Searching for Words: How Can We Tell Our Stories of Suicide, 2019-01-04 This volume was first published by Inter-Disciplinary Press in 2013. It is all too easy to begin the introduction of a book examining suicide by citing statistics on rates of death around the world. The vast majority of research seeks to make sense of suicide through quantitative analysis; however, this does not begin to do justice to the lived experience. While we do not wish to suggest there is one 'right' lens through which to study suicide, we must recognize that there are myriad lenses through which to examine it. There are many voices, many stories that must be heeded, and these stories are not just of the people who have themselves died by suicide, but also those who are or have been suicidal and those who have been bereaved by suicide. By examining cultural perspectives, different media, memory and place, as well as loss, this book aims to tell stories of suicide and working and living with the suicidal.

Scripting Suicide in Japan Kirsten Cather, 2024-10-15 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Japan is a nation saddled with centuries of accumulated stereotypes and loaded assumptions about suicide. Many pronouncements have been made about those who have died by their own hand, without careful attention to the words of the dead themselves. Drawing upon far-ranging creations by famous twentieth- and twenty-first-century Japanese writers and little-known amateurs alike—such as death poems, suicide notes, memorials, suicide maps and manuals, works of literature, photography, film, and manga—Kirsten Cather interrogates how suicide is scripted and to what end. Entering the orbit of suicidal writers and

readers with care, she shows that through close readings these works can reveal fundamental beliefs about suicide and, just as crucially, about acts of writing. These are not scripts set in stone but graven images and words nonetheless that serve to mourn the dead, straddling two impulses: to put the dead to rest and to keep them alive forever. These words reach out to us to initiate a dialogue with the dead, one that can reveal why it matters to write into and from the void.

The Anatomy of Loneliness Chikako Ozawa-de Silva, 2021-12-07 Loneliness is everybody's business. Neither a pathology nor a rare affliction, it is part of the human condition. Severe and chronic loneliness, however, is a threat to individual and public health and appears to be on the rise. In this illuminating book, anthropologist Chikako Ozawa-de Silva examines loneliness in Japan, focusing on rising rates of suicide, the commodification of intimacy, and problems impacting youth. Moving from interviews with college students, to stories of isolation following the 2011 natural and nuclear disasters, to online discussions in suicide website chat rooms, Ozawa-de Silva points to how society itself can exacerbate experiences of loneliness. A critical work for our world, *The Anatomy of Loneliness* considers how to turn the tide of the "lonely society" and calls for a deeper understanding of empathy and subjective experience on both individual and systemic levels.

Rational Suicide, Irrational Laws Susan Stefan,2016-02-25 When should we try to prevent suicide? Should it be facilitated for some people, in some circumstances? For the last forty years, law and policy on suicide have followed two separate and distinct tracks: laws aimed at preventing suicide and, increasingly, laws aimed at facilitating it. In *Rational Suicide, Irrational Laws* legal scholar Susan Stefan argues that these laws co-exist because they are based on two radically disparate conceptions of the would-be suicide. This is the first book that unifies policies and laws, including constitutional law, criminal law, malpractice law, and civil commitment law, toward people who want to end their lives. Based on the author's expert understanding of mental health and legal systems, analysis of related national and international laws and policy, and surveys and interviews with more than 300 suicide-attempt survivors, doctors, lawyers, and mental health professionals, *Rational Suicide, Irrational Laws* exposes the counterproductive nature of current policies and laws about suicide. Stefan proposes and defends specific reforms, including increased protection of mental health professionals from liability, increased protection of suicidal people from coercive interventions, reframing medical involvement in assisted suicide, and focusing on approaches to suicidal people that help them rather than assuming suicidality is always a symptom of mental illness. Stefan compares policies and laws in different states in the U.S. and examines the policies and laws of other countries in Europe, Asia, and the Americas, including the 2015 legalization of assisted suicide in Canada. The book includes model statutes, seven in-depth studies of people whose cases presented profound ethical, legal, and policy dilemmas, and over a thousand cases interpreting rights and responsibilities relating to suicide, especially in the area of psychiatric malpractice.

Suicide Derek Beattie,Dr Patrick Devitt,2015-03-01 When is it okay for a person to kill themselves? How have ideas about this changed over time, and how do they differ across cultures? How do Ireland's suicide rates, especially among its young men, compare to rates in other countries in Europe and beyond? Are we obsessed today with the idea of suicide? Is it possible to prevent suicide - and, if so, how? Should we try to prevent all suicides, or are there some that we should allow, regulate, even assist? Might some suicides be rational? How are families affected by suicide? What can they do if a family member is suicidal? How can they cope after a suicide? Are doctors able to identify which pregnant women are at high risk of killing themselves? Would allowing these women to have abortions make them less likely to kill themselves? In this wide-ranging review and analysis of historical and scientific research on the topic of suicide, authors Derek Beattie and Dr Patrick Devitt take an unflinching and often chillingly rational look at these questions and many others.

