Lite Leadership Bennett Annan PsyD EdD, 2021-07-06 Many workplaces have become dark, confused, and in shambles—the COVID-19 pandemic has pushed some companies into crisis. Even though it's easy to see employees are disillusioned, unmotivated, and uninspired, problems continue to fester. Conventional leadership strategies have helped us develop the internet, go to outer space, and create nuclear bombs. But too often, leaders themselves have made choices at the expense of humanity. A new kind of global leader, a LeaderLITE®, has emerged as a result of globalization. These leaders can deal with multifaceted intellectual and cultural issues, while also being sensitive to the ethical needs of the people they serve. Lite Leadership is necessary for every forward-thinking executive. In this book, you will learn how to become a LeaderLITE®, a holistic leader who attends to all three of components of a human being: mind, body, and spirit. You will also learn how to develop the perfect combination of your Physical health, Emotional stability, Personal growth, Spiritual resilience, and Environmental culture to form your own PEPSE® system of leadership that no longer settles for anything less than the best for mankind. Finally, you will learn how Lite Leadership will help you lead and manage people so they can quickly adapt to this new world of globalization.

LEADERSHIP TRAINING Punam Agarwal,2020-05-01 Leadership, is a topic that's never convincingly satisfiable after reading just one book. Hence I have tried to collate as much as possible the best in my opinion here. This book can be used in two ways—One as just a good self read to understand Leadership as a whole. Second as a medium to train others providing great resource to trainers and educators for developing good leaders all over the world. Please feel free to use the matter from here and enhance it further as per your training needs. This might be just a drop in the ocean effort from my end but as Mother Teresa would put it—'Each drop gathered forms an ocean'...I have started for you to continue...Hope this drop in the ocean adds value to your life and training sessions...Good leaders build good nations and good nations would lead to building a peaceful world.

It highlights myths and misperceptions existing about leadership and their negative impact on the practical application. The book discusses existing theories of leadership, analyzes strengths of individual theories, and their weaknesses in providing a holistic view of leadership, leading to a need for a holistic approach to leadership. The book builds up a holistic model and plugs in the existing theories to develop a bigger picture. The cardinals of the holistic model are then discussed as individual chapters from theoretical as well as practical aspects of leadership. The discussion of individual cardinals is finally translated into an applied leadership model that presents a comprehensive view of leadership, bridges the theory-practice gap and can be used as a framework for researchers and practitioners of leadership.

Leadership may be exercised through a vertical, horizontal, shared, or distributed leadership approach. However, balanced leadership ensures the best suitable approach is used in any given situation. Based on an award-winning global program of research studies, *Balanced Leadership* is a thorough investigation of balanced leadership in projects. Ralf Müller, Nathalie Drouin, and Shankar Sankaran present a project-specific leadership approach as well as a theory of balanced leadership, and the situations in which different strategies are required. They also outline the five building blocks that enable balanced leadership: nomination of team members, identification of potential leaders, selection and empowerment of leaders, empowered leadership and its governance, and leadership transition. The book explains the coordination of these building blocks through the socio-cognitive space shared by project manager and team. Geriatric Medicine Michael R. Wasserman, Debra Bakerjian, Sunny Linnebur, Sharon Brangman, Matteo Cesari, Sonja Rosen, 2024-02-19 Both volumes sold as a combined set for a one-time purchase! Older adults represent the most rapidly growing demographic in the U.S. and in many developed countries around the world. The field of geriatric medicine is still relatively young, and is only recently seeing a significant increase in peer reviewed literature. Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars/year in the US. How our healthcare system cares for older adults, and how those older adults navigate an increasingly complex system, is of the utmost importance. According to the Institute of Medicine, physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine. Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life. It is essential that physicians, nurse practitioners, physician assistants, pharmacists, social workers and other health care professionals all be knowledgeable about the geriatric approach to care. Geriatric medicine varies from most other fields in medicine. While many specialties function on the basis of evidence-based literature, geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants. Geriatricians are used to caring for 90 year olds with multiple chronic illnesses. Their variable physiology leads to uncertain responses to pharmacotherapy, and their personal goals and wishes need to be incorporated into any plan of care. Practicing geriatric medicine requires the ability to see patterns. But it goes one step further, as the rules are constantly in flux. Every patient is an individual with particular needs and goals. In order to provide true person centered care to older adults, one has to incorporate these factors into the decision making process. The proposed

handbook is designed to present a comprehensive and state-of-the-art update that incorporates existing literature with clinical experience. Basic science and the physiology of aging create a background, but are not the main focus. This is because every chapter has been written through the lens of “person centered care.” This book is about focusing on what matters to the person, and how that is not always about pathology and physiology. The reader generally will not find simple solutions to symptoms, diseases and syndromes. In fact, the key to caring for geriatric patients is the ability to think both critically and divergently at the same time. Geriatrics encompasses multiple disciplines and spans all of the subspecialties. It requires knowledge of working within an interdisciplinary team. It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary. And most of all, it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care. This book aims to serve as an unparalleled resource for meeting these challenges. Updated and revised from the previous edition, this text features over 40 new peer-reviewed chapters, new references, and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine.

The H.E.A.R.T. of Leadership Dr. Carla D. Brown, 2020-11-11 The H.E.A.R.T. of Leadership: Understanding Key Characteristics Which Strengthen Organizational Capacity examines characteristics of leadership that helps to motivate employees' efforts toward organizational goals. It further highlights the impact that Humility, Empathy, Agility, Responsibility, and Transparency (H.E.A.R.T.) has on the leader-follower relationship, affecting organizational productivity. While successful leaders are capable of motivating others toward common goals, extraordinary leaders can create social order, change organizational culture, and complete the mission of an organization. For this to occur, leaders must consider the organization's most viable resources; its workers. Additionally, leaders should ensure that workers share the same espoused values as the leaders. This book explicates the critical nature of leadership characteristics on the overall effectiveness of organizations led by those with the H.E.A.R.T. to lead. “I particularly appreciated Carla's insights in two areas; the sociological perspective and the leadership calling. A key thought from the Sociological perspective is ‘From a sociological perspective, leaders are viewed by what they represent. As Carla addresses leadership calling, she notes ‘Those who are called into leadership are given capabilities that must be sustained to fulfill their God-given purpose’ and ‘While many challenges exist for leaders when considering whether to make organizational changes, today's Christian leaders can transform their organizations when using Scripture as a guide.’ This was insightful throughout. Congratulations Dr. Brown!” Dr. Diane Wiater, Regent University
