

Housing In The Middle Ages

Henry Glassie

Medieval Housing Jane Grenville, 1997 The archaeological study of standing buildings is experiencing a welcome renaissance. This book outlines recent developments in the field and shows how they have contributed to our understanding of medieval domestic dwellings. Evidence from the buildings themselves, from excavation and from documentary sources is combined to provide an outline of the development of building techniques in the Middle Ages, and current knowledge about the housing of the rich, the middling sort and the poor is reviewed. The specific adaptations demanded of domestic dwellings in the growing context of towns are also discussed.

Daily Life in the Middle Ages Paul B. Newman, 2018-01-16 Although life in the Middle Ages was not as comfortable and safe as it is for most people in industrialized countries today, the term Dark Ages is highly misleading. The era was not so primitive and crude as depictions in film and literature would suggest. Even during the worst years of the centuries

immediately following the fall of Rome, the legacy of that civilization survived. This book covers diet, cooking, housing, building, clothing, hygiene, games and other pastimes, fighting and healing in medieval times. The reader will find numerous misperceptions corrected. The book also includes a comprehensive bibliography and a listing of collections of medieval art and artifacts and related sites across the United States and Canada so that readers in North America can see for themselves some of the matters discussed in the book. Instructors considering this book for use in a course may request an examination copy here.

Globalism in the Middle Ages and the Early Modern Age Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca. 1800, the opposite can well be documented through careful comparative and transdisciplinary studies, as this volume demonstrates, offering a wide range of innovative perspectives on often neglected literary, philosophical, historical, or medical documents. Texts, images, ideas, knowledge, and objects migrated throughout the world already in the pre-modern world, even if the quantitative level compared to the modern world might have been different. In fact, by means of translations and trade, for instance, global connections were established and maintained over the centuries. Archetypal motifs developed in many literatures indicate how much pre-modern people actually shared. But we also discover hard-core facts of global economic exchange, import of exotic medicine, and, on another level, intensive intellectual debates on religious issues. Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable, often desirable, and at times feared, of course. The pre-modern world was much more on the move and reached out to distant lands out of curiosity, economic interests, and political and military concerns. Diplomats crisscrossed the continents, and artists, poets, and craftsmen traveled widely. We can identify, for instance, both the Vikings and the Arabs as global players long before the rise of modern globalism, so this volume promises to rewrite many of our traditional notions about pre-modern worldviews, economic conditions, and the literary sharing on a global level, as perhaps best expressed by the genre of the fable.

Folk Housing in Middle Virginia Henry Glassie, 1975 In this fascinating analysis of eighteenth-century vernacular houses of Middle Virginia, Henry Glassie presents a revolutionary and carefully constructed methodology for looking at houses and interpreting from them the people who built and used them. Glassie believes that all relevant historical evidence - unwritten as well as written - must be taken into account before historical truth can be found. He is convinced that any study of man's past must make use of nonverbal and verbal evidence, since written history - the story of man as recorded by the intellectual elite - does not tell us much about the everyday life, thoughts, and fears of the ordinary people of the past. Such people have always been in the majority, however, and a way has to be found to include them in any valid history. In *Folk Housing in Middle Virginia* Glassie admirably sets forth such a way. The people who lived in Middle Virginia in the eighteenth century are almost unknown to history because so little has been written about them. After Glassie selected the area -

roughly Goochland and Louisa counties - for study, he selected a representative part of the countryside, recorded all the older houses there, developed a transformational grammar of traditional house designs, and examined the area's architectural stability and change. Comparing the houses with written accounts of the period, he found that the houses became more formal and less related to their environment at the same time as the areas established political, economic, and religious institutions were disintegrating. It is as though the builders of the houses were deliberately trying to impose order on the surrounding chaotic world. Previous orthodox historical interpretations of the period have failed to note this. Glassie has provided new insights into the intellectual and social currents of the period, and at that time has rescued a heretofore little-known people from historiographical oblivion. Combining a fresh, perceptive approach with a broad interdisciplinary body of knowledge, he has made an invaluable breakthrough in showing the way to understand the people of history who have left their material things as their only legacy. Henry Glassie is College Professor of Folklore at Indiana University. He is the author of *Pattern in the Material Folk Culture of the Eastern United States*, *Passing the Time in Ballymenone*, *Irish Folktales*, and *The Spirit of Folk Art*. He has served as president of the Vernacular Architecture Forum and the American Folklore Society.

Housing in Medieval and Post-medieval Greece Eleftherios Sigalos, 2004 This detailed study of the housing in Greece between the late Byzantine and early modern periods treats houses as a container of material culture, and of functional and social activity, within the context of a changing socio-economic environment'.

