World Without Cancer G. Edward Griffin,

World Without Cancer G. Edward Griffin,1997 pt.1 The science of cancer therapy --pt.2. The politics of cancer therapy.

Indicted! James Henderson,2009-02 In what promises to be the trial of the century, attorney-turned-author James Henderson indicts the medical/industrial cartel now dominating modern drug-based medicine for trading the health of millions of Americans for dollars. In the brilliant and intriguing setting of a jury trial the author enrolls We the People of America into a vast national jury to pass judgment on modern pharmaceutical medicine for cunningly treating chronic degenerative diseases like heart disease, cancer, and diabetesAmericas leading killersby merely seeking to manage the symptoms of these diseases, not even attempting to cure them. Drug-based medicine has become big business. It thrives on sickness. It dares not cure the patient or the money pipe-line dries up. The price tag? Overt two trillion dollars annually and climbing. And America is getting sicker by the day. Author James Henderson offers the proven testimonies of eminent nutritional physicians and medical geniuses who have turned their backs on this criminal monopoly. These brave souls have risked their careers to blow the whistle on the drugging of America. In this court of public opinion, if we, the jury, cannot discern the truth, what hope is there for justice? Or for medical freedom in America? Will We the People make a decision before its too late? Read *Indicted!* and decide for yourself.

World Without Cancer G. Edward Griffin,2018 Mr. Griffin marshals the evidence that cancer is a deficiency disease - like scurvy or pellagra - aggravated by the lack of an essential food compound in our modern diet. That substance is vitamin B17. In its purified form developed for cancer therapy, it is known as Laetrile. This story is not approved by orthodox medicine. The FDA, the AMA, and The American Cancer Society have labeled it fraud and quackery. Yet the evidence is clear that here, at last, is the final answer to the cancer riddle. Why has orthodox medicine waged war against this non drug approach? The author contends that the answer is to be found, not in science, but in politics - and is based upon the hidden economic and power agenda of those who dominate the medical establishment. This is the most complete and authoritative treatise available on this topic.

Politics, Science And Cancer Gerald E. Markle, James C. Petersen, 2019-09-11 At no time in U.S. history has there been a more effective challenge to medical expertise and authority than that mounted by the contemporary Laetrile movement. The efficacy of Laetrile has been debated for over twenty-five years, but despite vigorous opposition from the medical community, support for the purported cancer treatment continues to grow

Cancer No Chemo Robert LaPlante, 2013-05-13 Fifty-nine-year-old Robert LaPlante gave up cigarettes in his twenties, was never overweight, practiced good health habits, and had run marathons and many other foot races. He lived his life in a way he believed would ward off terrible things like cancer. But in November 2008, LaPlante received the devastating diagnosis of signet ring cell adenocarcinoma, a rare and aggressive form of cancer that begins in the appendix. In *Cancer No Chemo*, LaPlante documents his three-year battle with cancer from the initial diagnosis, to surgery to remove ten inches of colon and twenty-two lymph nodes, to winning the fight. Through journal entries, he shares his innermost thoughts during his treatment and recovery, including the fearful decision to forgo chemotherapy in favor of holistic healing methods that are gaining a place in the battle against cancer. In this memoir, he shares how he believes a positive attitude is the most important tool that inspires positive action. *Cancer No Chemo* provides an inspiring look at how one man battled a foreboding cancer diagnosis and won.

Europe, America, and Technology: Philosophical Perspectives P.T. Durbin, 2012-12-06 As Europe moves toward 1992 and full economic unity, and as Eastern Europe tries to find its way in the new economic order, the United States hesitates. Will the new European economic order be good for the U.S. or not? Such a question is exacerbated by world-wide changes in the technological order, most evident in Japan's new techno-economic power. As might be expected, philosophers have been slow to come to grips with such issues, and lack of interest is compounded by different philosophical styles in different parts of the world. What this volume addresses is more a matter of conflicting styles than a substantive confrontation with the real-world issues. But there is some attempt to be concrete. The symposium on Ivan Illich - with contributions from philosophers and social critics at the Pennsylvania State University, where Illich has taught for several years - may suggest the old cliché of Old World vs. New World. Illich's fulminations against technology are often dismissed by Americans as old-world-style prophecy, while Illich seems largely unknown in his native Europe. But Albert Borgmann, born in Germany though now settled in the U.S., shows that this old dichotomy is difficult to maintain in our technological world.

Borgmann's focus is on urgent technological problems that have become almost painfully evident in both Europe and America.

