This 96-page book features two short, reproducible activities per page and includes enough lessons for an entire school year. It covers topics such as inverse multiplication, using tables, dividing by multiples of 10, averages and factors, understanding patterns, decimals and fractions, solving problems, and working with reciprocals. Activities become more challenging as students build upon what they have learned. The book is perfect for review and practice and supports NCTM standards.

*The Times Machine!* Danica McKellar, 2020-06-30 Learn at home with help from The Wonder Years/Hallmark actress, math whiz, and New York Times bestselling author Danica McKellar using her acclaimed McKellar Math books! A revolutionary and FUN way for 2nd to 5th graders to memorize multiplication facts outside of the classroom is finally here! Join Mr. Mouse and Ms. Squirrel and experience an entirely new way of memorizing multiplication facts. *Response to Intervention and Precision Teaching* Kent Johnson, Elizabeth M. Street, 2012-11-29 Successful implementation of response to intervention (RTI) for academic skills problems requires rigorous progress monitoring. This book shows how the proven instructional technology known as precision teaching (PT) can facilitate progress monitoring while building K-12 students' fluency in reading, writing, math, and the content areas. Detailed instructions help general and special education teachers use PT to target specific skills at all three tiers of RTI, and incorporate it into project-based learning. Of crucial importance for RTI implementers, the book provides explicit procedures for measuring and charting learning outcomes during each PT session, and using the data to fine-tune instruction. Reproducible charts and other useful tools can be downloaded and printed in a convenient 8 1/2 x 11 size.
