A Study on Suicide Jianjun Li,2019-11-26 This book systematically presents and classifies the latest advances in suicide research in contemporary China, examines the status quo of suicides in China and analyzes the reasons for suicides among three high-risk groups, namely: rural females, teenagers, and the elderly. It reveals the deep-seated influence of traditional Chinese values and socio-cultural customs on suicide and puts forward a way to prevent suicide. This book argues that high suicide rates stem from flaws in the social fabric. Effectively reducing suicide rates and mitigating the damage done by suicide as a social disease is not only the responsibility of the state government, but also that of social, educational and medical professionals.

Searching for Words: How Can We Tell Our Stories of Suicide ,2019-01-04 This volume was first published by Inter-Disciplinary Press in 2013. It is all too easy to begin the introduction of a book examining suicide by citing statistics on rates of death around the world. The vast majority of research seeks to make sense of suicide through quantitative analysis; however, this does not begin to do justice to the lived experience. While we do not wish to suggest there is one 'right' lens through which to study suicide, we must recognize that there are myriad lenses through which to examine it. There are many voices, many stories that must be heeded, and these stories are not just of the people who have themselves died by suicide, but also those who are or have been suicidal and those who have been bereaved by suicide. By examining cultural perspectives, different media, memory and place, as well as loss, this book aims to tell stories of suicide and working and living with the suicidal.

Japan: A Documentary History David J. Lu, 2016-12-14 An updated edition of David Lu's acclaimed *Sources of Japanese History*, this book presents in a student-friendly format original Japanese documents from Japan's mythological beginnings through 1995. Covering the full spectrum of political, economic, diplomatic as well as cultural and intellectual history, this classroom resource offers insight not only into the past but also into Japan's contemporary civilisation. Three major criteria used in the document selection were that: the selection avoids duplication with other collections - 75% of the documents presented here are newly translated; a document accurately reflects the spirit of the times and the life-styles of the people; and emphasis is on the development of social, economic and political institutions.

Scripting Suicide in Japan Kirsten Cather, 2024-10-15 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Japan is a nation saddled with centuries of accumulated stereotypes and loaded assumptions about suicide. Many pronouncements have been made about those who have died by their own hand, without careful attention to the words of the dead themselves. Drawing upon far-ranging creations by famous twentieth- and twenty-first-century Japanese writers and little-known amateurs alike—such as death poems, suicide notes, memorials, suicide maps and manuals, works of literature, photography, film, and manga—Kirsten Cather interrogates how suicide is scripted and to what end. Entering the orbit of suicidal writers and readers with care, she shows that through close readings these works can reveal fundamental beliefs about suicide and, just as crucially, about acts of writing. These are not scripts set in stone but graven images and words nonetheless that serve to mourn the dead, straddling two impulses: to put the dead to rest and to keep them alive forever. These words reach out to us to initiate a dialogue with the dead, one that can reveal why it matters to write into and from the void.

The Anatomy of Loneliness Chikako Ozawa-de Silva, 2021-12-07 Loneliness is everybody's business. Neither a pathology nor a rare affliction, it is part of the human condition. Severe and chronic loneliness, however, is a threat to individual and public health and appears to be on the rise. In this illuminating book, anthropologist Chikako Ozawa-de Silva examines loneliness in Japan, focusing on rising rates of suicide, the commodification of intimacy, and problems impacting youth. Moving from interviews with college students, to stories of isolation following the 2011 natural and nuclear disasters, to online discussions in suicide website chat rooms, Ozawa-de Silva points to how society itself can exacerbate experiences of loneliness. A critical work for our world, *The Anatomy of Loneliness* considers how to turn the tide of the "lonely society" and calls for a deeper understanding of empathy and subjective experience on both individual and systemic levels.

Oxford Textbook of Suicidology and Suicide Prevention Danuta Wasserman, 2021 Part of the authoritative Oxford
Textbooks in Psychiatry series, the new edition of the Oxford Textbook of Suicidology and Suicide Prevention remains a key
text in the field of suicidology, fully updated with new chapters devoted to major psychiatric disorders and their relation to
suicide.

