

Jose Villagran Garcia Teoria De La Arquitectura

José Villagrán García

Teoría de la arquitectura José Villagrán García, 1988

Modernity and the Architecture of Mexico Edward R. Burian, 2010-06-28 Since the mid 1970s, there has been an extraordinary renewal of interest in early modern architecture, both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism. This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s. Nine essays by noted architects and architectural historians cover a range of topics from broad-based critical commentaries to discussions of individual architects and buildings. Among the latter are the architects Enrique del Moral, Juan O'Gorman, Carlos Obregón Santacilia, Juan Segura, Mario Pani, and the campus and stadium of the Ciudad Universitaria in Mexico City. Relatively little has been published in English regarding this era in Mexican architecture. Thus, *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions, ideological and political constructs, and specific architect's agendas known to a wide audience in the humanities. Likewise, it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement.

Architecture as Revolution Luis E. Carranza, 2010-06-15 The period following the Mexican Revolution was characterized by unprecedented artistic experimentation. Seeking to express the revolution's heterogeneous social and political aims, which were in a continuous state of redefinition, architects, artists, writers, and intellectuals created distinctive, sometimes idiosyncratic theories and works. Luis E. Carranza examines the interdependence of modern architecture in Mexico and the pressing sociopolitical and ideological issues of this period, as well as the interchanges between post-revolutionary architects and the literary, philosophical, and artistic avant-gardes. Organizing his book around chronological case studies that show how architectural theory and production reflected various understandings of the revolution's significance, Carranza focuses on architecture and its relationship to the philosophical and pedagogic requirements of the muralist movement, the development of the avant-garde in Mexico and its notions of the Mexican city, the use of pre-Hispanic architectural forms to address indigenous peoples, the development of a socially oriented architectural functionalism, and the monumentalization of the revolution itself. In addition, the book also covers important

architects and artists who have been marginally discussed within architectural and art historiography. Richly illustrated, *Architecture as Revolution* is one of the first books in English to present a social and cultural history of early twentieth-century Mexican architecture.

Constructing Identity in Contemporary Architecture Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe. Paradoxically, the reverse process has also emerged: In some countries, the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization. What started as a defensive notion has developed into a more progressive attempt to re-create what has allegedly been lost. This trend is being strongly expressed in discourses about architecture in countries of the South. Who are the actors feeling compelled to construct new identities? How are these new identities in architecture created in various parts of the world? And, which are the ingredients borrowed from various historical and ethnic traditions and other sources? These and other questions are discussed in five case studies from different parts of the world, written by renowned scholars from Brazil, Mexico, Egypt, India and Singapore.

The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano,2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures - academic, social status, economic/political, gender, and postcolonial - and by interviews and analysis of 13 key Mexican architects. These include Luis Barragán, José Villagrán García, Juan O’Gorman, Pedro Ramírez Vázquez, Agustín Hernández, Abraham Zabludovsky, Carlos Mijares, Ricardo Legorreta, Juan José Díaz Infante, Enrique Norten, Alberto Kalach, Javier Sordo Madaleno and Clara de Buen. Although the five power structures framed what was built, the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances. Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally. Even if these architects were not always aware of the power structures, their projects nonetheless supported discrimination, marginalization and subjugation. In that sense the book also reveals the extent to which these power structures are still present today. The Making of Mexican Modernist Architecture’s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity. It also voices the urgent need today for a new kind of architecture outside these boundaries. The book is essential reading for anyone studying Mexican and Latin American architecture.

