**James E. Rauch**

**From Sheikhs to Sultanism** Christopher M. Davidson, 2022-01-15 Muhammad bin Salman Al-Saud and Muhammad bin Zayed Al-Nahyan, the respective princely strongmen of Saudi Arabia and the UAE, have torn up the old rules. They have spurred game-changing economic master plans, presided over vast anti-corruption crackdowns, tackled entrenched religious forces, and overseen the mass arrest of critics. In parallel, they also appear to have replaced the old 'sheikhly' consensus systems of their predecessors with something more autocratic, more personalistic, and perhaps even analytically distinct. These are the two wealthiest and most populous Gulf monarchies, and increasingly important global powers--Saudi Arabia is a G20 member, and the UAE will be the host of the World Expo in 2021-2022. Such sweeping changes to their statecraft and authority structures could well end up having a direct impact, for better or worse, on policies, economies and individual lives all around the world. Christopher M. Davidson tests the hypothesis that Saudi Arabia and the UAE are now effectively contemporary or even 'advanced' sultanates, and situates these influential states within an international model of autocratic authoritarianism. Drawing on a range of primary sources, including new interviews and surveys, *From Sheikhs to Sultanism* puts forward an original, empirically grounded interpretation of the rise of both MBS and MBZ.

*The Economics of the Middle East* James E. Rauch, 2020 Countries in the Middle East have very different economies, even if they are often grouped together. In *The Economics of the Middle East*, James Rauch focuses on the drivers of their distinctiveness, including the effects of their natural endowments, geographic locations, and interactions with the global economy. This book evaluates the socioeconomic trajectories of three groups of Middle Eastern States: Sub-Saharan African, fuel-endowed, and Mediterranean. It compares these groups both to each other and to developing countries in other regions with similar characteristics. Rauch draws on basic approaches to economic development to enhance understanding of important issues, such how policies on gender, education, health, and the environment affect development. His comparative perspective sheds light on how and why the Arab countries, Iran, and Turkey have done better or worse than similar countries in other regions. His analysis throughout is supported by data that are well organized and clearly presented. Rauch develops new insights on topics as diverse as unemployment, urbanization, corruption, and the importance of intraregional flows of investment and migrants. The result is a fascinating and balanced overview of the socioeconomic performance of the Arab countries, Iran, and Turkey that presents a new lens on the economics of the Middle East.

**Oil in the Gulf** Daniel Heradstveit, 2017-07-05 The US-led war against Iraq in 2003 represented the most dramatic shake-up of regional politics in the Gulf for more than a decade. This book contains an up-to-date analysis of central questions affecting the construction of a post-Ba'th regime in Iraq, and charts possible ways forward in other key states of the region such as Saudi Arabia and Iran. At the heart of the analysis lies the tension between the US-sponsored vision of a democratic, free market Gulf region and local resistance to this model. This resistance, appearing in the shape of alternative visions of democracy and the state, could potentially present a challenge to US policy through the spread of repressive policies or terrorism, especially if Washington chooses to sideline the social forces behind it. Conversely, if this resistance were taken seriously by the US, it could form a point of departure for more fruitful interaction between traditions of government from the West and local politics. Future developments on this important issue will be of immense significance for the management of some of the world's largest oil and gas reserves, with immediate implications for both regional political stability as well as for the world economy.

How to achieve the welfare state in the twenty-first century Kozulj, Roberto, 2019-09-18 Kozulj proposes a bold and vital idea: if the activities linked to urban development were reoriented towards the construction and reconstruction of sustainable cities, this would tend to solve a large part of the problem of structural unemployment,

*The Israeli Economy* Joseph Zeira, 2021-11-23 Based on over twenty years of research, *The Israeli Economy* offers a broad survey and analysis of an economy that has grown at an extraordinary rate, has been subject to large external shocks, and that has been a part of extensive conflict throughout its history. The book focuses on four main themes: understanding the secret of the rapid growth of the Israeli economy, evaluating the cost of the Israeli-Arab conflict, studying Israel as a country subject to large external shocks whose effects can be tested, and examining the effects of neoliberal policy on economic performance and inequality. Originally published in Hebrew in February 2018, the book has been restructured and framed for an English-speaking audience, omitting many details meant for Israeli readers and focusing more on the lessons that people from other countries can draw from Israel as a case study. The book draws on data from the Israeli Central Bureau of Statistics and the Statistical Appendices of the annual Bank of Israel reports, as well as from the Israeli Parliament, the research center of the Knesset, and publications from US Congress. In *The Israeli Economy*, Joseph Zeira provides a comprehensive economic history of a country with an important role in the Middle East, arguing that it's impossible to understand the region without understanding Israel and its phenomenal success--

