Information Communication Technologies: Concepts, Methodologies, Tools, and Applications Van Slyke, Craig, 2008-04-30 The rapid development of information communication technologies (ICTs) is having a profound impact across numerous aspects of social, economic, and cultural activity worldwide, and keeping pace with the associated effects, implications, opportunities, and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence.

Information and Communication Technology, Digital Media and Society Deepanjali Shrestha, CHAPTER-1 The first chapter talks about the foundation concepts of technology, media, society and culture. It highlights the role of technology and media in society and culture and brings out the role these two play in shaping society and culture. This chapter defines the relevance of the study and elaborates the context in the proceeding chapters with examples and case studies. CHAPTER-2 This chapter talks about the artifacts of ICT and New media. It elaborates the notion of ICT and new media by talking about the various artifacts of ICT and their attributes. It further explains, how these attributes and features are useful and are making an impact on society and culture. The chapter also discusses the role of new media, its coverage, and its influence together with technology. CHAPTER-3 This is the core chapter that discusses the Impact of ICT and New Media on society and culture. This chapter has taken the real cases around the world to bring out the impact that ICT and New media have created in society and culture. This chapter has many important and vital cases like the Orange revolution of Burma or the Zhejiang University Girl and Professor debate that became viral on the internet and were able to highlight the power of ICT technologies and New media. This chapter also shows how and in what ways the current technologies are transforming society and culture. CHAPTER-4 This chapter illustrates ICT systems as complex systems and discusses the properties of a complex system. It further explains the complexities of a software system and the properties that make these systems so complex. This chapter also elaborates on the risks and liabilities associated with complex software systems. Some well-known cases are discussed at the end of the chapter to illustrate the impact of ICT and new media on individuals, business firms,

and social structures. CHAPTER-5 The last chapter concludes the overall study and provides the readers a complete summary of the chapters in relation to the development, use and impact of ICT and New media.

The Diffusion of Information and Communication Technologies Ewa Lechman, 2017-09-27 In recent decades, the world has witnessed, unprecedented in terms of speed and geographic coverage, diffusion of new information and communication technologies (ICT). The on-going digital revolution pervasively impacts and reshapes societies and economies and therefore deserves special attention and interest. This book provides extensive evidence on information and communication technologies development patterns and dynamics of this process across developed economies over the period 1980 to the present day. It adopts newly developed methodology to identification of the 'critical mass' and isolation of technological takeoff intervals, which are intimately related to the process of technology diffusion. The statistically robust analysis of country-specific data demonstrates the key economic, social and institutional prerequisites of ICT diffusion across examined countries, indicating what factors significantly foster or - reversely - hinder the process.

Information and Communications Technology and Operational Efficiency in Supermarkets in Nairobi Josephat Mwebi, 2018-09-26 Thesis (M.A.) from the year 2013 in the subject Business economics - Miscellaneous, grade: 87% (1st), University of Nairobi (Management Science), course: Operations Management, language: English, abstract: The aim of this research was to find out the role of various ICT applications in the improvement of operational efficiency for supermarkets in Nairobi. It aimed to answer the questions of ICT applications that are adopted by supermarkets in Nairobi and the relationship between the level of adoption of these applications and operational efficiency that was attained. A sample of 58 supermarkets was chosen from the list of 110 supermarkets to which structured questionnaires were issued by drop-and-pick method. The forty-two questionnaires were duly filled and returned. This constitutes 72.4% response which according to Stacks (2011) was adequate for use in analysing and presenting findings for the identified research objectives. The findings indicated that applications that were simple and cheap to install and implement such as CCTV cameras, electronic point-of-sale systems and bar code readers were most prevalent while advanced and relatively expensive ICT applications such as ecommerce, supply chain systems and enterprise resource systems were least used. The size of supermarkets also determined ICT equipment that were used. Coefficient of correlation of 0.52 was obtained from the regression analysis that measured the strength of the relationship between dependent and independent variables. The relationship was direct, meaning that supermarkets with largest extent of ICT application in their premises had the highest operational efficiency. It was recommended that supermarket owners acquaint themselves with ICT applications that are available in the market and evaluate those that are suitable for their needs. Supermarkets that had a wide array of application in their premises had high operational efficiency. It is therefore necessary that they use all available ICT applications depending on their needs. Given that some ICT applications were expensive to buy and implement, it was suggested that developers make applications that are suitable for local needs, with regard to supermarkets.