José Villagrán García José Villagrán García,1986

La construcción de la arquitectura moderna en México Celia Esther Arredondo Zambrano,2025-02-13 Este libro presenta la construcción de la arquitectura moderna mexicana mediante un enfoque basado en cinco estructuras de poder: la académica, la económica y política, la de estatus social, la de género y la poscolonial. Se incluyen también fragmentos de

entre- vistas y análisis de obras de trece destacados arquitectos: Luis Barragán, José Villagrán García, Juan O'Gorman, Pedro Ramírez Vázquez, Agustín Hernández, Abraham Zabludovsky, Carlos Mijares, Ricardo Legorreta, Juan José Díaz Infante, Enrique Norton, Alberto Kalach, Javier Sordo Madaleno y Clara de Buen. Todo ello proporciona un testimonio vivo de todo ese proceso. Si bien las cinco estructuras de poder enmarcaron y definieron esa arquitectura, las entrevistas de unos arquitectos que fueron sus protagonistas ayudan a descubrir e identificar sutilezas y matices en lo acontecido en ese periodo. De este modo, sus voces arrojan luz sobre lo que contribuyó a hacer de la arquitectura moderna mexicana algo tan singular a escala mundial. Aunque esos arquitectos no siempre fueron conscientes de la presencia de esas estructuras de poder, sus proyectos participaron en la marginación, la discriminación y el sometimiento que tales estructuras provocaban. En este sentido, el presente estudio también revela hasta qué punto dichas estructuras de poder están todavía presentes en la arquitectura mexicana actual. La singularidad de este libro se centra en describir los extraordinarios edificios modernos que surgieron en México en el contexto de esas cinco estructuras de poder. A su vez, el examen detallado de tales estructuras cuestiona su validez. El estudio expresa asimismo la urgente necesidad actual de generar una nueva arquitectura que se sitúe fuera de los límites impuestos por los condicionantes del siglo XX. Por todo ello, este libro es una lectura esencial para quienes estudian la arquitectura mexicana y latinoamericana.

Arquitectura, teoría, diseño, contexto Enrique Yáñez, 1983

Artifacts of Revolution Patrice Elizabeth Olsen, 2008-09-11 This innovative history utilizes the built environment as a means of tracing the path of the consolidation of the Mexican Revolution. Patrice Elizabeth Olsen considers the physical changes in Mexico City's built environment, using them to evaluate the extent and direction of regime consolidation of successive governments during the critical period from 1920 to 1940. Architects, engineers, politicians, and entrepreneurs alike expressed visions of what modern Mexico should be and sought to improve the nation through an array of initiatives. Their successes and failures, and thus the direction of the revolution, is written in the capital city. The author's interdisciplinary approach offers an important contribution to the study of Mexican political history; and the aesthetics of modernity.

José Villagrán García Ramón Vargas, 2005 The life and architecture of Villagrán (b. Mexico), who is recognized as one of the leading architects of the Mexican Revolution from 1925-1950. His name is attached to much of the early new modern architecture of 20th century Mexico.

Modernización y nacionalismo de la arquitectura mexicana en cinco voces: 1925-1980 Yolanda Guadalupe Bojórquez Martínez, 2016-06-06 Los discursos teóricos de José Villagrán García, Luis Barragán, Pedro Ramírez Vázquez, Juan O'Gorman e Ignacio Díaz Morales son el cimiento a través del cual la autora asienta su búsqueda de los elementos que llevaron a la construcción de un país modernizado, lleno tanto de contradicciones, rivalidades y antagonismos como de

acuerdos y reconocimientos. Más allá todavía, y desde una lectura estructuralista de la cultura, en donde un contexto y una sociedad específicos se interrelacionan con la producción y la toma de posturas de los diversos actores, Yolanda Bojórquez parte del análisis del discurso de los cinco arquitectos —todos ellos clave en el siglo XX en México—, para abrir la puerta a la configuración de una teoría de la arquitectura, un campo por lo general descuidado en nuestro país. Esta obra nos permite un acercamiento teórico especializado y apasionante, dirigido a estudiantes y profesionales de la arquitectura, así como a cualquier lector interesado en la arquitectura y su evolución en México y en la historia cultural que durante el siglo pasado constituyó esta nación. (ITESO)

Relatos para la historia de una facultad ,2004

José Villagrán García Salvador Pinoncelly, José Villagrán García, 2004

La Bauhaus, Bruno Zevi, Italo Calvino y otros temas de la arquitectura mexicana del siglo XX. Enrique X. de Anda