**Allies As Rivals** Faruk Tabak, 2015-12-03 This book traces the dynamics of international rivalry from the late 1970s up through the present. Among the members of the dominant North political discord has become prominent recently in debates ranging from the Balkan Wars to the Second Gulf War. Yet a wide array of disputes--launching of global positioning systems to steel imports--have shattered the semblance of unity and cooperation among the members of the North, the triad of

Europe, U.S., and east Asia. The book explores the subversive ways in which the configuration of economic networks in east Asia are subtly leaving their mark on the structure of the world-system. Also addressed are the ramifications on the South of this sharpening rivalry and, more importantly, whether this round of imperial rivalry will eventually give way, as previously in history, to new forms of international domination.

**Islamic Marketing and Branding** T. C. Melewar, S. F. Syed Alwi, 2017-12-06 Islamic Marketing and Branding: Theory and Practice provides a concise mix of theory, primary research findings and practice that will engender confidence in both students and practitioners alike by means of the case study included in each chapter. Through three main parts (Branding and Corporate Marketing; Religion, Consumption and Culture; and Strategic Global Orientation), this book provides readers, from areas across the spectrum covering marketing, organisational studies, psychology, sociology and communication and strategy, with theoretical and managerial perspectives on Islamic marketing and branding. In particular, it addresses: Insights into branding and corporate marketing in the Islamic context. An introduction to Islamic consumption and culture, rules and regulations in brands and consumption in Islamic markets. An identification of how the strategic global orientation of the Islamic approach is practised and how it works in different Islamic countries such as emerging countries. Readers are introduced to a variety of business and management approaches which, once applied to their business strategies, will increase their chances of successful implementation. Addressing both theoretical and practical insights, this book is essential reading for marketing and branding scholars and students, as well as CEOs, brand managers and consultants with an interest in this area.

*Program Evaluation Theory and Practice, Second Edition* Donna M. Mertens, Amy T. Wilson, 2018-11-30 The leading text that covers both the theory and practice of evaluation in one engaging volume has now been revised and updated with additional evaluation approaches (such as mixed methods and principles-focused evaluation) and new methods (such as technologically based strategies). The book features examples of small- and large-scale evaluations from a range of fields, many with reflective commentary from the evaluators; helpful checklists; and carefully crafted learning activities. Major theoretical paradigms in evaluation--and the ways they inform methodological choices--are explained. Readers learn effective strategies for clarifying their own theoretical assumptions; working with stakeholders; developing questions; using quantitative, qualitative, and mixed methods designs; selecting data collection and sampling strategies; analyzing data; and communicating and utilizing findings. The new companion website provides extensive recommended online resources and tools, organized by chapter. New to This Edition \*Additional evaluation approaches: collaborative evaluation, principles-focused evaluation, and desk reviews. \*Coverage of new data collection technologies and methods of qualitative coding. \*Expanded discussions of logic models, cost-benefit analysis, and mixed methods designs. \*Many new and updated sample studies. Pedagogical Features \*Reflection questions that prepare students to read each chapter. \*Extending Your Thinking

questions and practical activities. \*Boxes delving into key concepts and example studies. \*End-of-book Glossary, and highlighted key terms throughout. \*Companion website with links to helpful resources on all aspects of evaluation.

**Measuring Human Capital** Barbara Fraumeni, 2021-07-12 Measuring Human Capital addresses a country's most important resource: its own people. Bettering human capital benefits individuals and their country and leads to improved sustainability for the future. For many years economists only used Gross Domestic Product (GDP), now acknowledged to be inadequate without supplemental measures, to gauge a country's overall value. There is now a recognition that many variables contribute to a country's worth, which make accurate measurement difficult. Looking beyond GDP by focusing on human capital, researchers, policymakers, government officials, and students can understand what elements impact human capital and how they might improve it in order to increase economic growth and well-being. - Addresses six major measures of human capital, covering at least 130 countries - Describes both monetary and index estimates - Includes two monetary measures by the World Bank and the Inclusive Wealth Report by UNEP and the Urban Institute of Kyushu University - Includes four index measures by the Institute for Health Metrics and Evaluation of the University of Washington, United Nations Development Programme, World Economic Forum, and World Bank - Includes two country chapters, one on China and the other on the United States

Love, Money, and Parenting Matthias Doepke, Fabrizio Zilibotti, 2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children. They show that in countries with increasing economic inequality, such as the United States, parents push harder to ensure their children have a path to security and success. Economics has transformed the hands-off parenting of the 1960s and '70s into a frantic, overscheduled activity. Growing inequality has also resulted in an increasing 'parenting gap' between richer and poorer families, raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds. The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation, and how economics can help shape policies that will contribute to the ideal of equal opportunity for all. --From publisher description.

