Pop Stars on Film Kirsty Fairclough, Jason Wood, 2023-02-23 Pop stars have provided audiences with performative moments that have become ingrained in popular consciousness. They are a lens through which deeper understandings about race, gender, politics, history and the artistic process can be understood. When combined with the most affective of mediums – cinema, the combination can be both thrilling and alarming. From the relatively early days of cinema, figures from the world of popular music have made forays into acting and contributed cameo appearances. From Little Richard and Kylie Minogue to Nick Cave and Tom Waits, *Pop Stars On Film: Popular Culture in a Global Market* offers a collection of essays on some of the most influential international performances from a diverse range of cultural icons. The book considers industry shifts, access and diversity, but also the notion of cultural appropriation, audience appeal, marketing and demographics. Perhaps most importantly, the publication will look at what happens when cultures collide and coalesce.

Stars and Silhouettes Joceline Andersen, 2020-10-13 Extensive account of the cameo's production history and how audiences affirm their mastery of celebrity culture. *Stars and Silhouettes: The History of the Cameo Role in Hollywood* traces the history of the cameo as it emerged in twentieth-century cinema. Although the cameo has existed in film culture for over a century, Joceline Andersen explains that this role cannot be strictly defined because it exists as a constellation of interactions between duration and recognition, dependent on who is watching and when. Even audiences of the twenty-first century who are inundated by the lives of movie stars and habituated to images of their personal friends on screens continue to find cameos surprising and engaging. Cameos reveal the links between our obsession with celebrity and our desire to participate in the powerful cultural industries within contemporary society. Chapter 1 begins with the cameo's precedents in visual culture and the portrait in particular—from the Vitagraph executives in the 1910s to the emergence of actors as movie stars shortly after. Chapter 2 explores the fan-centric desire for behind-the-scenes visions of Hollywood that accounted for the success of cameo-laden, Hollywood-set films that autocratic studios used to make their glamorous line-up of stars as visible as possible. Chapter 3 traces the development of the cameo in comedy, where cameos began to show not only glimpses of celebrities at their best but also of celebrities at their worst. Chapter 4 examines how the television guest spot became an important way for stars and studios to market both their films and stars from other media in trades that reflected an increasingly integrated mediascape. In Chapter 5, Andersen examines auteur cameos and the cameo as a sign of authorship.

Director cameos reaffirm the fan's interest in the film not just as a stage for actors but as a forum for the visibility of the director. Cameos create a participatory space for viewers, where recognizing those singled out among extras and small roles allows fans to demonstrate their knowledge. *Stars and Silhouettes* belongs on the shelf of every scholar, student, and reader interested in film history and star studies.

I'm Not a Film Star Ian Dixon, Brendan Black, 2022-07-14 The first collection dedicated to David Bowie's acting career shows that his film characterisations and performance styles shift and reform as decoratively as his musical personas. Though he was described as the most influential pop artist of the 20th century, whose work became synonymous with mask, mystery, sexual excess and ch-ch-ch-changing genres, Bowie also applied his genius to the craft of acting. Bowie's considerable filmography is systematically examined in 12 scholarly essays that include tributes to Bowie's performance craft in other media forms. Classic films such as *The Prestige* and *Merry Christmas*, *Mr. Lawrence*, cult hits *Labyrinth* and *The Man Who Fell To Earth*, as well as lesser-known roles in *The Image*, *Christiane F.* and Broadway hit *The Elephant Man* are viewed, not simply through the lens of Bowie's mega-stardom, but as the work of a serious actor with inimitable talent. This compelling analysis celebrates the risk-taking intelligence and bravura of David Bowie: actor, mime, mimic and icon.