Rational Suicide, Irrational Laws Susan Stefan, 2016-02-25 When should we try to prevent suicide? Should it be facilitated
for some people, in some circumstances? For the last forty years, law and policy on suicide have followed two separate and
distinct tracks: laws aimed at preventing suicide and, increasingly, laws aimed at facilitating it. In *Rational Suicide, Irrational
Laws* legal scholar Susan Stefan argues that these laws co-exist because they are based on two radically disparate
conceptions of the would-be suicide. This is the first book that unifies policies and laws, including constitutional law, criminal
law, malpractice law, and civil commitment law, toward people who want to end their lives. Based on the author's expert
understanding of mental health and legal systems, analysis of related national and international laws and policy, and surveys
and interviews with more than 300 suicide-attempt survivors, doctors, lawyers, and mental health professionals, *Rational
Suicide, Irrational Laws* exposes the counterproductive nature of current policies and laws about suicide. Stefan proposes
and defends specific reforms, including increased protection of mental health professionals from liability, increased
protection of suicidal people from coercive interventions, reframing medical involvement in assisted suicide, and focusing on
approaches to suicidal people that help them rather than assuming suicidality is always a symptom of mental illness. Stefan
compares policies and laws in different states in the U.S. and examines the policies and laws of other countries in Europe,
Asia, and the Americas, including the 2015 legalization of assisted suicide in Canada. The book includes model statutes,
seven in-depth studies of people whose cases presented profound ethical, legal, and policy dilemmas, and over a thousand
cases interpreting rights and responsibilities relating to suicide, especially in the area of psychiatric malpractice.

The Revolution Will Not Be Downloaded Tara Brabazon, 2008-01-31 This book attacks the often implicit and damaging
assumption that 'everyone' is online and that 'everyone' is using online resources within the specified parameters of
employers, government and national laws. This book summons a critical Web Studies, asking not only who is using particular

applications, but also how and why. This remedial work is required. The concept and label of 'Web 2.0' is part of a wide-ranging suite of assumptions that offer simple answers to difficult questions. The term captures a desire for online collaboration and the sharing of information, performed most visibly through blogs, podcasts and wikis. Other 'products' that capture the Web 2.0 ideology include Google Maps, Facebook, MySpace and Flickr. Within this framework, websites no longer hold information but become a platform to connect applications with users. The business applications have gained the most attention - particularly content syndication - but there are also 'political' initiatives overlaying this project including open communication, the sharing of data and the deep linking of web architecture. - Development of innovative concepts and models to manage the digital divide - Evocative studies of the digitally excluded and downloading communities - Attention to digital literacy and online education

Pacific Exposures Melissa Miles, Robin Gerster, 2018-12-19 Photography has been a key means by which Australians have sought to define their relationships with Japan. From the fascination with all things Japanese in the late nineteenth century, through the era of 'White Australia', the bitter enmity of the Pacific War, the path to reconciliation in the post-war period and the culturally complicated bilateralism of today, Australians have used their cameras to express a divided sense of conflict and kinship with a country that has by turns fascinated and infuriated. The remarkable photographs collected and discussed here for the first time shed new light on the history of Australia's engagement with its most important regional partner. *Pacific Exposures* argues that photographs tell an important story of cultural production, response and reaction—not only about how Australians have pictured Japan over the decades, but how they see their own place in the Asia-Pacific. 'Pacific Exposures presents the first study of the photographic exchanges between Australia and Japan—its photographers, personalities, motivations, anxieties and tensions—based on a diverse range of archival materials, interviews, and well-chosen photographs.' — Dr Luke Gartlan, University of St Andrews '[Pacific Exposures] will become a key text on Australia's interactions with Japan, and the way that photographs can inform cross-cultural relations through their production, consumption and circulation.' — Prof. Kate Darian-Smith, University of Tasmania

