The Pedagogies of Cultural Studies Andrew Hickey,2016-03-31 This volume provides an exploration of the manifold ways pedagogy is enacted in cultural studies practice. Pedagogy in the book comes to stand as far more than simply the art of teaching; contributors explore how pedagogy defines and shapes their practice as cultural studies scholars. Chapters variously highlight the role of pedagogy in cultural studies practice, including formal, classroom situations where cultural studies is deployed to teach as part of degree or coursework programs, but importantly also as something removed from the formal classroom, as situated within the research act via public engagement or through social activism as a public pedagogy. In so doing, the book chart a course for understanding cultural studies as an active and engaged discipline interested in understanding cultural flows and production as sites of learning and exchange.

Teaching the Discipline of History in an Age of Standards Jennifer Clark,Adele Nye,2018-06-08 This book discusses the discipline standards of History in Australian universities in order to help historians understand the Threshold Learning Outcomes and to assist in their practical application. It is divided into two sections: The first offers a scholarly exploration of contemporary issues in history teaching, while the second section discusses each of the Threshold Learning Outcomes and provides real-world examples of quality pedagogical practice. Although the book focuses on the discipline of history in Australia, other subjects and other countries are facing the same dilemmas. As such, it includes chapters that address the

international context and bring an international perspective to the engagement with discipline standards. The innovation and leadership of this scholarly community represents a new stage in the transformation and renewal of history teaching.

Ethics and Business Paul C. Godfrey, Laura E. Jacobus, 2022-12-15 Ethics & Business: An Integrated Approach for Business and Personal Success, 1st Edition, International Adaptation gives students the practical knowledge and skills to identify ethical dilemmas, understand ethical behavior in themselves and others, and advocate for ethical behavior within their organization. The course focuses on three ethical questions: the individual, the organization, and the societal perspective. These questions and views explore different areas of business ethics, such as the use and abuse of power, challenges to honesty and integrity, and participation in ethical interventions such as reporting, repair, forgiveness, and reconciliation. Most business ethics courses are based on a single point of view. Depending on the viewpoint, this might be based on philosophical theory, organizational behavior, or a legal and regulatory compliance approach. As an author team, we combine and integrate these points of view into a unified whole by incorporating unique content, original videos, and adaptable case studies to assist students in making ethical decisions in their professional and personal lives. This International Adaptation explores different areas of business ethics, such as the use and abuse of power, challenges to honesty and integrity, and participation in ethical interventions such as reporting, repair, forgiveness, and reconciliation. Every chapter now includes new questions to help readers test their understanding of the subject. There is also new mini cases that are contemporary and more relevant to the global scenario.

Angels in the Silicon Richard Theodor Kusiolek, 2012-12 Meet Thaddeus Sikorski, a herculean third-generation American, courageous, persevering, and surprisingly steadfast father of this tragic odyssey to love and protect his angel children. After losing his first love, 18-year-old Thad enlist, and goes on to become a Vietnam War combatant, a San Francisco progressive street revolutionary, a graduate business student, an Internet-related technology visionary, husband, and a global business leader. In between entrepreneurial misadventures, he manages to save the life of an American President, struggles with a psychopathy attorney and murderer, discovers the truth about Silicon Valley's justice system, experiences the economic hollowing out brought on by the outsourcing of Silicon Valley technologies, and survives the emotions of remaining true to his love for his children. This extraordinary journey travels through three decades of the American technology and cultural landscape. Author Richard Kusiolek paid much attention to the details of everyday life of an entrepreneur in Silicon Valley. Angels in the Silicon encapsulates the experience of living in Silicon Valley for three decades of rapid technology progress, economic change, and a politically correct progressive judiciary. • The novel, Angels in the Silicon, has a powerful American story to tell. • You will learn the naked truth of living in Northern California's Silicon Valley.

Cultures of Work, the Neoliberal Environment and Music in Higher Education Sally Macarthur, Julia Szuster, Paul Watt, 2024-03-29 This edited book considers the impact of neoliberalism on music teaching, research and scholarship in a higher education context. As a subject that bears little resemblance to other university practical disciplines, and fares poorly in a model driven by economics, the book considers whether musicology is a 'public good' or a threatened species. It contemplates what musicology can usefully contribute to a paradigm driven by economics, and questions whether it is ever possible to recover an ideal civil subject in neoliberal music academia. Contributions investigate what it means to build music research capacity in innovative ways, such as forging cross-cultural relationships, subverting conventional notions of quality and value, replacing them with knowledges and values that guide Indigenous intellectual traditions, and whether interventions into the legacy of colonialism are truly ever possible in neoliberal higher education institutions that celebrate difference and diversity while reinforcing social inequities. The book also explores the relationships between gender and music, music research training and scholarship, and whether the interdisciplinarity championed by the university is ever workable. Finally, it undertakes a cross-disciplinary, new materialist reading of a canonical musical work, offering a radically new perspective. The book will appeal to students and scholars of music education, musicology, higher education studies and the creative arts more broadly.