Shooting Stars of the Small Screen Douglas Brode, 2010-01-01 Since the beginning of television, Westerns have been playing on the small screen. From the mid-1950s until the early 1960s, they were one of TV's most popular genres, with

millions of viewers tuning in to such popular shows as *Rawhide*, *Gunsmoke*, and Disney's *Davy Crockett*. Though the cultural revolution of the later 1960s contributed to the demise of traditional Western programs, the Western never actually disappeared from TV. Instead, it took on new forms, such as the highly popular *Lonesome Dove* and *Deadwood*, while exploring the lives of characters who never before had a starring role, including anti-heroes, mountain men, farmers, Native and African Americans, Latinos, and women. *Shooting Stars of the Small Screen* is a comprehensive encyclopedia of more than 450 actors who received star billing or played a recurring character role in a TV Western series or a made-for-TV Western movie or miniseries from the late 1940s up to 2008. Douglas Brode covers the highlights of each actor's career, including Western movie work, if significant, to give a full sense of the actor's screen persona(s). Within the entries are discussions of scores of popular Western TV shows that explore how these programs both reflected and impacted the social world in which they aired. Brode opens the encyclopedia with a fascinating history of the TV Western that traces its roots in B Western movies, while also showing how TV Westerns developed their own unique storytelling conventions.

Film and Television Scores, 1950-1979 Kristopher Spencer, 2014-01-10 Hollywood film scores underwent a supersonic transformation from the 1950s through the 1970s. This genre-by-genre overview of film and television soundtrack music covers a period of tremendous artistic and commercial development in the medium. Film and television composers bypassed the classical tradition favored by earlier screen composers to experiment with jazz, rock, funk and avant-garde styles. This bold approach brought a rich variety to film and television productions that often took on a life of its own through records and CDs. From Bernard Herrmann to Ennio Morricone, the composers of the Silver Age changed the way movie music was made, used, and heard. The book contains more than 100 promotional film stills and soundtrack cover art images.

The Stars of Heaven Clifford A. Pickover, 2004-05-06 Do a little armchair space travel, rub elbows with alien life forms, and stretch your mind to the furthest corners of our uncharted universe. With this astonishing guidebook, you don't have to be an astronomer to explore the mysteries of stars and their profound meaning for human existence. Clifford A. Pickover tackles a range of topics from stellar evolution to the fundamental reasons why the universe permits life to flourish. He alternates sections that explain the mysteries of the cosmos with sections that dramatize mind-expanding concepts through a fictional dialog between futuristic humans and their alien peers (who embark on a journey beyond the reader's wildest imagination). This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers. Told in Pickover's inimitable blend of fascinating state-of-the-art science and whimsical science fiction, and packed with numerous diagrams and illustrations, *The Stars of Heaven* unfolds a world of paradox and mystery, one that will intrigue anyone who has ever pondered the night sky with wonder.

Rock Star/Movie Star Landon Palmer, 2020 During the mid-1950s, when Hollywood found itself struggling to compete within an expanding entertainment media landscape, certain producers and studios saw an opportunity in making films that

showcased performances by rock 'n' roll stars. Rock stars eventually found cinema to be a useful space to extend their creative practices, and the motion picture and recording industries increasingly saw cinematic rock stardom as a profitable means to connect multiple media properties. Indeed, casting rock stars for film provided a tool for bridging new relationships across media industries and practices. From Elvis Presley to Madonna, this book examines the casting rock stars in films. In so doing, *Rock Star/Movie Star* offers a new perspective on the role of stardom within the convergence of media industries. While hardly the first popular music culture to see its stars making the transition to screen, the timing of rock's emergence and its staying power within popular culture proved fortuitous for a motion picture business searching for its place in the face of continuous technological and cultural change. At the same time, a post-star-system film industry provided a welcoming context for rock stars who have valued authenticity, creative autonomy, and personal expression. This book uses illuminating archival resources to demonstrate how rock stars have often proven themselves to be prominent film workers exploring this terrain of platforms old and new - ideal media laborers whose power lies in the fact that they are rarely recognized as such. Combining star studies with media industry studies, this book proposes an integrated methodology for writing media history that combines the actions of individuals and the practices of industries. It demonstrates how stars have operated as both the gravitational center of media production as well as social actors who have taken on a decisive role in the purposes to which their images are used.

