Voices of Vision Jayme Lynn Blaschke, 2005-01-01 As the world around us becomes more fantastic, and science itself more surreal, the realms of science fiction and fantasy become correspondingly both more bizarre and more relevant. *Voices of Vision* offers a rare look into the inner workings of this realm and into the very thoughts and methods of those who make it tick: editors and writers of science fiction and fantasy, and creators of comic books and graphic novels. In wide-ranging interviews that are by turns intimate and thought provoking, irreverent and outrageous, Jayme Lynn Blaschke talks shop with some of the most interesting voices in these genres as well as the people behind them, such as current *Science Fiction Weekly* and former *Science Fiction Age* editor Scott Edelman. A host of authors talk to Blaschke about what it's like to do what they do, how they work and how they started, and where they think the genre is headed. Blaschke talks to writers such

as Robin Hobb, Charles de Lint, Patricia Anthony, and Elizabeth Moon; revered authors of comic books and graphic novels, including Neil Gaiman and Brad Meltzer; and icons such as Samuel R. Delany, Gene Wolfe, Harlan Ellison, and Jack Williamson. Editors such as Gardner Dozois, editor of Asimov's Science Fiction magazine, discuss their publishing philosophies and strategies, the origins and probable directions of their magazines, and the broader influence of such ventures. For devoted reader, aspiring writer, and curious onlooker alike, these interviews open a largely hidden, endlessly engrossing world.

Cartoonists, Works, and Characters in the United States through 2005 John Lent, 2006-04-30 This penultimate work in John Lent's series of bibliographies on comic art gathers together an astounding array of citations on American cartoonists and their work. Author John Lent has used all manner of methods to gather the citations, searching library and online databases, contacting scholars and other professionals, attending conferences and festivals, and scanning hundreds of periodicals. He has gone to great length to categorize the citations in an easy-to-use, scholarly fashion, and in the process, has helped to establish the field of comic art as an important part of social science and humanities research. The ten volumes in this series, covering all regions of the world, constitute the largest printed bibliography of comic art in the world, and serve as the beacon guiding the burgeoning fields of animation, comics, and cartooning. They are the definitive works on comic art research, and are exhaustive in their inclusiveness, covering all types of publications (academic, trade, popular,

fan, etc.) from all over the world. Also included in these books are citations to systematically-researched academic exercises, as well as more ephemeral sources such as fanzines, press articles, and fugitive materials (conference papers, unpublished documents, etc.), attesting to Lent's belief that all pieces of information are vital in a new field of study such as comic art.
