Manual of Vibration Exercise and Vibration Therapy Jörn Rittweger, 2020-05-23 This book addresses the practical aspects of vibration exercise and vibration therapy. In addition, it describes the technical and physiological background, providing applied scientists and doctors with a deeper understanding of the therapeutic potential that vibration exercise holds. Having first emerged two decades ago, vibration exercise has since established itself as a widespread form of physical exercise, used in all rehabilitation areas. The goal of this book is to close the gap between scientific knowledge and practice. Given that occupational exposure to vibration leads to well-known unfavorable effects, the book is also dedicated to potential risks, hazards and contra-indications and of course, the application of vibration therapy in a number of specific conditions is presented in a clinically usable fashion. Given its breadth of coverage, this book will be of interest to physiotherapists and exercise scientists, but also to a wider range of physicians working in the field of rehabilitation.

Sexuality is conditioned by these biological factors and undoubtedly by psychological, cultural, and social elements. Fisiología respiratoria William Cristancho Gómez, 2022-07-19 Muchas veces los contenidos abordados y desarrollados en los complejos escenarios fisiológicos de la economía humana, están provistos de complicadas disertaciones que son, por supuesto, necesarias -incluso, indispensables- desde la perspectiva científica y la práctica segura, confiable y eficiente, pero un poco alejadas de las aplicaciones cotidianas. En razón con estas consideraciones surgió hace varios años, la idea de elaborar un texto guía con los contenidos esenciales de la fisiología respiratoria aplicados a la práctica clínica. Por un lado, para facilitar al estudiante la revisión y apropiación de conocimientos útiles en la comprensión del comportamiento de la función respiratoria en condiciones de normalidad, base del discernimiento de situaciones clínicas que afrontará en el futuro y, por otro lado, para ayudar al clínico en ejercicio a encontrar explicaciones prácticas de temas concretos que habitualmente se enfrentan durante la aproximación diagnóstica y el abordaje terapéutico. Fisiología respiratoria. Lo esencial en la práctica clínica, llega a su cuarta edición después de haber agotado las tres previas. Se han tenido en cuenta los comentarios, críticas y sugerencias de muchos colegas y profesionales de disciplinas conexas para preparar esta edición, conservando el estilo y la metodología de las ediciones anteriores. Presento con el orgullo del padre, pero con la humildad del aprendiz permanente, esta nueva edición, esperando que cumpla los propósitos nobles para los que fue creado.

Pocock, G., Fisiología Humana, 2a ed. ©2005 Gillian Pocock, Christopher D. Richards, 2005 Como en la primera edición el objetivo de los autores de la obra es ofrecer con claridad la explicación de los procesos fisiológicos del cuerpo humano y la de mostrar como se pueden aplicar estos principios al conocimiento de las enfermedades. La obra mantiene la misma estructura que en la edición anterior iniciándose con la descripción de los distintos aspectos de las funciones de las células y los tejidos para continuar después con la descripción de los sistemas corporales incluyendo los sistemas endocrino y nervioso. Todos los capítulos han sido actualizados y se ha incluido más de 50 figuras nuevas. Merece destacar la incorporación de un nuevo capítulo sobre nutrición, las enfermedades nutricionales y su evaluación diagnóstica y la reorganización del apartado relativo a la fisiología de la reproducción que aborda con mayor detalle la fisiología de la gestación. Además se ha ampliado y reestructurado la sección de fisiología clínica en la que se contemplan las modificaciones fisiológicas normales que tiene lugar con el envejecimiento. Asimismo, se ha incluido una sección sobre la meiosis y una exposición más detallada del metabolismo energético. Se trata de una obra centrada en ayudar al estudiante en su aprendizaje. Guías prácticas de fisiología para enfermería Gustavo Javier Borda, Gustavo Rodolfo Altamirano, María Eugenia Victoria Bianchi, 2023-10-08Recordando que la fisiología es una ciencia esencial en la práctica de Enfermería, se adaptan sus contenidos a la disciplina que se estudia. En este texto, se utilizó un enfoque sistémico y casos clínicos al inicio de cada capítulo, que tienen directa relación con aspectos de la práctica profesional. El enfoque sistémico, además, contribuye a comprender que el cuerpo humano es más que la suma de células y tejidos organizados en aparatos: es un todo armónico, que necesariamente dividimos para poder estudiarlo. El libro se divide en capítulos, con un orden lógico, partiendo primero de generalidades, y luego desarrollando aparato por aparato. Es un libro escrito para estudiantes, y en concordancia con

esto, los conceptos complejos se detallan en forma amena y fácil de comprender.... Prólogo Directora de Carrera de Especialización en Docencia Universitaria en Ciencias de la Salud Instituto Universitario CEMIC. CABA. Argentina. Dra Ana Maria Cusumano.

