Sociology in Mexico Gina Zabludovsky,2023-12-09 This open access book presents a condensed history of Sociology in Mexico from its origins, through to the middle of the 19th century and up to the present day. The book analyses the interaction between sociology and the main economic, political and social change in the country, including the 1910 Mexican Revolution, the main social movements, the role of the intellectual exiles from Spain and Latin America, and the participation of women, who have often remained invisible in the history of sociology. The book explores how sociological discourse played a fundamental role in the separation of secular and public education and the search for a 'national project' from 1868 onwards, despite the lack of an institute of social research until 1930; how sociology became an autonomous social science, led by a few intellectuals and public figures, as it became institutionalized in universities, and the effect this had on the development of the discipline; the influence of Marxism during the 1970s; and the progression from a process of specialization after the fall of the Berlin Wall to a new trend of working in collective projects with an increasing interdisciplinary perspective in the first decades of the 21st century.

The New Latin America Fernando Calderón,Manuel Castells,2020-08-04 Latin America has experienced a profound transformation in the first two decades of the 21st century: it has been fully incorporated into the global economy, while

excluding regions and populations devalued by the logic of capitalism. Technological modernization has gone hand-in-hand with the reshaping of old identities and the emergence of new ones. The transformation of Latin America has been shaped by social movements and political conflicts. The neoliberal model that dominated the first stage of the transformation induced widespread inequality and poverty, and triggered social explosions that led to its own collapse. A new model, neo-developmentalism, emerged from these crises as national populist movements were elected to government in several countries. The more the state intervened in the economy, the more it became vulnerable to corruption, until the rampant criminal economy came to penetrate state institutions. Upper middle classes defending their privileges and citizens indignant because of corruption of the political elites revolted against the new regimes, undermining the model of neo-developmentalism. In the midst of political disaffection and public despair, new social movements, women, youth, indigenous people, workers, peasants, opened up avenues of hope against the background of darkness invading the continent. This book, written by two leading scholars of Latin America, provides a comprehensive and up-to-date account of the new Latin America that is in the process of taking shape today. It will be an indispensable text for students and scholars in Latin American Studies, sociology, politics and media and communication studies, and anyone interested in Latin America today.

The (In)Visibilization Society Ana Cárdenas Tomažič, 2024-12-16 Today, we are living in a new social order: the (in)visibilization society. How and why is this society making so many human beings and the environment invisible, while simultaneously developing and expanding the practices, means, and structures to make them supposedly more visible? And what future(s) await(s) this society? This book offers a new sociological analysis of contemporary societies by exploring some of their core contradictions and resulting socio-ecological (dis)illusions and crises, together with the related conflicts between the (in)visible — now taking place within and between analog and digital spaces.
