The ECIS International Schools Directory 2009/10 Derek Bingham,2009-09 The 'ECIS International Schools Directory 2009/10' contains up-to-date facts on more than 800 schools worldwide and comprehensive details of over 570 of them which are ECIS members.

The International Baccalaureate Ian Hill,Mary Hayden,2010 Volume 4: Dr Ian Hill, Deputy Director General of the IB, charts the history of the organisation and the goal to create, develop and implement a truly international curriculum and qualification.

International Schools Mary Hayden,Jeff Thompson,2016-03-01 The foundation of the first international schools of the modern era well over a century ago, and their burgeoning growth over recent years, provides the context in this book for a series of personal perspectives written by some of those who have been involved centrally in their development. As the schools themselves have increased not only in number and geographical distribution but also in diversity of style and ownership, so have a range of complex issues arisen relating to their fundamental purposes, the curricula that they choose (what should be taught and what should be learned), the nature of their organization (including leadership and management), and their potential contributions in responding to a perceived global need and in influencing the promotion of international education in national systems of schools. The distinguished group of authors contributing to this volume identify the current issues surrounding the rapid evolution of international schools and likely future directions of development, based on their own impressive personal and professional experience of the sector. That both comparative and international education genres are to be found in approaches taken in the various chapters means that the book will be of interest and value not only to teachers in international schools, but also to those working in national schools and to researchers in colleges and universities worldwide.

**International Schools and International Education** Patricia L. Jonietz,Duncan Harris,2005-12-08 Published in the year 2005, World Yearbook of Education 1991 is a valuable contribution to Major Works.

International Education and Schools Richard Pearce,2013-10-24 Over the last forty years, the estimated number of international schools worldwide has increased from fewer than 300 to 6400 in 2012. This explosion is a response to the needs

of a world in which borders are being traversed with ever greater ease and children increasingly need to be prepared for the global opportunities that await them. In this book, international school specialists reflect on where the movement has come from, how it stands and where developments are heading, offering insightful observations on these unique institutions. This is a comprehensive resource for students, researchers and professionals with an interest in the future of education in a globalized world.

The Global Imaginary of International School Communities Heather A. Meyer, 2021-05-07 This book offers a new perspective into the world of international schools and the lucrative industry that accompanies it. It examines how the notion of the 'global' becomes a successful commodity, an important social imaginary and a valuable identity marker for these communities of privileged migrants and host country nationals. The author invites the reader on an ethnographic journey through an international school community located in Germany – illuminating the central features that define and maintain the sector, including its emphasis on 'globality', engagement with the concept of 'Third Culture Kid', and its wider contentious relationship with the 'local'. While much attention is placed on 'global citizenship', international school communities experience degrees of isolation, limited mobility, over-protection and dependency on the school community-impacting their everyday lives, inside and outside the school. This book is guided by larger questions pertaining to the education and mobilities of 'migrant' youths and young adults, as well as the notion of what it means to be 'global' today.

*Bilingualism in International Schools* Maurice Carder, 2007-01-10 International Schools have developed since their inception from a largely native English-speaking student body to schools such as the author's, the Vienna International School (VIS), where there are students of 90 nationalities with 65 mother tongues. Maurice Carder proposes a "three-programme model" for addressing the language and curricula needs of these students: a content-based second language programme; a programme of cultural and linguistic training for all staff; and a mother tongue programme for minority students. The model is based on research findings and practice: at the VIS every year approximately 1/3 of the graduating students gain an IB Diploma (International Baccalaureate) because they are able to take their mother tongue (other than English or German) as Language A1. The book contains insightful chapters not only for school leaders, programme designers and teachers, but also for parents. Inserted boxes of student responses give an authentic voice to the needs of second language learners, and many useful resources and websites are given.

