In the far future, the human race is divided into two groups striving for power. The Patternmaster rules over all, the leader of the telepathic Patternist race whose thoughts can destroy or heal at his whim. The only threat to his power are the Clayarks, mutant humans created by an alien pandemic, who now live either enslaved by the Patternists or in the wild. Coransee, son of the ruling Patternmaster, wants the throne and will stop at nothing to get it, even if it means venturing into the wild mutant-infested hills to destroy a young apprentice -- his equal and his brother.

Mind of My Mind Octavia E. Butler, 2023-03-28 A young woman harnesses her newfound power to challenge the ruthless man who controls her, in this brilliant and provocative novel from the award-winning author of *Parable of the Sower*. Mary is a treacherous experiment. Her creator, an immortal named Doro, has molded the human race for generations, seeking out those with unusual talents like telepathy and breeding them into a new subrace of humans who obey his every command. The result is Mary: a young black woman living on the rough outskirts of Los Angeles in the 1970s, who has no idea how much power she will soon wield. Doro knows he must handle Mary carefully or risk her ending like his previous experiments: dead, either by her own hand or Doro's. What he doesn't suspect is that Mary's maturing telepathic abilities may soon rival his own power. By linking telepaths with a viral pattern, she will create the potential to break free of his control once and for all and shift the course of humanity.

Wild Seed Octavia E. Butler, 2023-03-28 In an epic, game-changing, moving and brilliant story of love and hate, two immortals chase each other across continents and centuries, binding their fates together -- and changing the destiny of the human race (Viola Davis). Doro knows no higher authority than himself. An ancient spirit with boundless powers, he possesses humans, killing without remorse as he jumps from body to body to sustain his own life. With a lonely eternity ahead of him, Doro breeds supernaturally gifted humans into empires that obey his every desire. He fears no one -- until he meets Anyanwu. Anyanwu is an entity like Doro and yet different. She can heal with a bite and transform her own body, mending injuries and reversing aging. She uses her powers to cure her neighbors and birth entire tribes, surrounding herself with kindred who both fear and respect her. No one poses a true threat to Anyanwu -- until she meets Doro. The moment Doro meets Anyanwu, he covets her; and from the villages of 17th-century Nigeria to 19th-century United States, their courtship becomes a power struggle that echoes through generations, irrevocably changing what it means to be human.

"Science, Technology, and Utopias " Christine Filippone, 2017-07-05 The rise of proxy wars, the Space Race, and cybernetics during the Cold War marked science and technology as vital sites of social and political power. Women artists, historically excluded from these domains, responded critically, while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community. In this innovative book, author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women's movement. She argues that artists Alice Aycock, Agnes Denes, Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it—conservative and constricting. Motivated by the contemporary American Women's Movement, these artists transformed science and technology into new modes of artmaking that transgressed modernist, heroic, painterly styles and subverted the traditional economic structures of the gallery, the museum and the dealer. At the same time, the artists also embraced these domains of knowledge and practice as expressions of hope for a better future. Many found inspiration in the scientific theory of open systems, which investigated problems of wholeness, dynamic interaction and organization, enabling consideration of the porous boundaries between human bodies and their social, political and nonhuman environments. Filippone also establishes that the theory of open systems not only informed feminist art, but also continued to

influence women artists? practice of reclamation and ecological art through the twenty-first century.

Gender, Race, and American Science Fiction Jason Haslam, 2015-05-08 This book focuses on the interplay of gender, race, and their representation in American science fiction, from the nineteenth-century through to the twenty-first, and across a number of forms including literature and film. Haslam explores the reasons why SF provides such a rich medium for both the preservation of and challenges to dominant mythologies of gender and race. Defining SF linguistically and culturally, the study argues that this mode is not only able to illuminate the cultural and social histories of gender and race, but so too can it intervene in those histories, and highlight the ruptures present within them. The volume moves between material history and the linguistic nature of SF fantasies, from the specifics of race and gender at different points in American history to larger analyses of the socio-cultural functions of such identity categories. SF has already become central to discussions of humanity in the global capitalist age, and is increasingly the focus of feminist and critical race studies; in combining these earlier approaches, this book goes further, to demonstrate why SF must become central to our discussions of identity writ large, of the possibilities and failings of the human —past, present, and future. Focusing on the interplay of whiteness and its various 'others' in relation to competing gender constructs, chapters analyze works by Nathaniel Hawthorne, Mary E. Bradley Lane, Edgar Rice Burroughs, Philip Francis Nowlan, George S. Schuyler and the Wachowskis, Frank Herbert, William Gibson, and Octavia Butler. Academics and students interested in the study of Science Fiction, American literature and culture, and Whiteness Studies, as well as those engaged in critical gender and race studies, will find this volume invaluable.

Werner Sollors Reader Werner Sollors, 2025-01-31 Born in Silesia, raised in the Frankfurt area and educated in Berlin, Werner Sollors has spent most of his career at Harvard University in the United States and is regarded, in Cornel West's words, 'as one of the finest scholars that we have on race and cultural hybridity in both this country and the world'. This Reader offers the first comprehensive overview of the work of a central figure in the field of ethnic studies. The pieces collected here range from Puritan New England to contemporary Germany, from 'Exodus' to Mary Antin's Promised Land, from the 'Curse of Ham' to Teju Cole. They attest to Sollors' deep historical sensibilities, his attention to textual detail and his awareness of the costs and opportunities of both cosmopolitan ideals and particularist commitments, whilst addressing a central question: why does modernisation take the form of ethnicisation in many places around the globe? The collected essays are complemented by a detailed introduction by Daniel G. Williams which foregrounds some of the key emphases and tensions in Sollors' writings.

Across the Wounded Galaxies Larry McCaffery, 1990 Ten writers whose works have a significant influence on the genre over the past quarter-century speak about their works, their backgrounds, and their aesthetic impulses, discussing New Wave, cyberpunk, hard vs. soft SF, and the viability of science fiction as a means of suggesting political, radical, and sexual agendas. The Routledge Companion to Cyberpunk Culture Anna McFarlane, Lars Schmeink, Graham Murphy, 2019-11-28 In this companion, an international range of contributors examine the cultural formation of cyberpunk from micro-level analyses of example texts to macro-level debates of movements, providing readers with snapshots of cyberpunk culture and also cyberpunk as culture. With technology seamlessly integrated into our lives and our selves, and social systems veering towards globalization and corporatization, cyberpunk has become a ubiquitous cultural formation that dominates our twenty-first century techno-digital landscapes. *The Routledge Companion to Cyberpunk Culture* traces cyberpunk through its historical developments as a literary science fiction form to its spread into other media such as comics, film, television, and video games. Moreover, seeing cyberpunk as a general cultural practice, the Companion provides insights into photography, music, fashion, and activism. Cyberpunk, as the chapters presented here argue, is integrated with other critical theoretical tenets of our times, such as posthumanism, the Anthropocene, animality, and empire. And lastly, cyberpunk is a vehicle that lends itself to the rise of new futurisms, occupying a variety of positions in our regionally diverse reality and thus linking, as much as differentiating, our perspectives on a globalized technoscientific world. With original entries that engage cyberpunk's diverse 'angles' and its proliferation in our life worlds, this critical reference will be of significant interest to humanities students and scholars of media, cultural studies, literature, and beyond.