The Stardom Film Karen McNally, 2020-12-08 Since the earliest days of the movie industry, Hollywood has

mythologized itself through stories of stardom. A female protagonist escapes the confines of rural America in search of freedom in a western dream factory; an ambitious, conceited movie idol falls from grace and discovers what it means to embody true stardom; or a fading star confronts Hollywood's obsession with youth by embarking on a determined mission to reclaim her lost fame. In its various forms, the stardom film is crucial to understanding how Hollywood has shaped its own identity, as well as its claim on America's collective imagination. In the first book to focus exclusively on these modern fairy tales, Karen McNally traces the history of this genre from silent cinema to contemporary film and television to show its significance to both Hollywood and broader American culture. Drawing on extensive archival research, she provides close readings of a wide range of films, from *Souls for Sale* (1923) to *A Star is Born* (1937 and 1954) and *Judy* (2019), moving between fictional narratives, biopics, and those that occupy a space in between. McNally considers the genre's core set of tropes, its construction of stardom around idealized white femininity, and its reflections on the blurred boundaries between myth, image, and reality. *The Stardom Film* offers an original understanding of one of Hollywood's most enduring genres and why the allure of fame continues to fascinate us.

The Life of Stars Giora Shaviv, 2009-10-03 It is the stars, The stars above us, govern our conditions. William Shakespeare, *King Lear* A Few Words about What, Why and How The structure of the stars in general, and the Sun in particular, has been the subject of extensive scientific research and debate for over a century. The discovery of quantum theory during the first half of the nineteenth century provided much of the theoretical background needed to understand the making of the stars and how they live off their energy source. Progress in the theory of stellar structure was made through extensive discussions and controversies between the giants of the field, as well as brilliant discoveries by astronomers. In this book, we shall carefully expose the building of the theory of stellar structure and evolution, and explain how our understanding of the stars has emerged from this background of incessant debate. About hundred years were required for astrophysics to answer the crucial questions: What is the energy source of the stars? How are the stars made? How do they evolve and eventually die? The answers to these questions have profound implications for astrophysics, physics, and biology, and the question of how we ourselves come to be here. While we already possess many of the answers, the theory of stellar structure is far from being complete, and there are many open questions, for example, concerning the mechanisms which trigger giant supernova explosions. Many internal hydrodynamic processes remain a mystery. Yet some global pictures can indeed be outlined, and this is what we shall attempt to do here.

The Psychotronic Video Guide To Film Michael Weldon, 1996 The bible of B-movies is back--and better than ever! From Abby to Zontar, this book covers more than 9,000 amazing movies--from the turn of the century right up to today's Golden Age of Video--all described with Michael Weldon's dry wit. More than 450 rare and wonderful illustrations round out this treasure trove of cinematic lore--an essential reference for every bad film fan.

Movies About the Movies Christopher Ames, 2021-11-21 Hundreds of Hollywood-on-Hollywood movies can be found throughout the history of American cinema, from the days of silents to the present. They include films from genres as far ranging as musical, film noir, melodrama, comedy, and action-adventure. Such movies seduce us with the promise of revealing the reality behind the camera. But, as part of the very industry they supposedly critique, they cannot take us behind the scenes in any true sense. Through close analysis of fifteen critically acclaimed films, Christopher Ames reveals how the idea of Hollywood is constructed and constructs itself. Films discussed: What Price Hollywood? (1952), A Star Is Born (1937), Stand-In (1937), Boy Meets Girl (1938), Sullivan's Travels (1941), In a Lonely Place (1950), Sunset Boulevard (1950), The Star (1950), Singin' in the Rain (1952), The Bad and the Beautiful (1952), Pennies from Heaven (1981), The Purple Rose of Cairo (1985), The Player (1992), Last Action Hero (1993).
