Separate chapters on fluid dynamics (drawing on the author's own research) and vascular pathology cater for the needs of those with a particular interest in the pathophysiological principles.

Human Anatomy A. Halim, 2008-01-31 The present volumes endeavour to integrate different subdivisions of anatomy to enable students of anatomy to learn all the relevant aspects of a topic like osteology, soft parts, development and clinical

application at the same time. It is a common knowledge that bone carries our anatomy and forms its central part. As such, each topic begins with a brief description of the skeletal framework of the region followed by the description of the surrounding soft parts. The study of soft parts does not merely lie in parroting of relations of structures but it essentially relies on visualization of parts and regions based on dissection and diagrams. Anatomy, if not understood in its proper perspective and only memorised in parts, tends to be forgotten. Anatomy per se is a visual science and the best methods of visual recall of structural interrelationship are simple diagrams. Line diagrams which can be easily reproduced constitute an important feature of the book. Besides, this book is profusely illustrated. Every mutual relationship of soft structures has been explained by well-placed diagrams. It is widely recognised that anatomy can be made interesting, easy to understand and assimilate by dealing with its clinical application. At the end of each topic under the heading Clinical Application, close relationships existing between the regional anatomy and clinical medicine are explained. Thus, the book is meant to be very useful to the students during their clinical years also. It is hoped that the book will be highly useful for students of M.B.B.S.

Dialysis Access Jacob A. Akoh, Nadey S. Hakim, 2001 The incidence of treated end stage renal disease (ESRD) continues to rise, particularly in the western world. Although renal transplantation is the treatment of choice for ESRD, the decline in the number of cadaveric organs, coupled with the rising demand for transplantation, means that an increasing number of patients will have to depend on dialysis. Vascular or peritoneal access is the Achilles' heel of any dialysis service. This book offers a clear description of the state of the art in providing and preserving a durable and reliable access. It also points the way to dialysis in the 21st century. The contributing authors are drawn from a wide background, with expertise in various aspects of dialysis access, including its history, the technique of placement, anaesthesia, radiology, nursing care and training of vascular access surgeons. There is currently a dearth of books on the subject of dialysis access. The few existing books on vascular access were written in the United States, with none from the UK. This volume is intended for use by transplant surgeons, general surgeons with an interest in vascular access, vascular surgeons, nephrologists, trainees and nurses. Dialysis services are expanding worldwide and this book is an invaluable guide for those involved in daily patient care and organisation of dialysis services. Contents: Dialysis Access: Past, Present and Future (J A Akoh); Modality Selection and Patient Outcome (K Farrington); Continuous Quality Improvement Through Clinical Pathways (K L Brayman & P Wallace); The Access Clinic (D M Manas); Recirculation and Dialysis Access (P W Chamney); The Value of Ultrasonic Imaging in Defining the Anatomy for Vascular Access (A Eltayar et al.); Anaesthetic Management (P Korsah & N Pace); Arteriovenous Fistulas (N S Hakim); Use of Autogenous Vein or Synthetic Grafts (A G Hakaim & W A Oldenburg); Complications of Vascular Access (K M Rigg); Revision Access Surgery (P A Lear); Central Venous Catheters (J A Akoh); Access for Paediatric Patients (O N Fernando); Radiology of Access (A Al-Kutoubi); Peritoneal Dialysis Access (M A Akyol); Nursing Care of Patients with Dialysis Access (J Emery). Readership: Transplant surgeons, vascular surgeons, nephrologists, trainees and nurses.