Standards of Living in the Later Middle Ages Christopher Dyer, 1989-03-09 Between 1200 and 1520 medieval English society went through a series of upheavals: this was an age of war, pestilence and rebellion. This book explores the realities of life of the people who lived through those stirring times. It looks in turn at aristocrats, peasants, townsmen, wage-earners and paupers, and examines how they obtained their incomes and how they spent them. This revised edition (1998) includes a substantial new concluding chapter and an updated bibliography.

A Cultural History of Women in the Middle Ages Kim M. Phillips, 2015-04-02 The medieval era has been described as 'the Age of Chivalry' and 'the Age of Faith' but also as 'the Dark Ages'. Medieval women have often been viewed as subject to a punishing misogyny which limited their legal rights and economic activities, but some scholars have claimed they enjoyed a 'rough and ready equality' with men. The contrasting figures of Eve and the Virgin Mary loom over historians' interpretations of the period 1000-1500. Yet a wealth of recent historiography goes behind these conventional motifs, showing how medieval women's lives were shaped by status, age, life-stage, geography and religion as well as by gender. *A Cultural History of Women in the Middle Ages* presents essays on medieval women's life cycle, bodies and sexuality, religion and popular beliefs, medicine and disease, public and private realms, education and work, power, and artistic representation to illustrate the diversity of medieval women's lives and constructions of femininity.

The High Middle Ages Trevor Rowley,2019-07-08 Originally published in 1986, *The High Middle Ages* begins in the late twelfth century and ends, not with the arrival of the Tudor monarchs in 1485, but with the destruction of the wealth and power of the Church in the 1530s. The book looks at how the passing of the monasteries marked the transition from an economic and social system based on a balance – however shifting and uneasy – between the church and state, to a supreme reign of the church. The book discusses how the later middle ages were a period not of decay but of rapid change. It examines how social and economic convulsion emerged in a society marked by restless energy and creativity. The three centuries covered in the book mark a key period of extensive change to the landscape and environment of England between 1200 to 1550.

6,000 Years of Housing Norbert Schoenauer,2000 Part architecture, part history, and part anthropology, this encyclopedic book limns the story of housing around the world from the pre-urban dwellings of nomadic, semi-nomadic, and sedentary agricultural societies to the present. Ancient urban dwellings were inward looking, ranged around a courtyard. Until fairly recently, these dwelling types survived in indigenous urban house forms in the Islamic world, India, China, and the Iberian peninsula and Latin America. After the collapse of the Roman Empire, however, outward-looking house forms replaced the ancient form in most of Europe and the New World.

The Middle Ages Unlocked Gillian Polack,Katrin Kania,2015-06-15 A unique guide to all aspects of life in the Middle Ages.

An Economic History of Medieval Europe Norman John Greville Pounds,2014-06-06 A clear and readable account of the development of the European economy and its infrastructure from the second century to 1500. Professor Pounds provides a balanced view of the many controversies within the subject, and he has a particular gift for bringing a human dimension to its technicalities. He deals with continental Europe as a whole, including an unusually rich treatment of Eastern Europe. For this welcome new edition -- the first in twenty years -- text and bibliography have been reworked and updated throughout, and the book redesigned and reset.

The Village & House in the Middle Ages Jean Chapelot,Robert Fossier,1985-01-01

Houses, Families, and Cohabitation Dag Lindström,Göran Tagesson,2024-11-05 This book is an interdisciplinary study that draws on a combination of archaeological evidence, building archaeological analysis, archival sources to explore the dynamic relations between dwelling houses, social organization of households, and patterns of cohabitation during the eighteenth century. The empirical focus of this book is on Swedish towns, but it also addresses more general issues about urbanity and urban life, space and social organization, and materiality and individual agency. Aggregated questions about urban life and urban space are combined with a micro historical method revealing aspects of daily life and urban change. This study unveils a previously neglected history. Swedish eighteenth century towns have commonly been identified as a

territory characterized by its sleepy absence of change. This study proves the opposite. Houses were built larger, with more diverse and complex inner structures. Family structures changed; households generally became smaller, the share of households headed by a married couple declined, and the number of single households increased. Population density increased, the number of families residing in the same house increased, and rental accommodation became more prevalent. This volume is essential reading for anyone interested in early modern housing, urban change, and interdisciplinary methods.

The Housing Problem Leslie Alexander St. Lawrence Toke, 1912

The Archaeology of Medieval Europe, Vol. 2 Jan Klápšte, 2011-10-31 The two volumes of The Archaeology of Medieval Europe together comprise the first complete account of Medieval Archaeology across the continent. This ground-breaking set will enable readers to track the development of different cultures and regions over the 800 years that formed the Europe we have today. In addition to revealing the process of Europeanisation, within its shared intellectual and technical inheritance, the complete work provides an opportunity for demonstrating the differences that were inevitably present across the continent - from Iceland to Sicily and Portugal to Finland.

Housing Development Andrew Golland, Ron Blake, 2004 Brings together information on housing production, housing provision and the housing environment, highlighting the theoretical and policy contexts in which housing development takes place as an integrated process.