Impact of Foreign Direct Investment (FDI) and Information Communication Technology (ICT) on economic growth Behailu Shiferaw Benti, 2019-08-12 Academic Paper from the year 2018 in the subject Economics - Economic Cycle and Growth, grade: 1.3, University of Wuppertal, language: English, abstract: The main aim and purpose of this seminar is to examine, analyze and present the impact of FDI Inward stock and ICT capital on the economic growth of an economy considering the sample countries. As a general structure, the essay would first give an introduction about economic Globalization and its indicators particularly focusing on FDI and ICT. On the literature review part of the essay, cited definitions and theoretical background of FDI and ICT are presented. In an attempt to strengthen the essay, a brief insight into Economic growth and the linkage between FDI, ICT and economic growth is included. The empirical analysis of this essay investigates econometric relations and presents econometric results from the conducted analysis based on the collected data from the sample countries. Growth accounting approach using supply-side Cobb-Douglas production function is applied to look at the economic impact of growth rate of FDI Inward stock and growth rate of ICT capital on economic growth. The econometric analysis is structured in a way to first look at the separate impacts of the two independent variables on economic growth which is measured by growth rate of real GDP. Secondly, as a final model, the combined impact of the two independent variables on the growth rate of real GDP is presented and discussed. Standard panel data models are applied to investigate the empirical relationship pertaining to the selected BRICS countries (Brazil, Russia, India, China and South Africa). Data collected from year 1995 to 2015 is considered for the forthcoming econometric analysis. Finally, a summary of the work with conclusion and policy recommendation is given.

Advances in ICT and the Likely Nature of Warfare Kritika Roy, 2019-10-08 This book focuses on how advances in ICT have brought about a sea change in the way people work, live and share while also making them vulnerable. These advances exhibit a fundamentally reformed global context for development that has not just been restricted to the civilian domain but has simultaneously impacted the military domain. The exponential pace of advances in the field of Artificial Intelligence (AI), robotics, big data, quantum computing or IoT (Internet of Things) pioneers a significantly different vision of work and society. The current trends in warfighting present a very blurred picture of the future operating environment, but they give some shape to its likely direction. Military forces are trying to become much more flexible and have been adapting to these changes while emphasizing the importance of innovation and improvisation in order to counter challenges emanating from future scenarios. In this context, the book highlights the changing military strategies and tactics across nations vis-à-vis the hanging and emerging ICT technologies. It also highlights the importance of looking at present institutions, legal frameworks and principles as well as at the restraining factors inherent in realpolitik in order to understand if nation states are ready. Information Communication Technology and Poverty Alleviation Jack J. Barry, 2018-07-24 Despite global economic disparities, recent years have seen rapid technological changes in developing countries, as it is now common to see people across all levels of society with smartphones in their hands and computers in their homes. However, does access to Information Communication Technologies (ICTs) actually improve the day-to-day lives of low-income citizens? This book argues that access to the internet can help alleviate poverty, improve development outcomes, and is now vital for realizing many human rights. This book posits that good governance is essential to the realization of inclusive pro-poor development goals, and puts forward policy recommendations that aim to mitigate the complex digital divide by employing governance as the primary actor. In making his argument, the author provides a quantitative analysis of developing countries, conjoined with a targeted in-depth study of Mexico. This mixed method approach provides an intriguing case for how improvements in

the quality of governance impacts both ICT penetration, and poverty alleviation. Overall, the book challenges the neoliberal deterministic perspective that the open market will solve technology diffusion, and argues instead that good governance is the lynchpin that creates conducive conditions for ICTs to make an impact on poverty alleviation. In fact, the digital divide should not be considered binary, rather it is a multifaceted problem where income, education, and language all need to be considered to address it effectively. This book will be useful for researchers/students of development, communication technologies, and comparative politics as well as for development practitioners and policy makers with an interest in how modern technology is impacting the poor in the developing world.
