Truth Lynn B. Upshaw,2007 Brands are rooted in trust - but consumers these days are more skeptical and distrusting than ever. A recent market research study (Datamonitor) concluded that 86 per cent of US and European consumers feel that they have become more skeptical about corporations in the last 5 years. In particular, consumers lack trust in the mainstream media channels and the specifics of product claims. Truth is a timely and seminal book that gives marketers the tools they need to win over today's wary consumers.; The author is a renowned marketing consultant with major companies on his client roster. He has written articles for numerous publications including Brandweek, Advertising Age, and the Journal of Brand Management. He shows readers how to: promote more persuasively; achieve greater returns through integrity in marketing; replace their pricing strategy with a more convincing value promise; build stronger customer partnerships; and seize the lead share of credibility in a hypercompetitive marketplace.

The 'Made in Germany' Champion Brands Ugesh A. Joseph,2016-03-09 Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and

encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Capitol Hill's Criminal Underground Richard Lawless,2019-02-23 Perhaps one of the most thorough explorations of government corruption ever put in writing, this nonfiction account investigates the theft of trillions of U.S. dollars—money laundered in countries that are hostile to the United States. The ratings agencies, the banks, and our politicians are funding anti-American activity against their own people—and they couldn't care less. The FBI refuses to investigate, the U.S. Attorneys refuse to prosecute, and the Securities and Exchange Commission refuses to protect the public. With enough evidence to investigate and prosecute over one thousand high-ranking government employees, bankers, and politicians, Capitol Hill's Criminal Underground will show that the level of arrogance and contempt our political leaders hold for the American people is boundless.

Over the past 30 years, the luxury goods industry has undergone a tremendous expansion around the world. However, it remains largely dominated by European companies, ranging from diversified conglomerates such as LVMH and Richemont to independent companies such as the Italian fashion houses Armani and Ermenegildo Zegna, and industrial groups like Swatch and L'Oréal or new start-ups such as Richard Mille. How and why did these companies succeed? How did they manage to transform a sector previously dominated by small family firms into a global big business? *Selling Europe to the World* presents the development of the global luxury goods industry from the 1980s to the present day. It highlights the strategies implemented by a new generation of entrepreneurs and explains, beyond the glamorous image conveyed by luxury brands, the sources of success of these firms. Play Fair at the Olympics, 2004 This report asks fundamental questions about the global sportswear industry - questions that go to the heart of debates on poverty, workers' rights, trade, and globalisation. 'Olympism', in the words of the Olympic Charter, 'seeks to create a way of life based on ... respect for universal fundamental ethical principles.' This report shows that the business practices of major sportswear companies violate both the spirit and the letter of the Charter.