Alanís, 2024-11-06 El presente libro recopila textos inéditos del arquitecto y doctor en Historia del Arte Enrique X. de Anda Alanís acerca de aquello que, en términos generales, puede entenderse como cultura arquitectónica. Escritos a lo largo de los últimos 20 años, aun y la diversidad de sus orígenes —investigaciones, reflexiones, conferencias y seminarios— todos ellos se apoyan sobre las líneas teóricas fundamentales y recurrentes del autor, a saber, la historiografía y la preservación de la arquitectura moderna mexicana. Desde la relación de la arquitectura mexicana con ámbitos y pensamientos procedentes de otros lugares del mundo, pasando por una revisión de la historia de la arquitectura desde perspectivas inéditas que ponen el foco en el amplio abanico de circunstancias culturales que ejercieron influencia sobre ella, y llegando a la necesaria atención del autor sobre la importancia de la conservación del patrimonio arquitectónico del siglo xx, todos estos textos arrojan una nueva luz sobre los temas clave que invitan repensar la cultura arquitectónica mexicana.

El art déco en Ciudad de México Carolina Magaña, 2019-12-23 La arquitectura por sí misma es un arte y un testimonio de la historia que muestra aspectos del pensamiento en una época determinada. En ese tenor, el art déco resume uno de los periodos más creativos del arte, del diseño y de la arquitectura a nivel mundial durante el siglo xx. Su impacto en México es evidente, por lo que en esta obra se narra la historia urbana para analizar las edificaciones más representativas de este movimiento en Ciudad de México. La obra recuerda la inmersión del art déco en el contexto internacional de los primeros decenios del siglo xx, además de contextualizar a la producción arquitectónica dentro del amplio panorama del diseño que inundó las artes y artesanías. A partir de una cuidadosa revisión historiográfica, Carolina Magaña presenta una aproximación teórica de conceptos ineludibles para el estudio de tres obras emblemáticas: los edificios Picadilly, Ritz y Hamburgo. Este libro retoma para su análisis los instrumentos de conocimiento histórico e historiográfico estudiados por Marina Waisman, enfocados a la arquitectura en América Latina, aunado al estudio fotográfico de Paulina Lavista, Pablo Aguinaco y Carolina Magaña.

Arquitectura en tránsito Urzaiz Lares Urzaiz L., 1997

O'Gorman, Kahlo, Rivera Javier Jerez Gonzalez, 2021-06-10 En el verano de 1932 Juan O'Gorman, un jovencísimo arquitecto que aún no se ha titulado, termina en México DF la construcción de las casas estudio que ha proyectado para Diego Rivera y Frida Kahlo. Tras una empalizada de cactus dos cubos casi perfectos -pintado uno de azul intenso, de rojo y blanco el otro- se elevan sobre delgadas columnas de hormigón desnudo ante la mirada atónita de todo el mundo. Las casas tienen un aspecto extraño, no se parecen a ninguna obra que se haya hecho antes en México. Su construcción es de una extrema racionalidad y eficiencia pero al mismo tiempo su estructura, sus volúmenes y huecos se acompañan con una plasticidad inusual y generan una atmósfera marcadamente onírica. Constituyen una auténtica obra maestra de arquitectura, un extraño fruto que surge de forma inesperada de la mano de un desconocido. Sin embargo detrás de esta obra hay toda una historia que se remonta bastantes años atrás, una historia que traba íntimamente la arquitectura con la pintura a través del compromiso político. En ella participan un sinfín de personajes relevantes -Edward Weston, Tina Modotti, Manuel Álvarez Bravo, Carlos Obregón Santacilia, José Antonio Cuevas, Guillermo Zárraga, Le Corbusier, Vladimir Maiakovsky, Moisei Ginzburg, Sergei Eisenstein, Alfred Barr, Lev Trotsky, Henry Ford, Albert Kahn...- en un entramado que enlaza México DF con ciudades tan distantes como París, Moscú y Detroit. Esa historia, el largo prelude de una arquitectura extraordinaria, es lo que cuenta el presente libro.

Ricardo Legorreta, tradición y modernidad Louise Noelle, 1989
