International Agreements between Non-State Actors as a Source of International Law Melissa Loja, 2022-09-22 This book examines whether international agreements between non-state actors can be identified as a source of international law using objective criteria. It asks whether, beyond Article 38 of the Statute of the International Court of Justice, there is a system of rules, processes, beliefs or semantics by which these agreements can be objectively identified as a source of international

law. Departing from the more usual state-centric analysis, it adopts postmodern legal positivism as its analytical tool. This allows for the reality that international law-making takes place in subjective social landscapes. To test the effectiveness of this approach, it is applied to agreements between petroleum agencies and corporations which allow two or more states to exploit disputed resources across boundaries looking in particular at arrangements involving China, Vietnam and the Philippines. By so doing it illustrates an alternative way that states can manage disputes, without having to resort to conflict. It will appeal to both scholars and practitioners of public international law, as well as civil servants.

Lake Eyre Basin Rivers Richard Kingsford,2017-12 Water is scarce in the Lake Eyre Basin in the heart of Australia. The region goes through natural cycles of boom and bust, and the flooding of the basin rivers is accompanied by spectacular responses from wildlife and vegetation. However, the Lake Eyre Basin faces the threat of diversion of water from rivers and wetlands and development of floodplains for irrigation and mining. Around the world, such water resource developments have caused widespread degradation of rivers and loss of habitats. Lake Eyre Basin Rivers outlines the environmental, social and economic values of the rivers from a diverse range of perspectives, including science, tourism, economy, engineering, policy, Traditional Owners and pastoralists. It describes the current state of the environment and the past and ongoing threats to the river systems, drawing on stories from the Murray-Darling Basin. It also provides direction for ensuring that the rivers remain free-flowing to service the environment and future generations. This book is a valuable reference for environment and government agencies, industries and policy-makers concerned with the region and will be of interest to the communities of the Lake Eyre Basin.

Managing Urban Rivers Victor R. Shinde,Rajiv Ranjan Mishra,Uday Bhonde,Hitesh Vaidya,2023-09-23 Managing Urban Rivers: From Planning to Practice captures the different facets of river management required for integrating rivers within the development landscape of cities in a sustainable manner. Sections cover the entire spectrum of urban river management, from planning to actual on-the-ground implementation, providing a one-stop destination for knowledge on urban river management. Edited by a team of four experts with practical experience in this domain, the different chapters of the book are authored by eminent scholars and practitioners with expertise in specific areas of urban river management. Urban rivers and their management is a hot topic as governments across the world are focusing on this aspect, especially since it has direct implications for SDG target 6.6, which aims to protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes. - Presents practical, global case studies in almost every chapter - Provides recommendations for best practices, based on lessons from different successful case studies, as well as the expert insights of the authors - Features contributions from global experts for a unique and specialized approach to the topic of urban rivers

Inter-state Water Law in the United States of America Rhett Larson, 2017-09-18 The rich field of inter-state water law in the United States illustrates both successes and failures in transboundary water management and allocation. In *Inter-state Water Law in the United States of America: What Lessons for International Water Law?*, this domestic field of transboundary water law is compared and contrasted with international transboundary water law. This analysis is accompanied by a discussion and evaluation of the different cases of shared watercourses that applied these approaches, and a comparison of each of them to similar approaches in international water law. The analysis draws lessons for international water law from inter-states water law - highlighting the successful inter-states approaches that can be adopted by international water law, as well as the approaches that failed, and which should be avoided.

Design Resilience in Asia Oscar Carracedo García-Villalba, Mia M. Bennett, 2022-03-25 The book is organized according to 'seven inspirations' – seven ideas – and presents a collection of theoretical essays and a set of provocative and innovative solutions to design, plan and build urban resilience in uncertain and unpredictable scenarios. Led by the National University of Singapore School of Design and Environment, presents the research by design results of four consecutive years in four different countries (China, Philippines, Indonesia and Thailand) responding to the current challenge of building more resilient cities in front of impacts of climate change, such as coastal and river flooding, water and air pollution, water scarcity, urban heat island effect, aquifer depletion or subsidence. The book brings together the work of highly-reputed academics, professionals and scholars from 20 universities worldwide with the aim of serving as a guide for mitigating and adapting to the effects of climate change, and more specifically to reinstating the environmental qualities of our cities through carbon-neutral or carbon net-positive urban designs and plans.