Benefits of medical cannabis in Glaucoma Pharmacology University, 2021-09-23 Glaucoma and cannabis? If the association of the two seems crazy to you, then this ebook is for you. Firstly, what is glaucoma? ... Glaucoma is an eye disease that has among its final consequences the loss of vision, generally bilateral. Statistically speaking, it is one of the leading causes of blindness worldwide. And what does it have to do with cannabis?. Well, during the 1970's, it was observed that regular cannabis users had low intraocular pressure figures. This finding was associated with the theory that medical cannabis could have an especially important beneficial effect for glaucoma patients. Fifty years have passed since this observation, and the issue is still debated today. Vision is one of the most important senses for the daily life of a human being, it is a complex neurological process, susceptible to damage through various mechanisms. For its part, glaucoma is a disease whose medical treatment has not been fully established, and for which various alternative therapies have been proposed, none of which has scientifically proven their effectiveness. The influence of cannabis on intraocular pressure has been a topic of medical interest for decades, so the available scientific information is abundant, although the conclusions are

not entirely consistent. Therefore, its usefulness in management has not been officially established with glaucoma. Despite this, there are observations and findings that describe an interesting role for cannabinoids on the pathological mechanism of glaucoma. In this sense, through this audiobook, a comprehensive tour is offered through some relevant aspects of glaucoma and its presumed relationship with medicinal cannabis. We begin with a recollection of the wonders implicit in the anatomical structure of the eye and in the physiological bases of its normal functioning, to then address the pathological aspects of glaucoma, knowing along the way the processes through which this disease causes an irreversible loss of vision. Having known this, the next thing you will find are the characteristics and functions of the endocannabinoid system in the eye. Did you know of its existence? It is a set of cell receptors susceptible to stimulation by cannabinoids such as THC and CBD, whose effects on the eye are extremely interesting.

Asimismo, las preguntas prácticas al final de cada capítulo evalúan la comprensión de lo que se ha leído y son un método útil para repasar con vistas a los exámenes. - Cuenta con contenido online en inglés accesible a través de Evolve como las animaciones que se han actualizado, destacando la información útil y fomentando el aprendizaje con la presentación visual de funciones y enfermedades.

Benefici della cannabis medica nel glaucoma Pharmacology University, Glaucoma e cannabis? Se ti sembra una follia che possano essere collegati, questo audiolibro fa per te. Primo, cos'è il glaucoma? ...Il glaucoma è una malattia dell'occhio che ha tra le sue conseguenze finali la perdita della vista, generalmente bilaterale. Statisticamente parlando, è una delle principali cause di cecità nel mondo. E cosa ha a che fare con la cannabis? Bene, durante gli anni '70, è stato osservato che i consumatori regolari di cannabis avevano valori di pressione intraoculare. Questa scoperta è stata associata alla teoria secondo cui la cannabis medicinale potrebbe avere un effetto benefico particolarmente importante per il paziente con glaucoma. Sono trascorsi 50 anni da questa constatazione, e la questione è ancora oggi oggetto di dibattito. La vista è uno dei sensi più importanti per la vita quotidiana dell'essere umano, è un processo neurologico complesso, suscettibile di danno attraverso vari meccanismi. Il glaucoma, dal canto suo, è una malattia la cui cura medica non è stata del tutto stabilita e per la quale sono state proposte diverse terapie alternative, nessuna delle quali ha dimostrato scientificamente la loro efficacia. L'influenza della cannabis sulla pressione intraoculare è un argomento di interesse medico da decenni, quindi le informazioni scientifiche disponibili sono abbondanti, sebbene le conclusioni non siano del tutto coerenti, quindi la sua utilità

