Japanese Tosa Steve Ostuni, Serena Burnett, 2012-11-20 Weighing in at up to 200 pounds, the Sumo wrestler of the dog world; the Japanese Tosa; was once the prize fighter in the nation's dog pits. Today, this canine wonder, possessing proverbial loyalty and courage, is an esteemed guard dog and protector of home and property, a faithful family companion, and an impressive show dog. Written by Tosa breeder Steve Ostuni of the famous DogStar Kennels, this Comprehensive Owner's Guide begins with a chapter retelling the Tosa's colorful origins in Japan, including the breed's turbulent history as a fighting dog, its rise to the status of a cultural icon in Japan, and the worldwide attention the breed garnered in Western nations, especially the United States and Europe. (Sadly, this noble and worthy breed was banned in Britain, thus the breed has no history in that country.) The author's chapter on the breed's characteristics well describes the physical traits and unique temperament of this naturally dominant canine that requires an experienced owner able to contend with the dog's tremendous strength and determination. The same traits that made the Tosa an indomitable fighting dog serve the breed well as a home guardian. The author strongly urges new owners to seriously pursue the socialization and training of young dogs to thereby mold these awesome canines to become the trustworthy, unshakeable companions they are meant to be. New owners will welcome the well-prepared chapter on finding a reputable breeder and selecting a healthy, sound puppy. Chapters on puppy-proofing the home and yard, purchasing the right supplies for the puppy as well as house-training, feeding, and grooming are illustrated with photographs of handsome adults and puppies. In all, there are over 135 full-color photographs in this useful and reliable volume. The author's advice on obedience training will help the reader better train his Tosa into an obedient and biddable companion. The extensive and lavishly illustrated chapter on healthcare provides up-to-date detailed information on selecting a qualified veterinarian, vaccinations, preventing and dealing with parasites, infectious diseases, and more. Sidebars throughout the text offer helpful hints, covering topics as diverse as historical dogs, breeders, or kennels, toxic plants, first aid, crate training, carsickness, fussy eaters, and parasite control. Fully indexed.

Why Does My Dog Act That Way? Stanley Coren, 2008-12-09 No one knows dogs better than author and psychologist Stanley Coren and no one writes so well about their personalities and temperaments. This new book distills his many years of expertise in both canine and human behaviour into a fascinating and highly readable guide to how your dog's individual personality influences everything he does and hence, his relationship with you. Packed with the very latest scientific research

and leavened with Stanley Coren's trademark fund of stories and anecdotes, WHY DOES MY DOG ACT THAT WAY? is above all a practical guide which will provide every dog owner with the key to greater understanding of his or her dog. The book explains the specific traits of numerous popular breeds and examines how this affects the way they react in and out of the home, with other dogs, with people and with children. It also looks at variations within breeds and at the behaviour patterns of many mixed breeds which will have inherited a cocktail of characteristics from their parents. And it includes a fun, comprehensive and easy-to-follow multiple-choice personality test you can do with your dog at home which will reveal your dog's innermost secrets and help you to understand what makes him tick, enabling you to fine-tune your training to suit both your dog and you.

Emerging Voices for Animals in Tourism Jes Hooper, Carol Kline, 2024-02-14 While the study of animal-human interactions within the context of tourism has been explored in a greater number and diversity of ways within the last decade, the discourse remains divided between traditional tourism academia and outside disciplines 'looking in'. Tourism academia has borrowed philosophical, ethical, gender studies, sociological, ecological conservation, and economic lenses to explore animals in tourism, however collaboration with authors external to tourism studies remains few. This edited volume strengthens the bridge between tourism academia and other disciplines by highlighting the fresh perspectives, emerging methodologies and innovative interdisciplinary conventions at the forefront of animals in tourism research, whilst critically working towards more ethical human-animal interactions within the tourism and leisure space. Split into four parts 'emerging

motivations', 'emerging cultures', 'emerging narratives', and 'emerging reflections', this unique text will be widely applicable to scholars working towards equitable human-animal interactions within tourism.

The Traps of Youth Albert Lee Daw, 2015-06-10 Of all the traps of youth, the most deadly are: The loss of 14 precious years of life from premature death from lifetime nicotine poisoning from smoking, and by highway crashes during their dangerous teen years when they are living life with gusto and are easily distracted while living very much in the now. More awareness of these traps may increase one's survival.

The Welfare of Dogs Kevin Stafford, 2007-06-14 Animal welfare is attracting increasing interest worldwide, but particularly from those in developed countries, who now have the knowledge and resources to be able to offer the best management systems for their farm animals, as well as potentially being able to offer plentiful resources for companion, zoo and laboratory animals. The increased attention given to farm animal welfare in the West derives largely from the fact that the relentless pursuit of financial reward and efficiency has led to the development of intensive animal production systems, that challenge the conscience of many consumers in those countries. In developing countries human survival is still a daily uncertainty, so that provision for animal welfare has to be balanced against human welfare. Welfare is usually provided for only if it supports the output of the animal, be it food, work, clothing, sport or companionship. In reality, there are resources for all if they are properly husbanded in both developing and developed countries. The inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in all sectors of the world. Livestock are the world's biggest land user (FAO, 2002) and the population is increasing rapidly to meet the need of an expanding human population. Populations of farm animals managed by humans are therefore increasing worldwide, and there is the tendency to allocate fewer resources to each animal. Increased attention to welfare issues is just as evident for companion, laboratory, wild and zoo animals.

