Irregular Phonological Marking of Japanese Compounds Timothy J. Vance,2022-05-09 Benjamin Smith Lyman

(1835–1920) was an American geologist and mining engineer who worked for the Japanese government as a foreign expert in the 1870s. He is famous among linguists for an article about a set of Japanese morphophonemic alternations known as rendaku (sometimes translated as “sequential voicing”). Lyman published this article in 1894, several years after he returned to the United States, and it contains a version of what linguists today call Lyman’s Law. This book includes a brief biography

of Lyman and explains how an amateur linguist was able to make such a lasting contribution to the field. It also reproduces Lyman's 1894 article as well as his earlier article on the pronunciation system of Japanese, each followed by extensive commentary. In addition, it offers an English translation of a thorough critique of Lyman's 1894 article, published in 1910 by the prominent Japanese linguist Ogura Shinpei. Lyman's work on rendaku included much more than just Lyman's Law, and the final chapter of this book assesses all his proposals from the standpoint of a modern researcher.

Cognitive Linguistics and Japanese Pedagogy Kyoko Masuda, 2018-02-19 This volume, grounded on usage-based models of language, is an edited collection of empirical research examining how cognitive linguistics can advance Japanese pedagogy. Each chapter presents an acquisition or classroom study which focuses on challenging features and leads instructors and researchers into new realms of analysis by showing innovative views and practices resulting in better understanding and improved L2 learning of Japanese.

Applying Theory and Research to Learning Japanese as a Foreign Language Masahiko Minami, 2009-03-26 Complex issues surround second language acquisition and foreign language learning in any language. There is no doubt that individuals are capable of acquiring two or more languages at different stages of human development, particularly in childhood. Research investigating how adults acquire two languages also carries important insights into what takes place during later stages of human development. From the fact that early and late bilinguals are faced with two languages in diverse stages of cognitive development we can predict differences in language processing between these two groups. In the case of the Japanese language, unfortunately, far fewer studies — particularly those written in English — have been presented on foreign-language learners and bilingual children. Designed to address some of these gaps in the literature, the chapters included in this book discuss various issues with regard to adult learners of Japanese as an L2 and English-Japanese bilingual children. This book provides the reader with an overview of the field of Japanese linguistics and its current concerns. One of the main purposes of the book is to provide a forum in which to examine contributions in a variety of areas of Japanese linguistics to the teaching and learning of Japanese in the L2 classroom. This book has at least two interrelated areas of benefit. First, both researchers and teachers benefit from each other's expertise and receive new insights that apply to their respective fields. Second and more important, the book serves as a forum to promote ways in which we can apply linguistic theory to the learning of Japanese as an L2. That is, what researchers have learned from both theory and practice can suggest what is important for the teaching of language; conversely, language educators have a great deal to offer linguists regarding the phenomenon of language. Thus, the goal of this book is to integrate theoretical concepts and empirical research findings in L2 development in order to apply them to educational practice.

The Japanese Sentence-final Particles in Talk-in-interaction Hideki Saigo, 2011 The Japanese sentence-final particles, *ne*, *yo* and *yone* have proved notoriously difficult to explain and are especially challenging for second language

users. This book investigates the role of the particles in talk-in-interaction with the aim of providing a comprehensive understanding that accounts for their pragmatic properties and sequential functions and that provides a sound basis for second language pedagogy. This study starts by setting up an original particle function hypothesis based on the figure/ground gestalt, and then tests its validity empirically with unmarked, marked and native/non-native talk-in-interaction data. The analysis illustrates not only expectable but also unexpected or strategic use of particles, as well as the problems posed for native speakers by non-native speakers whose use of particles is idiosyncratic. The study demonstrates that the proposed hypothesis is capable of accounting for all the uses of particles in the extensive and varied data set examined. This book will be of interest to students and scholars in pragmatics and CA and to teachers of Japanese as a foreign language.

Ellipsis and Reference Tracking in Japanese Shigeko Nariyama, 2003-11-24 In many East Asian languages, despite the prevalent occurrence of implicit reference, reference management is largely achieved without recourse to familiar agreement features. For this reason, recovering ellipted reference has been a perplexing problem in the analysis of these languages. This book elucidates the linguistic mechanisms for ellipsis resolution in Japanese, mechanisms which involve complex processes of inference that integrate grammatical, sociolinguistic, and discourse considerations with real world knowledge. These processes are realised in an integrated algorithm, the validity of which is tested against naturally-occurring written texts. This book also builds connections between theoretical linguistics and practical applications. The findings not only have theoretical implications for identifying crucial factors in the linguistic encoding of implicitly expressed information, factors which are very different from those found in European languages, but also offer practical applications, particularly for the design of machine translation systems and for learners of Japanese.