*Interdisciplinary Research in Technology and Management* Satyajit Chakrabarti, Ashiq A. Sakib, Rohit Singh, Pradipta Kumar Banerji, Sanghamitra Poddar, Anupam Bhattacharya, Malay Gangopadhyaya, Srijita Chakraborty, 2023-07-27 We live in an inter-connected world. In the era of Industry 4.0, technology is getting embedded more and more in the way 'we learn, live, work, and play'. This progression is accelerating at a pace never seen before. Interdisciplinary and collaborative research across disciplines within the Technology domain and Management domain, and across the Technology-Management interface is opening up exciting new possibilities for solving problems whose solutions are beyond the scope of a single discipline, domain or practice, and helping to create a brave new world. The goal of this conference was to bring together scholars, researchers, consultants, and practitioners to share their interdisciplinary research and consultative work in

Technology and Management. Selected papers were then peer-reviewed and authors were invited to present their work in the conference.

**Critical Issues and Challenges in Islamic Economics and Finance Development** Velid Efendić, Fikret Hadžić, Hylmun Izhar, 2017-05-04 This book explores contemporary issues and trends facing Islamic banks, businesses and economies as presented at the International Conference of Islamic Economics, Banking and Finance. The authors leverage current empirical research and statistics to provide unique and fresh perspectives on the changing world of Islamic finance. They focus specifically on the implementation of Islamic financial instruments and services in global capital markets and how their success can be evaluated. Chapters feature case studies from all over the world including examples from Afghanistan, Bosnia and Herzegovina and the United Kingdom, to name a few. The breadth and immediacy of the research presented by the authors will appeal to practitioners and scholars alike. The global outlook and rich data-based approach adopted in this book guarantee that it is a timely and valuable addition to the field of Islamic finance.

Global Entrepreneurship and Development Index 2012 Zoltán J. Ács, László Szerb, 2011 If the key to future global economic growth is the spread of innovation and entrepreneurship in the developing world, how can that spread be encouraged? This book determines the conditions that favour entrepreneurship, devises a way to measure them, and then assesses the gaps and improvements needed in each country.

**Political Economy in the Middle East and North Africa** Rachid Mira, 2024-12-20 Many countries in the Middle East and North Africa continue to face major economic and political challenges, including volatile economic growth, low economic diversification, high unemployment levels, and, in some cases, pervasive authoritarian regimes. These economic and political challenges are interdependent, and reform is needed in both spheres if structural, long-lasting change is going to be achieved. This book combines the World Bank's concept of "good governance" with other analytical tools of political economy – including rent-seeking theory, political settlements approach, the resource curse, and Dutch Disease – to explore how government institutions in the region affect economic reforms and vice versa. The book also examines the role of institutions and performance of governance on rent distribution, evaluating how governments manage their, sometimes-abundant natural resources. In some "rentier states," governments are clearly utilizing these resources for their own political ends even at the cost of negatively impacting economic growth, job creation, and social service provision. Economic growth is also constrained by low flows of both private and public investment toward productive sectors that need it. The book analyzes the differences between countries in the Middle East and North Africa in their economic and political structures to show how sustainable economic growth and a level of political democratization can be achieved through enhancing governance institutions. This book will be invaluable reading for researchers on the political economy of the Middle East and institutional economics.

*The Changing Dynamics of Energy in the Middle East* Khalid Al-Rodhan, Anthony H. Cordesman, 2006-10-30 The recent

rise in global demand for energy and the resulting spike in energy prices have illustrated just how important Middle Eastern energy exports are. This book, the first on the subject since the hike in energy prices impacted the global energy market, outlines the current facts that shape the ability of Middle Eastern producers to supply energy exports. It explores the possible future causes both of major interruptions in supply, and of failures to maintain and expand export capacity, and, though it does not predict a major energy crisis, it does describe a range of factors that could produce one. The recent rise in global demand for energy and the resulting spike in energy prices have illustrated just how important Middle Eastern energy exports are. This book, the first on the subject since the hike in energy prices impacted the global energy market, outlines current facts that shape the ability of Middle Eastern producers to supply energy exports. It explores the possible future causes both of major interruptions in supply, and failures to maintain and expand export capacity, and, though it does not predict a major energy crisis, it does describe factors that could produce one. Authors Cordesman and Al-Rodhan analyze the plans of each country in the region, compare those plans with the forecasting models of international organizations, and study each country's prospects for stability. They also analyze how importing countries such as the United States, Europe, China, and India are dealing with the changing nature of global dependence upon MENA oil. Offering the most comprehensive data on current energy resources, production capacities estimates, import dependence, and national plans and strategies, *The Changing Dynamics of Energy in the Middle East* analyzes current energy modeling, and shows how the lack of supply-driven models has had a negative impact on the understanding of policy makers and strategic thinkers. The book concludes its analysis with possible strategic, economic, and demographic scenarios for the Middle East, projecting the impact of each scenario on future energy developments.