**Diversity and Inclusion Challenges for Leaders of International Schools** Barker, Megel Ricardo, Hammer, Liam Leslie, 2024-12-02 Leaders of international schools face complex challenges when it comes to facilitating diversity and inclusion within their communities. With students, faculty, and staff from a wide range of cultural, linguistic, and socio-economic backgrounds, school leaders must create an environment where everyone feels valued, respected, and included. This challenge is increased by various cultural expectations, differing educational norms, and the need to balance global

perspectives within local communities. Effective leadership in these schools requires a better understanding of the diverse needs of the community, a commitment to equity, and the ability to implement policies and practices that promote inclusion across all levels of the school environment. *Diversity and Inclusion Challenges for Leaders of International Schools* offers solutions for academic leaders to improve diversity, equity, and inclusion within their schools. Through examples from international schools and educational platforms, it examines the challenges faced by educators across various cultures and communities. This book covers topics such as discrimination, student protection, and educational policy and reform, and is a useful resource for policymakers, educators, sociologists, academicians, researchers, and scientists.

*International Schools and International Education* Mary Hayden, Jeff Thompson, 2013-04-15 This work tackles the issues that staff and management of international schools need to address in order to ensure that their teaching and organization is of a high standard and quality. It contains a wide range of contributions from international school experts around the world.

Effective Learning Support in International Schools Martha Haldimann, Angela Hollington, 2004 This helpful book addresses the issues of special educational needs within the context of international schools. It examines proven means of setting up effective learning support at international schools, providing an invaluable resource for school administrators as well as teachers and parents.

For those who are new to the field it provides an excellent introduction. To tackle such varied subjects... needed a professional of wide expertise, wisdom and clarity of composition. These Mary Hayden, with her vast experience of international education and research, provides... highly recommended' - is (International Schools Magazine) 'Essential reading for everyone involved in international education' - International Schools Worldwide 'The first thing to be said about this informative book is that it's a good read! I found myself enjoying every page as the author has a writing style that is engaging and instructive...The book has something for everyone,

from those experienced in the field of international education to interested novices' - International Schools Journal Interest in the field of international education has never been more intense, and a rapidly expanding number of schools and organizations worldwide now offer curricula that claim to be international in nature. Written by an expert in the field of international education, this comprehensive guide examines the key themes of this evolving field. The book explores the various origins, definitions and classifications of international education, and considers the audiences it serves, including the students, teachers, parents and administrators. It also looks at issues including quality assurance and role of international schools in the future. This valuable book will be an excellent source of reference to academics, those engaged in postgraduate study and practising teachers.

**The Changing Landscape of International Schooling** Tristan Bunnell, 2014-06-27 The number of English-medium international schools that deliver their curriculum wholly or partly in the English language reportedly reached 6,000 in January 2012. It is anticipated this number will rise to over 11,000 schools by 2022, employing over 500,000 English-speaking teachers. The number of children being taught in these schools reportedly reached 3 million in March 2012. Alongside this phenomenal growth the landscape of international schooling has changed fundamentally, moving away from largely serving the children of the expat and globally mobile business community and Embassies, towards serving the 'local' children of the wealthy and emerging middle-class. This has been reflected in the shift away from non-profit ownership by the school community towards ownership by for-profit companies and proprietors. In this book, Tristan Bunnell explores the changing landscape of international schooling and discusses the implications of these changes, both in terms of theoretically conceptualizing the scale, nature and purpose of the field, and in terms of practically serving and administering the growing industry that international education is becoming. The Changing Landscape of International Schooling will be worthwhile reading for researchers, academics and students of international schooling, leaders and teachers in international schools, and those interested in the broader development of international education.

**International Education in Practice** Mary Hayden, Jeff Thompson, George Walker, 2003-12-16 Edited by three leading figures in the field, this book offers an absolutely authoritative interpretation of international education today. Under the umbrella of groups such as the International Baccalaureate Organization, academic research, increasing student numbers and interest from national school systems, international schools are rapidly developing in terms of curriculum, standards and influence. This book brings together present thinking on all aspects of international education, its management and the best practices. Truly international in scope, this is a book that anyone involved with international education should read.

**International Higher Education in Citizen Diplomacy** Shingo Hanada, 2022-10-20 This volume presents the impacts of international higher education on citizen diplomacy. Based on the assumption that international higher education is a key driving factor of citizen diplomacy, the empirical studies in this book examine the learning outcomes of five mobility

programs of international higher education(inbound study abroad, outbound study abroad, international service-learning, international internship, and online study abroad) in cultivating students' intercultural competence, empathy and goodwill towards people in the host country. It contributes to increasing awareness of international higher education by providing insights about its functions in citizen diplomacy.
