clinical thinking when readers are faced with several treatment options. - Class tested, curriculum based

Health Services Management: A Case Study Approach, Eleventh Edition Ann Scheck McAlearney, Anthony R. Kovner, 2017-09-01 Instructor Resources: Instructor's Manual Today's healthcare managers face increasingly complex challenges and often must make decisions quickly. When a difficult situation arises, managers can no longer simply look it up online or in the management literature. Properly looking it up involves knowing where and how to look, appropriately framing a research question, weighing valid evidence, and understanding what is required to make proposed solutions work. Health Services Management: A Case Study Approach offers a diverse collection of case studies to help readers learn and apply key concepts of management, with an emphasis on the use of evidence in management practice. The case study authors, many of whom are practitioners or academics who work closely with practitioners, present realistic management challenges across a variety of settings. They examine potential responses to those challenges by health services managers and other stakeholders, and they provide a platform for meaningful discussion of opportunities and constraints for management decision makers attempting to implement change. This edition includes 60 case studies—32 of which are brand new—arranged thematically into six sections: The Role of the Manager, Control, Organizational Design, Professional

Integration, Adaptation, and Accountability. The new cases include the following: • Better Metrics for Financial Management • What Makes a Patient-Centered Medical Home? • Doing the Right Thing When the Financials Do Not Support Palliative Care • Hearing the Patient Voice: Working with Patient and Family Advisers to Improve the Patient Experience • Managed Care Cautionary Tale: A Case Study in Risk Adjustment and Patient Dumping Learning by example is one of the oldest forms of learning, and the case study approach offers a time-tested way for students and healthcare professionals to develop practical skills that are not easily acquired through lectures. Health Services Management has been used in classrooms since 1978, and this eleventh edition offers a fresh take on a classic text.

The 5-minute Clinical Consult 2012 Frank J. Domino, Robert A. Baldor, 2011-04-01 Handbook concisely presents extensive, clinically relevant information. It is divided into sections: alphabetized table of contents, health maintenance schedules, algorithmic flowcharts for diagnosis and treatment, and summaries for over 900 conditions. Summaries comprise basics, diagnosis, treatment, ongoing care (including complications and patient education), references, readings, codes and clinical pearls.

The SAGE Handbook of Case-Based Methods David Byrne, Charles C Ragin, 2009-07-01 This handbook provides a clear examination of case-oriented research. It defines case-based social research as a subfield of methodology.

Case Studies in Medical Toxicology Leslie R. Dye, Christine Murphy, Diane P. Calello, Michael D. Levine, Aaron Skolnik, 2017-12-22 The ACMT National Case Conference (NCC) is a monthly discussion of novel or interesting cases in medical toxicology. Participation is through online webinar, and the conferences are recorded to allow for review at any time. The cases in this book are taken from recordings of NCC with edits and revisions by contributors and editors to demonstrate educational points. The majority of the case information is from the original recording and represents actual patient presentations. However, some of the details have been changed and fictional information added to enhance the educational value. This volume covers a broad range of toxicological topics, and specialty guidance is offered at the end of every case to aid non-toxicologists. The dilemmas are applicable to both academic and clinical medicine. A list of relevant questions is also provided for each case. Subjects include common toxicological problems, rare presentations of common problems, common problems with controversial treatments or difficult diagnoses, and rare problems. Case Studies in Medical Toxicology from the American College of Medical Toxicology is a detailed reference text on specific toxicological issues and also serves as a practical review for those taking board exams. As a result, this volume is an important and necessary resource for medical students, residents, and fellows, as well as primary-care physicians, intensivists, and toxicologists. Case Studies in Medical Toxicology from the American College of Medical Toxicology is a detailed reference text on specific toxicological issues and also serves as a practical review for those taking board exams. As a result, this volume is an important and necessary

resource for medical students, residents, and fellows, as well as primary-care physicians, intensivists, and toxicologists. All proceeds from this book will be donated to the Medical Toxicology Foundation.