nella gestione non è stata ufficialmente stabilita. Nonostante ciò, ci sono osservazioni e scoperte che descrivono un ruolo interessante dei cannabinoidi sul meccanismo patologico del glaucoma. In questo modo, in questo audiolibro; Viene offerto un tour completo attraverso alcuni aspetti rilevanti del glaucoma e la sua presunta relazione con la cannabis medicinale. Iniziamo con un resoconto delle meraviglie implicite nella struttura anatomica dell'occhio e nelle basi fisiologiche del suo normale funzionamento, per poi affrontare gli aspetti patologici del glaucoma, apprendendo strada facendo i processi attraverso i quali questa malattia condiziona la perdita irreversibile della vista. Sapendo questo, la prossima cosa che troverai sono le caratteristiche e le funzioni del sistema endocannabinoide nell'occhio. Sapevi della sua esistenza? Si tratta di un insieme di recettori cellulari suscettibili di stimolazione da parte di cannabinoidi come THC e CBD, i cui effetti sull'occhio sono estremamente interessanti. Comprendere questo particolare meccanismo, presente negli occhi e nel corpo umano in generale; Saranno recensiti articoli e autori che mettono in relazione la stimolazione di questo sistema attraverso la somministrazione di cannabinoidi, con la possibile diminuzione della pressione intraoculare e con altri aspetti cellulari e neurologici che potrebbero influenzare la prevenzione della perdita della vista come esito finale del glaucoma. Infine, sono inclusi alcuni aspetti promettenti riguardanti il futuro dell'uso dei cannabinoidi nel trattamento del glaucoma, evidenziando i progressi che hanno avuto luogo nello sviluppo dell'industria della cannabis che consentono di superare gli ostacoli oggi esistenti e che impediscono i derivati di questa pianta affermarsi come alternativa terapeutica ufficialmente riconosciuta per la gestione e il controllo di questa malattia. Se sei interessato a saperne di più su questa affascinante malattia degli occhi e su come la cannabis potrebbe migliorare le aspettative di chi ne soffre, ti invitiamo a goditi questo audiolibro che Pharmacology University ti offre.

Benefícios da cannabis medicinal no glaucoma Pharmacology University, 2021-10-27 Glaucoma e cannabis? Se você pensa que eles não podem estar relacionados, este audiolivro é para você. Primeiro, o que é glaucoma? ... Glaucoma é uma doença ocular que tem entre suas consequências finais a perda de visão, geralmente bilateral. Estatisticamente falando, é uma das principais causas de cegueira em todo o mundo. E o que isso tem a ver com a cannabis. Bom, Durante a década de 1970, observou-se que usuários regulares de cannabis tinham baixos níveis de pressão intraocular. Essa descoberta foi associada à teoria de que a cannabis medicinal pode ter um efeito benéfico especialmente importante para pacientes com glaucoma. 50 anos se passaram desde essa observação, e a questão permanece em debate até hoje. A visão é um dos sentidos mais importantes para o cotidiano do ser humano, é um processo neurológico complexo, suscetível a danos por vários mecanismos. Por sua vez, o glaucoma é uma doença cujo tratamento médico não está totalmente estabelecido e para a qual foram propostas várias terapias alternativas, nenhuma das quais provou cientificamente a sua eficácia. A influência da cannabis na pressão intraocular tem sido um tema de interesse médico por décadas, portanto, as informações científicas disponíveis são abundantes, embora as conclusões não sejam totalmente consistentes, de modo que sua utilidade no manejo não foi

oficialmente estabelecida. Apesar disso, há observações e achados que descrevem um papel interessante dos canabinóides no mecanismo patológico do glaucoma. Desta forma, neste audiolivro; é possível encontrar alguns aspectos relevantes do glaucoma e sua relação com a cannabis medicinal. Começamos com uma descrição da estrutura anatômica do olho e nas bases fisiológicas de seu funcionamento normal, para depois abordar os aspectos patológicos do glaucoma, aprendendo ao longo do caminho os processos pelos quais essa doença leva à perda irreversível da visão. Depois, você encontrará as características e funções do sistema endocanabinóide no olho. Você sabia de sua existência? É um conjunto de receptores celulares suscetíveis à estimulação por canabinóides como o THC e o CBD, cujos efeitos no olho são extremamente significativos. Compreendendo esse mecanismo especial, presente nos olhos e no corpo humano em geral; são revisados artigos e autores que relacionem a estimulação desse sistema por meio da administração de canabinóides, com a possível diminuição da pressão intraocular e com outros aspectos celulares e neurológicos que poderiam influenciar na prevenção do glaucoma e sua consequente perda da visão. Por fim, são incluídos alguns aspectos promissores quanto ao futuro do uso de canabinóides no tratamento do glaucoma, destacando os avanços ocorridos no desenvolvimento da indústria da cannabis que permitem superar os obstáculos existentes e que impedem os derivados desta planta estabelecer-se como alternativa terapêutica oficialmente reconhecida para o manejo e controle desta doença. Se você está interessado em saber mais sobre doença ocular e como a cannabis pode melhorar as expectativas de quem a sofre, nós o convidamos a desfrutar deste audiolivro que a Pharmacology University traz para você.
