Metodología básica de investigación en enfermería Francisco Xavier Santos Heredero, Carlos Rodríguez Arias, Rosario Rodríguez Ballesteros, 2003-11-28 Un grupo de docentes ha mantenido un especial interés en concienciar a sus alumnos de enfermería de la necesidad de adquirir unos conocimientos teóricos con desarrollo práctico que supusieran un primer contacto con la investigación. No pretende ser un exhaustivo tratado de metodología científica, sino una primera toma de contacto con el mundo investigador. El objetivo primordial es demostrar a los alumnos y profesionales de enfermería que su carrera es científica y que por tanto, pueden y deben investigar.

Tendencias 07 - Medios de Comunicación Fundación Telefónica, 2007-11-01 En este informe se presenta una visión de conjunto de los medios de comunicación en Latinoamérica que aparece como la suma de circunstancias nacionales complejas y diversas, muchas veces trazadas por desigualdades en las que cohabitan la riqueza y la pobreza, la inclusión y la exclusión, lo mediáticamente visible y lo invisible.

Spotify Jonas Leijonhufvud, Sven Carlsson, 2021-09-24 La historia completa de la plataforma de audio por streaming más grande del mundo En 2011, Daniel Ek, el joven fundador de Spotify, por fin logró el lanzamiento de su compañía en Estados Unidos, a pesar de que Steve Jobs había hecho lo posible porque ese momento nunca sucediera. La startup sueca había entrado al campo de batalla para cambiar las reglas del juego en el negocio de la música. Spotify apenas había ganado una batalla, pero aún no la guerra: ahora tendría que luchar en contra y a favor de las grandes discográficas, al tiempo que seguía tratando de triunfar en la carrera de la rentabilidad. A partir de cientos de entrevistas y fuentes —entre las que destacan Mark Zuckerberg, Steve Jobs, Taylor Swift, Jay-Z, Sean Parker, Pony Ma Huateng y Jimmy Loving—, los autores reconstruyen la fascinante historia de una de las compañías que ha revolucionado la forma en que el mundo consume audio. Un relato equiparable al de David y Goliath que, además de revelador, muestra cómo la convicción, la voluntad implacable y los sueños son clave para los pequeños empresarios que se enfrentan a los gigantes de la tecnología.

TELOS 70 Emili Prado, 2007-01-01 La población hispana de los Estados Unidos ya supera los 41 millones de habitantes y cuenta con un poder adquisitivo de alrededor de 600.000 millones de dólares, mientras regenta dos millones de empresas que facturan más de 200.000 millones de dólares. La importancia económica, política y social de esta comunidad pone en primer plano de interés el sector de las industrias culturales en español en los Estados Unidos.

Medios, Recursos Didácticos y Tecnología Educativa VÁZQUEZ CANO Esteban ,2021-02-16 Este libro pretende servir de apoyo al desarrollo de la asignatura: Medios, Recursos Didácticos y Tecnología Educativa, del Grado en Pedagogía de la UNED, tanto en su vertiente teórica como práctica. Asimismo, puede resultar un libro interesante y útil para cualquier persona relacionada con el ámbito educativo (docente, discente, inspector, asesor, educador, etc.). El libro se estructura en siete capítulos que abordan cómo los medios y recursos didácticos con base en la tecnología pueden servir de gran ayuda para la mejora de los procesos de enseñanza-aprendizaje (gamificación, realidad aumentada, redes sociales, dispositivos digitales, entornos virtuales de aprendizaje, MOOC, chatbots, analíticas de aprendizaje, entre otros). La Educación en este siglo XXI no puede abstraerse de la adecuada integración de la tecnología dentro y fuera de las aulas. Por este motivo, es necesario que el docente, asesor o formador educativo tenga una competencia digital adecuada y sepa integrar de forma efectiva las herramientas y recursos digitales para el desarrollo de contenidos, valores y competencias desde principios pedagógicos, éticos, sostenibles y de seguridad en la red. Abogamos por un docente/formador BACC (Busca, Adapta, Crea y Comparte), contenido digital de alto valor didáctico. También apostamos por un enfoque TAC (Tecnologías para el Aprendizaje y el Conocimiento) y por una versión más humana de las TIC (Ternura, Interés y Cariño). La docencia es mucho más que medios y recursos —tecnológicos o no—, es dedicación, amor, conocimiento, saber ser y saber transmitir, y mucho más. Solo el/la que ha estado al frente de una clase sabe lo difícil que es ser un buen docente. A buen seguro, los recursos digitales bien empleados son un complemento indispensable para mejorar la educación, pero no podemos olvidar que el punto clave reside en el «think», no en el «clic».

