**The Book of SHE** Sara Avant Stover, 2015-09-15 Women face many challenging transitions on the pilgrimage from girlhood through womanhood: menses, love and heartbreak, motherhood, menopause. Devoid of a central narrative, these rites of passage too often happen in shame and secrecy, leaving women doubting their personal power and self-worth. Bestselling author and founder of The Way of the Happy Woman®, Sara Avant Stover saw how women erroneously viewed these initiations as “curses” and sought to present a new model that reflected the power and wisdom unique to the feminine path. The Book of SHE celebrates all that it means to be a woman, from mythological underpinnings to the cycles of our day-to-day lives. Drawing on archetypes including Mary Magdalene, the Dark Goddess, and Green Tara, Stover will guide you on a journey home to psychological wholeness, personal empowerment, and, ultimately, full feminine spiritual Awakening. Brimming with mystery and magic, this provocative book makes ancient wisdom and healing practices accessible to every woman who is ready to revel in her full femininity — the dark and the light — through joyfully becoming the heroine of her own life.

*Lifespan* David A. Sinclair, Matthew D. LaPlante, 2019-09-10 A NEW YORK TIMES BESTSELLER “Brilliant and enthralling.” —The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time’s most influential people. It’s a seemingly undeniable truth that aging is inevitable. But what if everything we’ve been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: “Aging is a disease, and that disease is treatable.” This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair’s own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, *Lifespan* will forever change the way we think about why we age and what we can do about it.