Suicide Derek Beattie, Dr Patrick Devitt, 2015-03-01 When is it okay for a person to kill themselves? How have ideas about this changed over time, and how do they differ across cultures? How do Ireland's suicide rates, especially among its young men, compare to rates in other countries in Europe and beyond? Are we obsessed today with the idea of suicide? Is it possible to prevent suicide - and, if so, how? Should we try to prevent all suicides, or are there some that we should allow, regulate, even assist? Might some suicides be rational? How are families affected by suicide? What can they do if a family member is suicidal? How can they cope after a suicide? Are doctors able to identify which pregnant women are at high risk of killing themselves? Would allowing these women to have abortions make them less likely to kill themselves? In this wide-ranging review and analysis of historical and scientific research on the topic of suicide, authors Derek Beattie and Dr Patrick

Devitt take an unflinching and often chillingly rational look at these questions and many others.

Suicide John Bateson, 2024-09-03 An urgent call to action on a rising—and preventable—trend. Each year in the United States alone, nearly 50,000 individuals die by suicide; more than 1.2 million others attempt it. John Bateson, former executive director of a suicide prevention center, examines this national tragedy from multiple angles while debunking common myths, sharing demographic data, and identifying risk factors and warning signs. Suicide provides essential information about the current landscape surrounding suicide in the United States as well as strategies to prevent further tragedy. Bateson emphasizes that the rise in suicide and attempted suicide is not only a mental health issue affecting individuals but also an urgent problem for society at large. He discusses suicide in parks, prisons, and the military, as well as assisted suicide, suicide by cop, and murder-suicide. In particular, he details the stark relationship among guns, drugs, jump sites, and suicide, focusing on one of the most effective ways to prevent suicide—restricting access to lethal means. In addition to presenting practical information for identifying people at risk of suicide, Bateson details important steps that individuals, businesses, and the government can take to end this public health problem.

Routledge Handbook of Contemporary Japan Hiroko Takeda, Mark Williams, 2020-09-21 The Routledge Handbook of Contemporary Japan presents a synthesized, interdisciplinary study of contemporary Japan based on up-to-date theoretical models designed to provide readers with a comprehensive and full understanding of the dynamics of contemporary Japan. In order to achieve this, the Handbook is organized into two parts. Part I, 'Foundations', clarifies the state of contemporary Japan topic by topic by referring to the latest theoretical developments in the relevant disciplinary fields of politics, international relations, economy, society, culture and the personal. Part II, 'Issues', then offers a series of concrete analyses building upon the theoretical discussions introduced in Part I to help undergraduate and postgraduate students learn how to conduct independent analysis. Locating Japan in a comparative and interdisciplinary perspective, this Handbook is an essential resource for students and scholars interested in Japanese studies, Asian studies and global studies.

Anti-nuclear Protest in Post-Fukushima Tokyo Alexander Brown, 2018-04-19 This book explores the politics of anti-nuclear activism in Tokyo after the Fukushima nuclear disaster of March 2011. Analyzing the protests in the context of a longer history of citizen activism in Tokyo, it also situates the movement within the framework of a global struggle for democracy, from the Arab Spring to Occupy Wall Street. By examining the anti-nuclear movement at both urban and transnational scales, the book also reveals the complex geography of today's globally connected social movements. It emphasizes the contestation of urban space by anti-nuclear activists in Tokyo and the weaving together of urban and cyber space in their praxis. By focusing on the cultural life of the movement—from its characteristic demonstration style to its blogs, zines and pamphlets—this book communicates activists' voices in their own words. Based on excellent ethnographic research, it concludes that the anti-nuclear protests in Tokyo after the Fukushima disaster have redefined social movement

politics for a new era. Providing an analysis of a unique period in Japan's contemporary urban history from the perspective of eyewitness observations, this book will be useful to students and scholars of Japanese Politics, Sociology and Japanese Studies in general.