A Study on Suicide Jianjun Li, 2019-11-26 This book systematically presents and classifies the latest advances in suicide research in contemporary China, examines the status quo of suicides in China and analyzes the reasons for suicides among three high-risk groups, namely: rural females, teenagers, and the elderly. It reveals the deep-seated influence of traditional Chinese values and socio-cultural customs on suicide and puts forward a way to prevent suicide. This book argues that high suicide rates stem from flaws in the social fabric. Effectively reducing suicide rates and mitigating the damage done by suicide as a social disease is not only the responsibility of the state government, but also that of social, educational and medical professionals.

Suicide John Bateson, 2024-09-03 An urgent call to action on a rising—and preventable—trend. Each year in the United States alone, nearly 50,000 individuals die by suicide; more than 1.2 million others attempt it. John Bateson, former executive director of a suicide prevention center, examines this national tragedy from multiple angles while debunking common myths, sharing demographic data, and identifying risk factors and warning signs. Suicide provides essential information about the current landscape surrounding suicide in the United States as well as strategies to prevent further tragedy. Bateson emphasizes that the rise in suicide and attempted suicide is not only a mental health issue affecting individuals but also an urgent problem for society at large. He discusses suicide in parks, prisons, and the military, as well as assisted suicide, suicide by cop, and murder-suicide. In particular, he details the stark relationship among guns, drugs, jump sites, and suicide, focusing on one of the most effective ways to prevent suicide—restricting access to lethal means. In addition to presenting practical information for identifying people at risk of suicide, Bateson details important steps that individuals, businesses, and the government can take to end this public health problem.

The Revolution Will Not Be Downloaded Tara Brabazon, 2008-01-31 This book attacks the often implicit and damaging assumption that 'everyone' is online and that 'everyone' is using online resources within the specified parameters of employers, government and national laws. This book summons a critical Web Studies, asking not only who is using particular applications, but also how and why. This remedial work is required. The concept and label of 'Web 2.0' is part of a wide-ranging suite of assumptions that offer simple answers to difficult questions. The term captures a desire for online collaboration and the sharing of information, performed most visibly through blogs, podcasts and wikis. Other 'products' that capture the Web 2.0 ideology include Google Maps, Facebook, MySpace and Flickr. Within this framework, websites no longer hold information but become a platform to connect applications with users. The business applications have gained the most attention - particularly content syndication - but there are also 'political' initiatives overlaying this project including open communication, the sharing of data and the deep linking of web architecture. - Development of innovative concepts and models to manage the digital divide - Evocative studies of the digitally excluded and downloading communities - Attention to digital literacy and online education

Scream Margee Kerr,2015-09-29 Shiver-inducing science not for the faint of heart. No one studies fear quite like Margee Kerr. A sociologist who moonlights at one of America's scariest and most popular haunted houses, she has seen grown men laugh, cry, and push their loved ones aside as they run away in terror. And she's kept careful notes on what triggers these responses and why. Fear is a universal human experience, but do we really understand it? If we're so terrified of monsters and serial killers, why do we flock to the theaters to see them? Why do people avoid thinking about death, but jump out of planes and swim with sharks? For Kerr, there was only one way to find out. In this eye-opening, adventurous book, she takes us on a tour of the world's scariest experiences: into an abandoned prison long after dark, hanging by a cord from the highest tower in the Western hemisphere, and deep into Japan's mysterious suicide forest. She even goes on a ghost hunt with a group of paranormal adventurers. Along the way, Kerr shows us the surprising science from the newest studies of fear -- what it means, how it works, and what it can do for us. Full of entertaining science and the thrills of a good ghost story, this book will make you think, laugh -- and scream.

Pacific Exposures Melissa Miles,Robin Gerster,2018-12-19 Photography has been a key means by which Australians have sought to define their relationships with Japan. From the fascination with all things Japanese in the late nineteenth century, through the era of 'White Australia', the bitter enmity of the Pacific War, the path to reconciliation in the post-war period and the culturally complicated bilateralism of today, Australians have used their cameras to express a divided sense of conflict and kinship with a country that has by turns fascinated and infuriated. The remarkable photographs collected and discussed here for the first time shed new light on the history of Australia's engagement with its most important regional partner. *Pacific Exposures* argues that photographs tell an important story of cultural production, response and reaction—not only about how Australians have pictured Japan over the decades, but how they see their own place in the Asia-Pacific. 'Pacific Exposures presents the first study of the photographic exchanges between Australia and Japan—its photographers, personalities, motivations, anxieties and tensions—based on a diverse range of archival materials, interviews, and well-chosen photographs.' — Dr Luke Gartlan, University of St Andrews '[Pacific Exposures] will become a key text on Australia's interactions with Japan, and the way that photographs can inform cross-cultural relations through their production, consumption and circulation.' — Prof. Kate Darian-Smith, University of Tasmania

