**Taken by Bear in Yellowstone** Kathleen Snow,2016-03-07 Humans and grizzly bears have been coming into contact in Yellowstone National Park ever since it was founded in 1872. Most of these encounters have ended peacefully, but many have not. In order to most accurately tell the stories of those involved in the more deadly incidents, Kathleen Snow went directly to the source: the National Park Service archives. **Bears in the Bird Feeders** Jim Poling, Sr.,2013-03-30 As well as fun and relaxation, cottage living throughout the seasons is a reminder that all of us, even the most urbanized individual, are part of the natural world. Listen carefully and you will hear cottage country whispering lessons that can make our lives less frenetic, less complicated. The mournful call of

the loon, the wind sighing in the trees, the hammering of the pileated woodpecker remind us that we are a part of a more natural world too often lost in our urban societies. Reflections from a still lake and a flickering campfire help us to realize that things might go easier for humankind if more issues were examined in softer, reflective light and without heated debate. People gathered at campfires, soothed by nature's tranquility, tend to listen and be more thoughtful before they speak. This book will bring you on a journey through four seasons of cottaging and show you that nature has a remarkable power to heal – it just needs the human race to give it a helping hand. Along the way it will introduce you to some tips and tricks for making cottage life more comfortable and enjoyable.

Book one – *Bear With Me*: This bear shifter tried to leave his roots, only to discover that what he left behind was exactly what he needed. Peter Karhu left his bear shifter pack to live among the humans over a decade ago, and he's not once regretted the decision. Scandals and threats of exposure to shifters everywhere seem small when it's all he can do to keep from claiming Winona as his own. Book two – *Bear it All*: There's a new bear in town, and he's tired of being alone. Four years ago, bear shifter Remy Ibhere found his fated mate. Four years ago, he was forced to let her go. His bear has never forgiven him. Now his bear refuses to stay away any longer, so Remy devises a plan to conquer the demons from her past in order to win her over. When his plan is unexpectedly thwarted, suddenly, Remy and Mallory are charging across country in a race against time, against their enemy—and her past demons. When they make it to their destination, will Mallory walk away again? Will Remy let her this time?

**Never Look a Polar Bear in the Eye** Zac Unger, 2013-01-29 In this humorous mix of travelogue and memoir, a writer temporarily moves his California family north to Canada's Polar Bear Capital of the World. Welcome to Churchill, Manitoba. Year-round human population: 943. Yet despite the isolation and the searing cold here at the arctic's edge, visitors from around the globe flock to the town every fall, driven by a single purpose: to see polar bears in the wild. Churchill is "The Polar Bear Capital of the World." And for one unforgettable "bear season," Zac Unger, his wife, and his three children moved from Oakland, California, to make it their temporary home. But they soon discovered that it's really the polar bears who are at home in Churchill, roaming past the coffee shop on the main drag, peering into garbage cans, scratching their backs against fence posts and front doorways. Where kids in other towns receive admonitions about talking to strangers, Churchill schoolchildren get "Let's All Be Bear Aware" booklets to bring home. (Lesson number 8: Never explore bad-smelling areas.) Zac Unger takes readers on a spirited and often wildly funny journey to a place as unique as it is remote, a place where natives, tourists, scientists, conservationists, and the most ferocious predators on the planet converge. In the process he becomes embroiled in the controversy surrounding "polar bear science"—and finds out that some of what we've been led to believe about the bears' imminent extinction may not be quite the case. But mostly what he learns is about human behavior in extreme situations . . . and also why you should never even think of looking a polar bear in the eye.
