*Cartography between Christian Europe and the Arabic-Islamic World, 1100-1500* ,2021-06-17 Medieval Christian European and Arabic-Islamic cultures are both notable for the wealth and diversity of their geographical literature, yet to date there has been relatively little attempt to compare medieval Christian and Islamic mapping traditions in a detailed manner. *Cartography between Christian Europe and the Arabic-Islamic World* offers a timely assessment of the level of interaction between the two traditions across a range of map genres, including world and regional maps, maps of the seven climes, and celestial cartography. Through a mixture of synthesis and case study, the volume makes the case for significant but limited cultural transfer. Contributors are: Elly Dekker; Jean-Charles Ducène; Alfred Hiatt; Yossef Rapoport; Stefan Schröder; Emmanuelle Vagnon.

**Iraq** Heather Bleaney,Roper,Peter Sluglett,2004-06-01 Well-considered answers to the many questions raised by the situation in Iraq, past and present, are rare. This first comprehensive, thematically organised, bibliography devoted to Iraq is based on the full Index Islamicus database and is drawn from a wide variety of European-language journals and books. Featuring an extensive introduction to the subject and its literature by Peter Sluglett, this bibliography will help readers to find their way through the massive secondary literature now available. Following the pattern established by the Index Islamicus, both journal articles and book publications are included, as well as important internet resources. The editors have taken care to add much new material to bring its coverage up to date, and supplement the previously published volumes, while the most important and/or influential publications are conveniently highlighted in the introduction. An indispensable gateway for all those with a more than superficial interest in what is, and what has been, happening in this nation so much the focus of attention today.

**A History of Arab-Islamic Geography** S. Maqbul Ahmad,1995

**Shaikhdoms of Eastern Arabia** P. Lienhardt,2001-03-20 This pioneering study captures the traditional social, economic and political systems of the Arab sheikhdoms of the Gulf. It represents a unique and in-depth insight into the complex and varied cultural patterns of the Arabs, Persians and the people of the East African Coast in the 1950s, before the advent of oil wealth radically altered the style of life and expectations of the people living in these sheikhdoms. In a compelling narrative

Lienhardt discusses the tribal structure, relations between men and women, the economics of pearl fishing, the growth of towns and the complex relationship between the ruling sheikhs and their subjects. His findings offer a key to the understanding of the political system and the transition from the tribal to the class system. Specialists on the Gulf and Middle East, social historians and anthropologists will find a wealth of new evidence and analysis in this invaluable and accessible combination of history and anthropology.

**The Middle East** Peter Beaumont, Gerald Blake, J. Malcolm Wagstaff, 2016-04-14 This book, first published in 1976 and in this second edition in 1988, combines an examination of the political, cultural and economic geography of the Middle East with a detailed study of the region's landscape features, natural resources, environmental conditions and ecological evolution. The Middle East, with its extremes of climate and terrain, has long fascinated those interested in the fine balance between man and his environment, and now its economic and political importance in world affairs has brought the region to the attention of everybody.

**Sacred Worlds** Chris C. Park, 1994 Exploring the definitions of religion and its historical and ideological origins, Chris Park looks at the ways in which religion, its symbols, rites, beliefs and hopes, has shaped and changed the world in which we live.

**History of the Arabic Written Tradition Supplement Volume 1** Carl Brockelmann, 2017-08-28 The present English translation reproduces the original German of Carl Brockelmann's *Geschichte der Arabischen Litteratur* (GAL) as accurately as possible. In the interest of user-friendliness the following emendations have been made in the translation: Personal names are written out in full, except b. for ibn; Brockelmann's transliteration of Arabic has been adapted to comply with modern standards for English-language publications; modern English equivalents are given for place names, e.g. Damascus, Cairo, Jerusalem, etc.; several erroneous dates have been corrected, and the page references to the two German editions have been retained in the margin, except in the Supplement volumes, where new references to the first two English volumes have been inserted.

**The Geographical Journal**, 1927 Includes the Proceedings of the Royal geographical society, formerly pub. separately. *Catalogue Calcutta* (India). Imperial library, 1908

**The Biblical Geography of Central Asia** Ern. Frid. Car Rosenmüller, 1836

**GEOGRAPHICAL THOUGHT, SECOND EDITION** DIKSHIT, R. D, 2018-04-01 The book charts out the history of Geographical Thought from early times to the present day in a single compact volume. Its main focus is on the modern period—beginning with Humboldt and Ritter—more specifically on conceptual developments since the Second World War. **NEW TO THE SECOND EDITION** The second edition is thoroughly revised and incorporates five new chapters dealing with: □ Nature, Method, Basic Ideas and Conceptual Structure of Geography □ The Problem of Dualities and How it was Resolved □

Nature and Role of Geography as a Social Science—Geographical vs. Sociological Imagination □ Time vis-à-vis Space—The Pattern-Process Perspective in Geographic Research □ New Directions in the Twenty-First Century Human Geography

Medical Insects and Arachnids R.P. Lane,R.W. Crosskey,2012-12-06 Surprising though it seems, the world faces almost as great a threat today from arthropod-borne diseases as it did in the heady days of the 1950s when global eradication of such diseases by eliminating their vectors with synthetic insecticides, particularly DDT, seemed a real possibility. Malaria, for example, still causes tremendous morbidity and mortality throughout the world, especially in Africa. Knowledge of the biology of insect and arachnid disease vectors is arguably more important now than it has ever been. Biological research directed at the development of better methods of control becomes even more important in the light of the partial failure of many control schemes that are based on insecticide- although not all is gloom, since basic biological studies have contributed enormously to the outstanding success of international control programmes such as the vast Onchocerciasis Control Programme in West Africa. It is a sine qua non for proper understanding of the epidemiology and successful vector control of any human disease transmitted by an arthropod that all concerned with the problem - medical entomologist, parasitologist, field technician - have a good basic understanding of the arthropod's biology. Knowledge will be needed not only of its direct relationship to any parasite or pathogen that it transmits but also of its structure, its life history and its behaviour - in short, its natural history. Above all, it will be necessary to be sure that it is correctly identified.