Unleashed Simon Harding, 2012 Drawing on evidence from both sides of the Atlantic, Simon Harding explores the culture of the status dog in *Unleashed*. In housing projects in the United States and United Kingdom, certain dog breeds convey status--authority, respect, power, and control--on their owners, while urban street gangs have developed the dangerous practice of training dogs to be weapons. Combining perspectives from sociology, criminology, and public policy, Harding contextualizes these related phenomena and considers the complex mix of factors motivating them, including urban deprivation, social control of public space, and the influence of media imagery.

India Today, 2005

Dogs of the World Lili Chin, 2025-04-15 From the noble Afghan to indigenous village dogs, this vibrant illustrated gallery offers fascinating information on more than 600 dog breeds, from the author and illustrator of *Doggie Language* and *Kitty Language*. Meet more than 600 types of dogs in this captivating canine gallery, from the English Springer Spaniel and

Moroccan Aïdi to the Thai Ridgeback and the New Guinea Singing Dog. Packed with fascinating tidbits and hundreds of illustrations, *Dogs of the World* also shines a welcome spotlight on the world's 85 percent of dogs who are no breed at all, including mutts and village dogs. You'll learn about different dog types and their working roles, such as herding, livestock guarding, scent detection, dog sports, and companionship, and understand what terms like purebred and landrace mean. Trace the history of our modern dogs through a vibrantly visual timeline, and pick up insights on breed health risks, personality traits, and how breed ancestry DNA tests work. Featuring adorable artwork and research vetted by dog history experts, behavior professionals, and veterinarians, this is a loving and accessible guide to the diversity of our canine companions.

Unleashed Harding, Simon, 2012-08-29 This is the first book in the UK or US to set on record the recent cultural phenomenon of the use of certain dog breeds - both legal and illegal - to 'convey status' upon their owners. Such dogs are easily visible on social housing estates throughout the UK and in projects in the USA and provide acquired authority, respect, power and control. However they are increasingly linked to urban street gangs as 'Weapon Dogs' and present a danger to the ordinary public especially those using parks and open spaces with increased injuries being presented at UK hospitals. Though initially slow to react, local and statutory authorities are now seeking to address the issue through action plans and interventions. Written in a fresh, engaging and accessible style, this unique book contextualizes the phenomenon in terms of sociology, criminology and public policy. It considers a complex mix of urban and social deprivation, social control of public space and the influence of contemporary media imagery and 'gangsta' culture. It will make essential reading for academics and policy makers in criminology and criminal justice and those working with animal rights/animal welfare groups.

Degrees of Guilt Jim Bennett, 2016-10-18 When a helicopter chartered by an anti-seal hunting group buzzes his boat off the coast of Newfoundland, Billy Wheeler downs it with a single shot, killing everyone on board. As his crewmates reel from shock, one thing becomes irrevocably clear: Billy is deep in the throes of PTSD (Post-traumatic Stress Disorder). Born in a fishing village in northern Newfoundland in 1967, the last thing Billy thought he'd become was a soldier. With few career options available due to declining fish stocks, he joins the Canadian Armed Forces. Canada isn't at war with anyone, so he never considers the possibility of combat. His deployment on a peacekeeping mission to Bosnia changes that. There he witnesses the ravages of ethnic cleansing and engages in the savagery of war, discovering an unparalleled propensity for killing. Billy's "success" at war comes at a price—horrific images that threaten to overwhelm his mind. Though he tries to hide his condition and self-medicate, the consequences are predictable. When a personal tragedy turns his world upside down once again, he turns to the one thing he knows best: combat. The mission in Afghanistan is a success, but his PTSD symptoms return with a vengeance, leading to that terrible day off Newfoundland's coast. What emerges is a gripping

portrait of one soldier's battle with PTSD, a region's struggles with the trauma that follows the loss of its central industry and way of life, and a story of family, loyalty and finding love when you least expect it.

Bad Laws Philip Johnston,2010-03-25 Over the past thirteen years, New Labour has made us wade through a quagmire of petty rules, health and safety lunacies, madcap laws and nitpicking regulations. We have been snooped on, hectored and hounded by state nannies from cradle to grave, all because government and its agencies have nothing better to do than to interfere in our lives. It would not be so bad if the Government ran the country well, but we have to put up with high taxes, street crime, late and dirty trains, the unjustified and disproportionate use of fines and charges, bloody-minded parking restrictions, excessive public sector waste, preposterous European directives, useless and unaccountable council officials and multi-culturalist busybodies. In this explosive and groundbreaking new book, Philip Johnston makes a stand and exposes the 'Bad Laws', those irritating laws, regulations and Whitehall idiocies that make life in Britain the day-to-day nightmare that it is today. He covers the following laws amongst many others: The Regulation of Investigatory Powers Act (Ripa) or snoopers' charter, allows a wide range of government bodies and quangos to watch over people, check on what they are doing and monitor their communications. The Safeguarding Vulnerable People Act...which will require 11 million people working with children or the elderly to obtain a certificate allowing them to continue to do so yet will be easily evaded by those few individuals who are a danger to children. The Hunting Act. More foxes have died every year since the Act came into force. The Children Act. All 25,000 state and private nursery schools, child minders and playgroups are required to follow a new statutory framework dubbed the nappy curriculum. Smoking Ban - It has interfered both with personal freedom and with commercial enterprise. Housing Act - which brought us Hips in the midst of a property price slump. European Arrest Warrant - which allows British citizens to be extradited to another jurisdiction to stand trial for an offence that is not a crime in the UK. Dangerous Dogs Act, which became synonymous with hasty and ill-thought-out legislation. Firearms Act which wiped out the sport and livelihoods of thousands of law abiding people. War Crimes Act, pushed through using the Parliament Act but which has resulted in not a single conviction. Religious Hatred Act which made a bad thought a crime. Numerous Health and safety laws of every description. The Licensing Act which made it an offence to play a piano in a pub without authorisation.