**Experiments in Achieving Water and Food Self-Sufficiency in the Middle East** Elie Elhadj, 2006 The book aims to quantify and analyze how two water scarce but ideologically different Middle Eastern political economies, Saudi Arabia and Syria, addressed water sector investment between 1980 and 2000. The study examines how narrow-coalitions of decision-makers obsessed by impossible-to-achieve food self-sufficiency goals, lacking environmental consideration and safe political processes contributed to massively waste scarce resources and unsustainable water policies. The book shows that of Saudi Arabia's US\$1,034 billion in oil revenues (1974-2001), 48% was spent on security, plus 10% on the ruling family. Nominal Per capita income dropped by 42% (1981-2000). Syria's per capita income dropped (1985-2000) by 17%, to US\$1,200. Armaments' consumed (1970-1990) 13% of GDP. Agricultural investment was wasteful. Saudis produced wheat at five times the international price, depleted 300 billion m3 of mainly non-renewable groundwater and degraded aquifers' quality. 53% of Saudis have no municipal water connections. Syria's Government return on agricultural investment in 2000 was estimated at US\$150 million loss. Aquifers' quality was degraded, leaving most urban households enduring acute water shortages.

Balancing Act Roberta Gatti, Daniel Lederman, Nelly Elmallakh, Jesica Torres, Joana Silva, Rana Lotfi, Ilias

Suvanov,2023-10-06 Covid-19. The Russian invasion of Ukraine. Commodity price volatility. The rise of global inflation and interest rates. Currency depreciations among indebted middle-income economies. And now, natural disasters. As a sequence of events, the consequences can be both tragic and long-lasting. After analyzing the macroeconomic prospects of the Middle East and North Africa (MENA) Region, this edition of the regional Economic Update assesses the human toll of macroeconomic shocks in terms of lost jobs and deteriorating livelihoods of the people of MENA. Growth is forecast to decelerate in 2023 after experiencing an oil-price induced growth spurt in 2022 among the high-income oil exporters of the region. Yet as the region continues to recover from the impact of the COVID-19 shock and navigates the heightened volatility in its terms of trade, the region's labor force is contending with the ramifications for their livelihoods of the inflationary pressures associated with currency fluctuations in some countries. The authors estimate that the macroeconomic shocks of 2020-22 led to an additional 5.1 million individuals becoming unemployed in MENA. Will these shocks permanently scar the hard-working people of MENA? The report answers this question by highlighting the trade-offs facing labor markets when facing macroeconomic shocks. A critical trade-off pertains to the loss of jobs versus decreases in real incomes, neither of which is desirable. The report advocates for maintaining the flexibility of real wages and discusses policy options to support the most vulnerable.

*World Regional Geography (without Subregions)* Lydia Mihelic Pulsipher,Alex Pulsipher,2005-03-18 More than any other text for the course, Pulsipher's World Regional Geography (WRG) shows students how individuals are affected by, and respond to, economic, social, and political forces at all levels of scale: global, regional, subregional, local. It offers a vivid and inclusive picture of people in a globalizing world--men, women, children, both mainstream and marginalized citizens--not as seen from a Western perspective, but as they see themselves. The core topics of physical, economic, cultural, and political geography are examined from a contemporary perspective, based on authoritative insights from the most recent geographic theory. Energy Efficiency in Buildings José Manuel Andújar, Sergio Gómez Melgar, 2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world. Europe alone is responsible for more than 30% of emissions, or about 900 million tons of CO<sub>2</sub> per year. Heating and air conditioning are the main cause of greenhouse gas emissions in buildings. Most buildings currently in use were built with poor energy efficiency criteria or, depending on the country and the date of construction, none at all. Therefore, regardless of whether construction regulations are becoming stricter, the real challenge nowadays is the energy rehabilitation of existing buildings. It is currently a priority to reduce (or, ideally, eliminate) the waste of energy in buildings and, at the same time, supply the necessary energy through renewable sources. The first can be achieved by improving the architectural design, construction methods, and materials used, as well as the efficiency of the facilities and systems; the second can be achieved through the integration of renewable energy (wind, solar, geothermal, etc.) in buildings. In any case, regardless of whether the energy used is renewable or not, the efficiency must always be taken into account. The most profitable and clean energy is that which is not consumed.
