## Randall Fitzgerald

*The Hundred-Year Lie* Randall Fitzgerald, 2007-06-26 In a devastating exposé in the tradition of Silent Spring and Fast Food Nation, investigative journalist Randall Fitzgerald warns how thousands of man-made chemicals in our food, water, medicine, and environment are making humans the most polluted species on the planet. A century ago, when Congress enacted the Pure Food and Drug Act, Americans were promised “better living through chemistry.” Fitzgerald provides overwhelming evidence to shatter this myth, and many others perpetrated by the chemical, pharmaceutical, and processed foods industries. Consider this: · The average American carries a body burden of 700 synthetic chemicals; · Chemicals in tap water can cause reproductive abnormalities and hermaphroditic birth; · One study of lactating women found perchlorate (a toxic component of rocket fuel) in practically every mother's breast milk. In the face of this national health crisis, Fitzgerald presents informed and practical suggestions for what we can do to turn the tide and live healthier lives.

*The Non-Toxic Avenger* Deanna Duke, 2011-11-01 Most of us turn a blind eye to the startling array of chemicals lurking in everything from shampoo to baby bottles to the bills in our wallets, choosing to believe that government agencies ensure the safety of the products we wear, use, ingest and breathe in daily. Yet the standards for product safety in North America lag far behind those of other countries. We frequently hear that a substance we've relied on for years turns out to have serious effects on our health, the environment, or both. After coming to terms with the fact that the autism and cancer which had impacted her family were most likely the result of environmental toxins, author Deanna Duke undertook a mission to dramatically reduce her family's chemical exposure. She committed to drastically reducing the levels of all known chemicals in both her home and work environments, using the help of bodyburden testing to see what effect, if any, she was able to have on the level of toxins in her body. Follow Deanna's journey as she uncovers how insidious and invasive environmental toxins are. Learn about your day-to-day chemical exposure, the implications for your health, and what you can do about it. And find out whether the author's quest is mission impossible, or whether she is ultimately able to improve her family's health by taking steps towards leading a chemical-free life.

**TDOS Syndrome** Peter Greenlaw, 2017-02-14 For over a decade health and wellness expert, Peter Greenlaw, has studied the top researchers. His review of research looked at the effects on human health of environmental toxins, nutritional

deficiency, overweight, and stress. Now he connects the dots showing how the interconnections are amplifying these four health-robbing co-factors—Toxicity, Deficiency, Overweight, Stress—into a deadly syndrome that’s killing us. How can the human race absorb and process over 700 tons of toxins from the air we breathe every day? What happens as we consume hormones, steroids, pesticides, antibiotics and birth control chemicals in every glass of water? Why are there 275 lethal toxins found in newborn babies? And girls as young as three are showing signs of puberty? Connect the dots to see how toxins + depleted nutrients + overweight + stress adds up to the perfect storm that's costing us our health. Until Peter Greenlaw, the “researcher on researchers,” connected the dots, no one acknowledged the big picture...and sounded the alarm. Now, the facts are clear. The entire spectrum of research tells a bigger health story than we’ve been led to believe. Disregard these facts at your peril. Peter Greenlaw has gained enormous support from top experts and authorities across the health and medical global community because he has dedicated his life to trying to answer the real questions. “Unless we can get enough of the right nutrition back into our bodies to fight this four-headed monster, we and our families will become weaker, sicker and die much earlier than anyone ever thought possible.”—Peter Greenlaw

Crimes of States and Powerful Elites Claudia Radiven, Simon Prideaux, 2021-07-06 This book explores fourteen case studies of state crime, crimes/immoralities of the powerful, including disasters caused by neglect, pharmaceutical fraud, state sponsored or instigated crime, corporate crime, organisational crime and state terrorism. The book offers a valuable contribution to critical social science perspectives on criminality, providing analysis which explores issues of accountability and social harm and linking these to wider structural contexts, particularly the role of neoliberal ideologies. At the same time, the book will provide a critical perspective on historical case studies which continue to have legacies in the present, and which help to shed light on histories of domination and inequalities and to illustrate continuities and changes in crimes of the powerful over time.

**Good and Evil** Bhimeswara Challa,2021-09-03 By any measure, we are at an inflection point in human history. As the ongoing coronavirus pandemic has shown, it is not only the planet that is at risk but our very destiny. We must take an unblinking look at who we are compared with who we want to be or ought to be. That entails going within to discover what is happening deep inside our consciousness. This book suggests that the root of our troubles is our ignorance that there is a perennial war within each of us between good and evil. Like in any war, both sides need supplies. But in this internal war, they must come from outside, in the shape of our daily doings and choices. As you read, you'll get a roadmap on how to make better decisions and contain the evil within. Get answers to questions such as: • Why must we fix the inside before fixing the outside? • How can we prevent evil from overwhelming our consciousness? • How can the good inside of us overwhelm the bad outside? There is no nobler calling for any of us at this pivotal point than to volunteer to join others committed to bettering themselves so we can rescue mankind from self-annihilation.

**Licking Sweet Death** Hugo Rodier, 2010-05 There is an epidemic sweeping the country. It kills more people than any other disease or any war. Obesity and diabetes are changing the way we look and how our bodies function. We are poisoning our cells so that they cannot communicate with each other effectively. The statistics are well known, and they are only getting worse. So what is really going on? It boils down to something called insulin resistance. Your body has between 50-100 trillion cells in it. These cells respond to insulin in a variety of ways that are necessary for a healthy, functioning body. When insulin resistance develops, the normal amounts of insulin are not enough. Why does this happen? The membrane, or outer skin, of each cell in our body—no matter what type of cell—are TOILing, that is, the cell membranes are: T-toxic, O-oxidized, I-inflamed, and L-less optimal mitochondrial function The cause of this is an addiction to sugar and processed food. Licking
