Great Minds Speak to You Tina Louise Spalding, 2013-09-26 Many in spirit look on these times of difficulty, abundance, trouble, and innovation and wish to share with you their experiences and ideas. Some famous names and faces will come to mind as you read this book, and you will glean some fine information about their own learning, their own suffering, and indeed their own experience in the life after this life, for they all wish to tell you that there is no death as you perceive it to be. They are all there in their astral forms, enjoying their continued growth, their continued expansion, and their continued joy in living. Their messages are as varied as their lives were, and our purpose is this: For you to understand your true nature, your true potential, you must let go of your fear of death, for it makes you afraid to live. It causes you to rush and panic, to become scared, and to become paralyzed. If you truly understood that you are eternal beings, forgiven for all your errors and blamed for nothing that you would call a sin, you would open your hearts and minds to so much more and enjoy yourselves so much more. You would not suffer so at the loss of your loved ones, and you would work less and achieve more, for when you are in fear and grief, you are not yourselves and cannot achieve the goals that you have set for yourselves before you decided to be born onto this plane you call life. Read this with an open mind and heart, and hear what these beings have to say. You have revered and reviled them in life; now let them complete their stories in what you call death, for that is the complete story, is it not? — Ananda

**Leap Forward** Andrew Obara, 2017-10-13 This book was written for people who probably feel they never need it. Its main purpose is to motivate and encourage the reader, whoever and wherever they are, that it is possible to rise up, do better, and excel as a person. It is easy to get into the trap of daily painful existence, blaming circumstances, the environment, other people, and things around us for our negative outcomes in life. None of us love to remain poor or insignificant. We all want to achieve and attain status in life. We all love to excel, yet very few of us do. The book argues with compelling stories and evidence from history, science, society, and academia that human destiny, in its most crude form, is like a garden. When left alone, a garden only grows with useless weeds, but when good seeds are sown in it, the ground is well cultivated, the crops cared for, and the garden teeming lively with crops that feed us well. The author shares with the reader his personal experiences and those of scores of other people in the world to demonstrate the indomitable power of the

human being to get better. Spiced with easy, witty poems and scores of true stories, the book convinces the reader of their power to excel. The book does this using sequential themes built around eight instructively captivating chapters as follows: 1. Leap forward and get better. 2. Use your power; you are more powerful than you think 3. Pursue excellence; it is your calling 4. Avoid mediocrity and all its roots 5. Accept that you are different 6. Dedicate yourself to service And when you do all these and you realize it is tough, 7. Take heart; the world seldom cheers excellence 8. Now do this and leap forward.

Consciousness and the Great Philosophers Stephen Leach, James Tartaglia, 2016-10-04 Consciousness and the Great Philosophers addresses the question of how the great philosophers of the past might have reacted to the contemporary problem of consciousness. Each of the thirty-two chapters within this edited collection focuses on a major philosophical figure from the history of philosophy, from Anscombe to Xuanzang, and imaginatively engages with the problem from their perspective. Written by leading experts in the field, this exciting and engaging book explores the relevance of the history of philosophy to contemporary debates and therefore is essential reading for students and scholars studying the history of philosophy, contemporary philosophy of mind and consciousness, or both.
