Bernard Guerin, John Innes

Social Facilitation Bernard Guerin, John Innes, 1993-03-18 The presence of one person affects the behavior of another: this is known as social facilitation. It is one of the oldest topics in social psychology, first studied in 1898, yet Bernard Guerin's is the first book-length study of the phenomenon. Dr. Guerin reviews all work in the area from 1898 onward, looking at both human and animal research, and develops his own theory, based on modern theory analysis. Through his study of social facilitation, he also reviews the state of social psychology today: its strengths, its weaknesses, and its future.

The Neuropsychology Handbook Arthur MacNeill Horton, 2008 Print+CourseSmart

The Neuropsychology Handbook Dr. Danny Wedding, PhD, MPH, 2007-10-18 A fantastic and monumental contribution to our field. ï ñ Ralph M. Reitan, PhD The field of neuropsychology has many specialized books on particular diseases, but there is always a need for a general text to cover the major aspects of neuropsychology from neuroanatomy to assessment to practice issues. This is one such book that attempts to provide comprehensive coverage of the field. --Doody's In the last decade, the number of books, courses, training opportunities, and journals dealing with clinical neuropsychology has greatly increased. Demand for a complete reference in the field is growing as practitioners in private practice, the court system, and the medical field continue to make discoveries and advance our knowledge of the brain system and how it affects our everyday lives. In order to address this urgent need, Drs. Horton and Wedding have edited this Third Edition of the classic Neuropsychology Handbook. In its pages are reviews of all the major areas in which clinical neuropsychologists work: the foundations of clinical neuropsychology brain structure and function neurological disorders psychiatric disorders diagnostic decision-making symptom validity testing neuroimaging behavioral change following traumatic brain injury disability determination rehabilitation planning, and more Very specialized areas of practice such as clinical neuropsychology with children, clinical neurotoxicology, and neuropsychological assessment in criminal law cases also receive chapters.

Psychological Factors in Competitive Sport Don Davies, Malcolm Armstrong, 1989-01 This book explains the importance of psychological factors for achievement and performance in competitive sport. It deals with the development of ability, maximization of performance in competition, emotional health, social adjustment and general well being of the participants in sport. The two main aims are firstly to select and outline ways in which young people can learn to become

highly skilled and well adjusted sportsmen and secondly to describe the techniques by which players, having become highly skilled, can perform consistently well under pressure or stress. This book is based on tried and tested methods in teaching and on extensive research findings in the field of sport psychology. There is a strong bias towards the practical and most chapters contain specific guidelines to be followed and detailed practices to be undertaken, making it ideal as a practical text for teachers, coaches or as an aid to self-improvement in the competitor.
