La Gomera a través de la cartografía [1588 - 1899] Juan Tous Meliá,1998-10-05 Este libro nació como consecuencia de la invitación que el Cabildo de La Gomera cursó al autor para que preparase una exposición en la Torre del Conde relacionada con la cartografía isleña.

El libro reproduce 19 mapas de La Gomera. El primer mapa de La Gomera con topónimos es el manuscrito de Valentim Fernandes (1506). Tiene forma de trébol y escaso valor cartográfico. La 'primera imagen' con un contorno bastante cercano al real en el levantado por el ingeniero militar Leonardo Torriani (1588). Al que le siguen las Plantas del también ingeniero militar Próspero Casola (1635c) y del alférez Pedro Agustín del Castillo (1686). Se recogen los mapas de la Isla que se imprimieron en Europa en la segunda mitad del s. XVII y primera del XVIII. Una especial mención merecen los de Antonio Riviere (1742), Machado Fiesco (1762) y Dámaso Quesada Chaves (c1770). También hay que destacar el del capitán A.T.E. Vidal ((1837) y el de Francisco Coello (1849).En total once son los planos localizados de la villa de San Sebastián de La Gomera, los cuales permiten reconstruir con bastante fidelidad la evolución urbana de la Villa. Para no perder continuidad, se han incluido, a modo de apéndice, un plano de 1943 y otro actual. Este último levantado por Grafcan. Especial interés presenta un mosaico con la evolución cartográfica del contorno de la isla de La Gomera que se reproduce en las guardas del libro.
