Community Mental Health in Canada Simon Davis,2011-11-01 In Canada, at least 5 percent of the population suffers from a serious, persistent mental illness such as schizophrenia or bipolar disorder. While recent years have seen many changes and improvements in the way we respond to the needs of mentally ill persons, there remain divisions of opinion among stakeholder groups about the way mental health services are delivered. Community Mental Health in Canada offers a timely, critical overview of the provision of public mental health services in Canada, looking at where we have come from, the current situation, and where we may be heading. Concise, yet comprehensive, coverage includes: the prevalence and impact of mental illness in Canada the complementary and conflicting interests of stakeholder groups, such as mental health professionals, clients, families, government, and drug companies current and developing initiatives in treatment, rehabilitation, housing, and criminal justice programs the clinical benefits and costs of particular interventions, among them pharmacotherapy and cognitive-behavioural treatments the recovery model diversity and cultural competence the legal and ethical basis of mental health practice, particularly as it applies to the use of coercion and involuntary treatment Community Mental Health in Canada fills a gap in the literature in its analysis of both clinical mental health practice as well as the structural context within which it is situated. An indispensable resource for students, practitioners, and policymakers, it also is essential reading for all those interested in how services are provided to our most vulnerable citizens.

Modern Community Mental Health Kenneth Yeager,David Cutler,Dale Svendsen,Grayce M. Sills,2013-02-05

Landmark events, such as the 50th anniversary of the Eisenhower Commission Report and the same anniversary of the Community Mental Health Act, helped launch the community mental health movement. The Rehabilitation Act of 1973 and the President's New Freedom Commission have continued this work by establishing funding sources and highlighting the importance of recovery and excellence in care. Modern Community Mental Health: An Interdisciplinary Approach integrates each of the key concepts contained within the presidential reports and landmark legislation into the context of today's community service delivery system. This pathfinding textbook promises to revolutionize community mental health training by responding to the realities of modern health care delivery systems, presenting an integrated, interdisciplinary paradigm of care. Extraordinarily broad in coverage, it will open a door of possibilities to those caring for the mentally ill in the community. Recognizing that community-based services must be truly collaborative in order to be effective and efficient, the editors have assembled a cast of contributors from among the brightest lights in community practice. Chapter authors, who are currently doing interdisciplinary work successfully on a daily basis, will collaborate on writing teams to offer their insight into the problems and triumphs that are part of this approach. They will cover not only macro issues such as the economics of behavioral healthcare, reimbursement models, and quality improvement, but the specific skills necessary for competent practice such as treatment planning, clinical documentation, risk management, and partnering with members of a team that may include social workers, psychiatrists, psychologists, and nurses. Twenty additional chapters will provide detailed roadmaps to practices and programs that have been shown to be effective when delivered in a community setting--such as supported employment, assertive community treatment (ACT) teams, crisis intervention training (CIT), family psychoeducation, and supported housing--and will be grounded in educational benchmarks, healthcare reform opportunities, and cultural competencies. By definition community mental health practice is never static. As communities change, the profession changes, and in recent years changes in funding have drastically impacted the system of care. We need empirically supported interventions, to include the voice of the consumers and their families, and have a way to educate current and future professionals so that we all truly work together.

The electronic patient record Great Britain: Parliament: House of Commons: Health Committee, 2007-09-13 In England, implementing electronic patient record (EPR) systems is one of the main aims of the 10-year National Programme for Information Technology (NPfIT). This report finds a lack of clarity about what information will be contained. It also points to some notable successes too including the agreement on a universal coding language for the NHS.

Integrating Mental Health Into Primary Care World Health Organization,2008 Presents the justification and advantages of providing mental health services in primary care. Provides advice on how to implement and scale-up primary care for mental health, and describes how a range of health systems have successfully undertaken this transformation. Part 1 provides the context for understanding primary care for mental health within the broader health care system. Part 2 explains how to successfully integrate mental health into primary care and highlights 10 common principles which are central to this effort. It also presents 12 detailed case examples to illustrate how a range of health systems have undertaken this transformation. Annex 1 provides information about the skills and competencies that are required to effectively assess, diagnose, treat, support and refer people with mental disorders.

Mental Health Care Delivery Isaac M. Marks,Robert A. Scott,1990-08-31 The provision of effective mental health services, at a reasonable cost, to all sections of the population is one of the most pressing problems facing clinicians, planners and administrators of mental health services in the industrialised countries. Changes in paradigms for mental health care delivery are accelerating, and are likely to culminate in the 1990s in major shifts in many countries. This book reviews the emerging patterns of health care delivery in different western countries, outlining the innovations of recent years and analysing some of the impediments to their full implementation. The contributors are all prominent experts in mental health services, whose chapters comprise an up-to-date account of many of the most important issues in mental health care delivery today. The text falls into three sections. Part I describes a number of innovations in the community care of psychiatric patients, including programmes for psychotic patients, primary care based psychiatric services for non-psychotics and emergency services in community settings. Part II examines the main impediments to their systematic implementation whether sociopolitical, administrative, economic or professional. Part III integrates the book, provides an overview, and details some specific issues in the implementation of innovation in mental health care delivery.
