The Bleep Test Luke Austen,2023-05-31 What does it mean to help save someone's life? How does it feel to nearly kill a patient? Can we keep our patients safe at night? In the face of overwhelming pressures, can we thrive or only survive? And is a happy life as a doctor still possible? In the early months and years of work, it is these kinds of questions, rather than any technical or knowledge-based queries, which preoccupy many new doctors. This elusive, hidden curriculum is pervasive within departments, around hospitals and across health systems, but is rarely, if ever, explicitly examined and discussed. At its core is the issue that should matter above all others – how we can keep our patients as safe as possible. The Bleep Test combines gripping and startlingly vulnerable recollections of early experiences on the wards with an array of research findings, from psychology and human biology to anthropology, business and behavioural economics. Acknowledging that the truly complex challenges facing new doctors lie far beyond the realms of the traditional medical sciences in which they were trained, the book explains that the shift to being a doctor depends on first understanding how we think, reason and behave as someone we have been all our lives – a human amongst humans. Focused on the experiences of, and the issues facing, recently qualified medics, The Bleep Test is not only for young doctors, but also for anyone who manages them, works with them, cares for them or may one day depend on them.

The Library of Literary Criticism of English and American Authors: 1730-1784 Charles Wells Moulton,1902

Handbook of Curriculum Theory, Research, and Practice Peter Pericles Trifonas,Susan Jagger,2024-02-22 This Handbook paints a portrait of what the international field of curriculum entails in theory, research and practice. It represents the field accurately and comprehensively by preserving the individual voices of curriculum theorist, researchers and practitioners in relation to the ideas, rules, and principles that have evolved out of the history of curriculum as theory, research and practice dealing with specific and general issues. Due to its approach to both specific and general curriculum issues, the chapters in this volume vary with respect to scope. Some engage the purposes and politics of schooling in general. Others focus on particular topics such as evaluation, the use of instructional objectives, or curriculum integration. They illustrate recurrent themes and historical antecedents and the curricular debates arising from and grounded in epistemological traditions. Furthermore, the issues raised in the handbook cut across a variety of subject areas and levels of

education and how curricular research and practice have developed over time. This includes the epistemological foundations of dominant ideas in the field around theory, research and practice that have led to marginalization based on race, class, gender, sexuality, ethnicity, age, religion, and ability. The book argues that basic curriculum issues extend well beyond schooling to include the concerns of anyone interested in how people come to acquire the knowledge, skills, and values that they do in relation to subjectivity and experience.