Japan: A Documentary History: Vol 2: The Late Tokugawa Period to the Present David J. Lu, 2015-03-04 An updated edition of David Lu's acclaimed *Sources of Japanese History*, this two volume book presents in a student-friendly format original Japanese documents from Japan's mythological beginnings through 1995. Covering the full spectrum of political, economic, diplomatic as well as cultural and intellectual history, this classroom resource offers insight not only into the past but also into Japan's contemporary civilisation. This volume covers from the late 18th century up to 1995. Three major criteria used in the document selection were that: the selection avoids duplication with other collections - 75% of the documents presented here are newly translated; a document accurately reflects the spirit of the times and the life-styles of the people; and emphasis is on the development of social, economic and political institutions.

Mental Health in the Digital Age Dr Elias Aboujaoude, Dr Vladan Starcevic, 2015-04-01 The Internet and related technologies have reconfigured every aspect of life, including mental health. Although the negative and positive effects of digital technology on mental health have been debated, all too often this has been done with much passion and few or no supporting data. In *Mental Health in the Digital Age*, Elias Aboujaoude and Vladan Starcevic have edited a book that brings together distinguished experts from around the world to review the evidence relating to this area. The first part of the book addresses threats resulting from the growing reliance on, and misuse of, digital technology; it also looks at how some problematic behaviors and forms of psychopathology have been shaped by this technology. This section reviews problematic Internet and video game use, effects of violent video games on the levels of aggression and of online searches for health-related information on the levels of health anxiety, use of digital technology to harm other people, and promotion of suicide on the Internet. The second part of *Mental Health in the Digital Age* examines the ways in which digital technology has boosted efforts to help people with mental health problems. These include the use of computers, the Internet, and mobile phones to educate and provide information necessary for psychiatric treatment and to produce programs for psychological therapy, as well as use of electronic mental health records to improve care. *Mental Health in the Digital Age* is a unique and timely book because it examines comprehensively an intersection between digital technology and mental health and provides a state-of-the-art, evidence-based, and well-balanced look at the field. The book is a valuable resource and guide to an area often shrouded in controversy, as it is a work of critical thinking that separates the hype from the facts and offers data-driven conclusions. It is of interest particularly to mental health professionals, but also to general audience.

I Know Who You Are and I Saw What You Did Lori Andrews, 2012-01-10 Hailed as "stunning" (New York Post), "authoritative" (Kirkus Reviews), and "comprehensively researched" (Shelf Awareness), a shocking exposé of the widespread

abuses of our personal online data by a leading specialist on Web privacy. Social networks, the defining cultural movement of our time, offer many freedoms. But as we work and shop and date over the Web, we are opening ourselves up to intrusive privacy violations by employers, the police, and aggressive data collection companies that sell our information to any and all takers. Through groundbreaking research, Andrews reveals how routinely colleges reject applicants due to personal information searches, robbers use vacation postings to target homes for break-ins, and lawyers scour our social media for information to use against us in court. And the legal system isn't protecting us—in the thousands of privacy violations brought to trial, judges often rule against the victims. Providing expert advice and leading the charge to secure our rights, Andrews proposes a Social Network Constitution to protect us all. Now is the time to join her and take action—the very future of privacy is at stake. Log on to www.loriandrews.com to sign the Constitution for Web Privacy.

Ecological and Social Determinants of Suicidal Behavior S. M. Yasir Arafat, Sujita Kumar Kar, 2025-06-12 This book discusses the association between ecological and social determinants and suicidal behavior. Suicidal behavior is an extremely complex human behavior. It is an outcome of complex interactions among multiple factors like gene and environment, biopsychosocial, proximal and distal factors. Several risk factors such as psychiatric disorders, life events, social deprivation, personality traits and disorders, and substance abuse have been identified even though those vary based on culture, time, country, and methods of assessment. In recent times, evidence has shown associations among ecological variables like the human development index, the income of the country, the GINI index, educational attainment, the green environment, climate change, and suicidal behavior. At the same time, there are interlinked confounding variables that challenge the findings. Given the lack of literature discussing these findings, this book seeks to compare and contrast the ecological aspects and suicidal behavior holistically.