Novos produtos e serviços na Educação 5.0 Andrea Filatro,Ana Claudia Loureiro,2020-11-09 A pandemia do covid-19 nos arremessou em um universo totalmente novo, marcado basicamente pelo medo do futuro e pelo sofrimento, especialmente por parte daqueles que ficaram doentes e/ou que perderam entes queridos. A educação, como várias outras atividades, enfrentou (e continua enfrentando, quando este livro está sendo finalizado) inúmeros desafios, que envolveram, de uma maneira geral, a utilização intensiva de tecnologias e do que se convencionou chamar de ensino remoto emergencial. O que parece começar a se descortinar em relação ao futuro da educação é que viveremos, daqui para a frente, provavelmente um processo de ensino e aprendizagem híbrido, em que aulas presenciais serão mescladas com atividades a distância. A pandemia parece ter apressado de uma maneira avassaladora a adoção do blended learning, não apenas no Brasil, mas no mundo todo. E essa adoção carrega consigo, também, a incorporação de mais ferramentas e tecnologias ao trabalho dos professores, dos alunos, dos gestores e das próprias escolas e instituições de ensino superior. Nesse sentido, se este livro já teria um lugar de destaque antes da pandemia, tanto pela importância que as tecnologias vinham adquirindo na educação, quanto pelo papel desempenhado pelas autoras na cena da educação brasileira, ocupa agora um lugar privilegiado. Nasce no lugar certo, na hora certa. As autoras não fizeram apenas (o que não seria pouco) uma lista dos principais softwares, aplicativos e plataformas que podem ser utilizados em educação, mas uma lista comentada. O mais importante, entretanto, é que toda essa riqueza de ferramentas e conceitos está fundamentada em reflexões pedagógicas e em orientações para uso por parte dos atores que terão de enfrentar esse mundo novo, que estamos ainda começando a vislumbrar. Os frutos que a leitura deste livro trarão para o leitor são inúmeros: uma ampliação de seu conhecimento sobre os recursos disponíveis para o ensino remoto emergencial, a educação a distância e o blended learning; reflexões sobre a incorporação das tecnologias à educação; exemplos de uso dessas ferramentas, especialmente no Brasil; compreensão de novos conceitos, que começam a ser cada vez mais utilizados em educação; e a lista poderia continuar! Este é um livro produzido para (e por causa de) um momento, mas que, por sua densidade e riqueza, sobreviverá ao seu tempo. É um livro

que nasce no ensino remoto emergencial, mas como uma ponte para o futuro marcado pelo blended learning. Esperamos que você saia desta viagem mais seguro e mais equipado para enfrentar os desafios que ainda estamos enfrentando, e para se equilibrar nesse novo mundo que está começando a se desenhar, em que a educação continuará a ter papel essencial, acompanhada de diversos recursos que você conhecerá aqui. La Reina Roja Guillem Garcia Brustenga, 2018-01-10 La Reina Roja es un libro de entrevistas con reflexiones sobre qué características conforman—tanto en el ámbito tecnológico como en lo social— el entorno de crecimiento exponencial que estamos viviendo y cómo afecta esta velocidad de cambio a la educación, así como cuál debe ser la función de esta última en el desarrollo de las personas —principalmente las nuevas generaciones— y en su preparación para un mercado de trabajo cada vez más incierto debido a la automatización tecnológica. Guillem Garcia Brustenga ha entrevistado para ello a siete expertos en tecnología, economía en red y educación: Xavier Ferràs, Miguel de la Ossa, Trina Milan, Enrique Dans, Baptista Borrell, Javi Creus y Jordi Riera Romaní. Todos los entrevistados son seguidores de tendencias de la sociedad digital y tienen ideas y opiniones fundamentadas de cómo nos afectarán estas tendencias y qué impactos y transformaciones pueden o deben producirse en el ámbito educativo. Son siete enfoques divulgativos muy distintos sobre cómo será nuestro futuro y que invitan o contribuyen a un debate inaplazable en nuestra sociedad, debate que, por otro lado, se prevé apasionante.

Nuevas poéticas y redes sociales Remedios Sánchez, 2019-07-01 La incorporación de la llamada generación millennial al ámbito de la literatura en general y de la poesía en particular, ha provocado un cambio en los modos de producción y recepción del poema. Los jóvenes utilizan ahora las herramientas digitales como algo inherente a su cotidianeidad, como la fórmula para intercomunicarse con el mundo (la amistad en ese entorno virtual se mide ahora en número de seguidores o de likes), especialmente en contextos no formales que al final son los que sustancian el día a día. Y con esos parámetros miran también la literatura. Las estructuras de difusión de la poesía han sufrido una evolución tan rápida y tan ágil hacia este camino de lo digital que ha pillado desprevenidos tanto al lector tradicional como a los autores que responden a parámetros canónicos.

Derechos de los Pueblos Jessica Visotsky, Mariana Katz, Ana Luisa Guerrero Guerrero, 2019-12-27 Este libro es una especie de un gran tejido colectivo de experiencias y miradas que al momento de publicarlo sigue tejiéndose. Nació de encuentros, charlas y reflexiones gestadas en el marco de procesos de luchas. Pretende invitar a pensar a partir de procesos de resistencia y organización en torno a prácticas de avasallamiento de la dignidad humana de lxs sujetxs y colectivos, hacia hombres y mujeres, LGBTIQ+, niñxs y adolescentes; hacia pueblos que, al ver vulnerada su dignidad e integridad, se están

dando procesos de organización para transformar la realidad y haciéndose de herramientas conceptuales para entenderla y explicarla. A partir de una mirada relacional de los procesos y dinámicas económicas, sociales, políticas, culturales en la que no es posible pensar, por ejemplo, lo educacional alejado de las relaciones de poder y el capital económico en la que se gestan estos procesos. Estas relaciones también se vinculan con los procesos lingüísticos que, por ejemplo, tampoco se dan escindidos de lógicas de desposesión de territorios, en la que los abusos y explotación laboral, las estafas laborales, la trata laboral o con fines de explotación sexual, las desapariciones forzadas, no se dan sin un Estado que haga o deje de hacer, a través de sus fuerzas de seguridad, sus leyes, su aparato de justicia.