Mental Health in the Digital Age Dr Elias Aboujaoude, Dr Vladan Starcevic, 2015-04-01 The Internet and related technologies have reconfigured every aspect of life, including mental health. Although the negative and positive effects of digital technology on mental health have been debated, all too often this has been done with much passion and few or no supporting data. In *Mental Health in the Digital Age*, Elias Aboujaoude and Vladan Starcevic have edited a book that brings together distinguished experts from around the world to review the evidence relating to this area. The first part of the book addresses threats resulting from the growing reliance on, and misuse of, digital technology; it also looks at how some problematic behaviors and forms of psychopathology have been shaped by this technology. This section reviews problematic Internet and video game use, effects of violent video games on the levels of aggression and of online searches for health-related information on the levels of health anxiety, use of digital technology to harm other people, and promotion of suicide on the Internet. The second part of *Mental Health in the Digital Age* examines the ways in which digital technology has boosted efforts to help people with mental health problems. These include the use of computers, the Internet, and mobile phones to educate and provide information necessary for psychiatric treatment and to produce programs for psychological therapy, as well as use of electronic mental health records to improve care. *Mental Health in the Digital Age* is a unique and timely book because it examines comprehensively an intersection between digital technology and mental health and provides a state-of-the-art, evidence-based, and well-balanced look at the field. The book is a valuable resource and guide to an area often shrouded in controversy, as it is a work of critical thinking that separates the hype from the facts and offers data-driven conclusions. It is of interest particularly to mental health professionals, but also to general audience.

Routledge Handbook of Contemporary Japan Hiroko Takeda, Mark Williams, 2020-09-21 The *Routledge Handbook of Contemporary Japan* presents a synthesized, interdisciplinary study of contemporary Japan based on up-to-date theoretical models designed to provide readers with a comprehensive and full understanding of the dynamics of contemporary Japan. In order to achieve this, the Handbook is organized into two parts. Part I, 'Foundations', clarifies the state of contemporary Japan topic by topic by referring to the latest theoretical developments in the relevant disciplinary fields of politics, international relations, economy, society, culture and the personal. Part II, 'Issues', then offers a series of concrete analyses building upon the theoretical discussions introduced in Part I to help undergraduate and postgraduate students learn how to conduct independent analysis. Locating Japan in a comparative and interdisciplinary perspective, this Handbook is an essential resource for students and scholars interested in Japanese studies, Asian studies and global studies.

Anti-nuclear Protest in Post-Fukushima Tokyo Alexander Brown, 2018-04-19 This book explores the politics of anti-nuclear activism in Tokyo after the Fukushima nuclear disaster of March 2011. Analyzing the protests in the context of a

longer history of citizen activism in Tokyo, it also situates the movement within the framework of a global struggle for democracy, from the Arab Spring to Occupy Wall Street. By examining the anti-nuclear movement at both urban and transnational scales, the book also reveals the complex geography of today's globally connected social movements. It emphasizes the contestation of urban space by anti-nuclear activists in Tokyo and the weaving together of urban and cyber space in their praxis. By focusing on the cultural life of the movement—from its characteristic demonstration style to its blogs, zines and pamphlets—this book communicates activists' voices in their own words. Based on excellent ethnographic research, it concludes that the anti-nuclear protests in Tokyo after the Fukushima disaster have redefined social movement politics for a new era. Providing an analysis of a unique period in Japan's contemporary urban history from the perspective of eyewitness observations, this book will be useful to students and scholars of Japanese Politics, Sociology and Japanese Studies in general.

I Know Who You Are and I Saw What You Did Lori Andrews, 2012-01-10 Hailed as “stunning” (New York Post), “authoritative” (Kirkus Reviews), and “comprehensively researched” (Shelf Awareness), a shocking exposé of the widespread abuses of our personal online data by a leading specialist on Web privacy. Social networks, the defining cultural movement of our time, offer many freedoms. But as we work and shop and date over the Web, we are opening ourselves up to intrusive privacy violations by employers, the police, and aggressive data collection companies that sell our information to any and all takers. Through groundbreaking research, Andrews reveals how routinely colleges reject applicants due to personal information searches, robbers use vacation postings to target homes for break-ins, and lawyers scour our social media for information to use against us in court. And the legal system isn't protecting us—in the thousands of privacy violations brought to trial, judges often rule against the victims. Providing expert advice and leading the charge to secure our rights, Andrews proposes a Social Network Constitution to protect us all. Now is the time to join her and take action—the very future of privacy is at stake. Log on to www.loriandrews.com to sign the Constitution for Web Privacy.