No More Cancer Gary Null, 2014-07-29 One word strikes more fear into a person's mind than any other: CANCER. The physical, mental, emotional, and financial toll that comes with a cancer diagnosis is immense and affects not only cancer patients but also families and entire communities. This year alone approximately 600,000 Americans will lose their lives to cancer, and the forecast shows no signs of improving. Recent estimates tell us that 41 percent of all Americans will be diagnosed with cancer during their lifetimes and 21 percent of the population will lose their lives to this devastating disease. Cancer has evolved into a national crisis that touches each and every one of us. The vast majority of individuals who lose the battle against cancer are treated with the standard orthodox therapy. These people may never have questioned their oncologists, believing that they were in the best possible hands with their physicians' advanced education, knowledge of latest treatments, and all the tools of modern research at their disposal. In this groundbreaking book, Gary Null debunks the commonly accepted belief that drugs and chemotherapy are the only cures for cancer and explores the alternative treatments that most mainstream doctors will never discuss with their patients. Dr. Null asserts that there are foods and supplements that boost the body's immune system and can actually prevent and reverse cancer. Did you know that eating lemons and melons can help balance your body's pH, which will help prevent and treat cancer? You knew that fiber is important for a healthy diet, but did you know that it lowers the risk of breast, colorectal, uterine, and prostate cancers? Have you heard of maitake mushrooms, which kill cancer cells by enhancing the activity of T-helper cells? In addition to diet, Dr. Null discusses important supplements and herbs and cutting-edge therapies you may never have heard of. With twenty-five cancer-fighting recipes and testimonials from individuals who have found health through Dr. Null's methods, this book could save your life.

Emeka, 2004 More than one-hundred years ago researchers discovered that cancer is not a tumor; instead, cancer is the PROCESS that causes a tumor -- and removing the tumor does not remove the cancer. *Cancer's Best Medicine* looks carefully at the nature of that PROCESS, and explores what we as individuals can do to disrupt it. Cancer is a metabolic illness, and it's very important to understand that this disease is closely linked to diet and lifestyle -- as this booklet so clearly notes. It contains a recipe section, an index, illustrations, and a bibliography. Read it and discover a wealth of information to help you unleash the healing power of your body

Reputation and Power Daniel Carpenter, 2014-04-24 How the FDA became the world's most powerful regulatory agency The U.S. Food and Drug Administration is the most powerful regulatory agency in the world. How did the FDA become so influential? And how exactly does it wield its extraordinary power? *Reputation and Power* traces the history of FDA regulation of pharmaceuticals, revealing how the agency's organizational reputation has been the primary source of its power, yet also one of its ultimate constraints. Daniel Carpenter describes how the FDA cultivated a reputation for competence and vigilance throughout the last century, and how this organizational image has enabled the agency to regulate an industry as powerful as American pharmaceuticals while resisting efforts to curb its own authority. Carpenter explains how the FDA's reputation and power have played out among committees in Congress, and with drug companies, advocacy groups, the media, research hospitals and universities, and governments in Europe and India. He shows how FDA regulatory power has influenced the way that business, medicine, and science are conducted in the United States and worldwide. Along the way, Carpenter offers new insights into the therapeutic revolution of the 1940s and 1950s; the 1980s AIDS crisis; the advent of oral contraceptives and cancer chemotherapy; the rise of antiregulatory conservatism; and the FDA's waning influence in drug regulation today. *Reputation and Power* demonstrates how reputation shapes the power and behavior of government agencies, and sheds new light on how that power is used and contested. Modern Esoteric Brad Olsen, 2017-08-02 This completely reworked second edition of *Modern Esoteric* includes new information, over a dozen additional images, and up-to-date revisions. Winner of the Best Book Design 2014, *Modern Esoteric* examines the flaws in modern history and looks at how conspiracy theories, esoteric knowledge, and fringe subjects can be used to help change the dead-end course humanity seems to be following. The Lifeology section explores the long and storied

alternative narrative of life on this planet. In the Control section, author Brad Olsen examines how Big Brother is here in the form of the New World Order, and how they keep the knowledge of humankind's true nature from the mass population. Finally, the Thrive section looks at all the ways humans are evolving to achieve their full potential.

Consensus Trance Paul Bondarovski, Walter H. Bowart, H. P. Albarelli Jr., Jerry E. Smith, Jüri Lina, Michael Nield, Ron Patton, Dick Sutphen, Hans Ruesch, Dani Veracity, Walter C. Vetsch, 2016-12-20 Most of us live in consensus trance - a state of consciousness produced by ideological blunting of our intellect through intensive manipulation (brainwashing), which forces us to accept false conception of reality. And the worst is that we very rarely know if the thoughts in our head are ours or have been skillfully suggested by someone or something else (e.g., subliminals hidden behind music, or flashed on a screen so fast that you don't consciously see them, or cleverly incorporated into a picture). In the entire history of man, no one has ever been brainwashed and realized, or believed, that he had been brainwashed. This book is composed of the articles which present the Big Picture of mass and individual mind control and its various techniques.
