Playing American Sören Schoppmeier, 2023-10-04 Videogames have always depicted representations of American culture, but how exactly they feed back into this culture is less obvious. Advocating an action-based understanding of both videogames and culture, this book delineates how aspects of American culture are reproduced transnationally through popular open-world videogames. *Playing American* proposes an analytic focus on open-world videogames' ambient operations and traces practices of playing American through the stages of videogame development, gameplay, and reception. Three case studies – concentrating on the Grand Theft Auto, Watch Dogs, and Red Dead Redemption franchises, respectively – highlight different figurations of playing American. Thematic foci range from public discourses on systemic racism and neoliberal capitalism to the justification of real-world surveillance practices and to the reconfiguration of the Western in the digital age. *Playing American* provides those interested in either videogames or American culture with a fresh angle and new concepts regarding its subject matters. It demonstrates that videogames are agents of cultural reproduction that do distinct cultural work for American culture in the twenty-first century.

Welding High-strength Steels P. A. Kammer, David Carl Martin, 1966 Recent studies of the developments in welding steels with yield strengths greater than 150 ksi have included low-alloy martensitic steels, medium-alloy martensitic steels, nickel maraging steels, and bainitic steels. Only weldments from medium-alloy martensitic steels and nickel maraging steels have mechanical properties approaching those of the base plate without a complete postweld heat treatment. The most serious problem with the other steel is low toughness in the weld fusion zone. Adequate weld metal toughness under conditions of elastic strain can be obtained over the entire 150 to 225 ksi yield-strength range only if the tungsten-arc welding process is used. Processes with higher deposition rates can produce comparable weld deposits only in the lower portion of the range. Above a yield strength of 200 ksi, 18Ni maraging steel weldments have the best combination of strength and toughness. Below 200 ksi, the HP 9-4-25 medium-alloy martensitic steel and 12Ni maraging steel weldments have nearly equal properties.

Games and Rules Beat Suter, Mela Kocher, René Bauer, 2019-03-20 Why do we play games and why do we play them on computers? The contributors of »Games and Rules« take a closer look at the core of each game and the motivational system that is the game mechanics. Games are control circuits that organize the game world with their (joint) players and establish motivations in a dedicated space, a »Magic Circle«, whereas game mechanics are constructs of rules designed for interactions that provide gameplay. Those rules form the base for all the excitement and frustration we experience in games. This anthology contains individual essays by experts and authors with backgrounds in Game Design and Game Studies, who lead the discourse to get to the bottom of game mechanics in video games and the real world – among them Miguel Sicart and Carlo Fabricatore.

Colossus Reborn David M. Glantz, 2005 Beyond the battles themselves, Glantz also presents an in-depth portrait of the Red Army as an evolving military institution. Assessing more clearly than ever before the army's size, strength, and force structure, he provides keen insights into its doctrine, strategy, tactics, weaponry, training, officer corps, and political leadership. In the process, he puts a human face on the Red Army's commanders and soldiers, including women and those who served in units - security (NKVD), engineer, railroad, auto-transport, construction, and penal forces - that have till now remained poorly understood.--BOOK JACKET.
