Engineering Geology for Society and Territory - Volume 3 Giorgio Lollino, Massimo Arattano, Massimo Rinaldi, Orazio Giustolisi, Jean-Christophe Marechal, Gordon E. Grant, 2014-08-21 This book is one out of 8 IAEG XII Congress volumes and deals with river basins, which are the focus of many hydraulic engineering and hydrogeological studies worldwide. Such studies examine river systems as both a resource of the fluvial environment, and also explore river-related hazards and risks. The contributions of researchers from different disciplines focus on: surface-groundwater exchanges, stream flow, stream erosion, river morphology and management, sediment transport regimes, debris flows, evaluation of water resources, dam operation and hydropower generation, flood risks and flood control, stream pollution and water quality management. The contributions include case studies for advancing field monitoring techniques, improving modeling and assessment of rivers and studies contributing to better management plans and policies for the river environment and water resources. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering Geology. Landslide Processes. River Basins, Reservoir Sedimentation and Water Resources. Marine and Coastal Processes. Urban Geology, Sustainable Planning and Landscape Exploitation. Applied Geology for Major Engineering Projects. Education, Professional Ethics and Public Recognition of Engineering Geology. Preservation of Cultural Heritage.

Warmwater Fisheries James L. Cooper, R. H. Hamre, 1999-09 Proceedings of a symposium on warmwater fisheries held by the U.S. Forest Service at Scottsdale, AZ on June 4-8, 1991. Panels include: management opportunities and challenges: keys to better service; warmwater fisheries: a resource to be managed; artificial structures -- where they work and how to build them; where the fish come from; water level management; warmwater streams -- a strong current for quality management; non-traditional fishing holes; fertilization and forage fish management; hooking mortality; harvest regulations; recreational fishing; and the role of education in fisheries management. Illustrated.
